

SECTION I

REGULATIONS

1. Title of the Course: It shall be called Master of Dental Surgery

2. Branches of Study: The following are the subjects of speciality for the MDS degree:

- a. Prosthodontics and Crown & Bridge
- b. Periodontology
- c. Oral & Maxillofacial Surgery
- d. Dentistry and Endodontics
- e. Orthodontics & Dentofacial Orthopedics
- f. Oral Pathology & Microbiology
- g. Public Health Dentistry
- h. Paedodontics & Preventive Dentistry
- i. Oral Medicine & Radiology

3. Eligibility

A candidate for admission to the MDS course (Master of Dental Surgery) must have a recognized degree of BDS (Bachelor of Dental Surgery) awarded by an Indian University in respect of recognized Dental College under Section 10(2) of the Dentists Act, 1948 or an equivalent qualification recognized by the Dental Council of India and should have obtained permanent registration with the State Dental Council. Candidates not possessing a recognized Dental qualification for the above purpose should secure the prior approval of his qualifications by the Dental Council of India before he can be admitted to the MDS Course of any University in India.

Qualification for the above purpose should secure the prior approval of his qualifications by the Dental Council of India before he can be admitted to the MDS Course of any University in India.

Candidates who possess PG Diploma recognized by the DCI with the duration of 2 years (proposed) in particular specialty is eligible for admission in MDS in the same specialty and the duration will be 2 years. The syllabus of two years programmed will be as per the concerned university guidelines.

Provided that in the case of a foreign national, the Dental Council of India may, on payment of the prescribed fee for registration, grant temporary registration for the duration of the postgraduate training restricted to the dental college/institution to which he is admitted for the time being exclusively for postgraduate studies;

Provided that further temporary registration to such foreign national shall be subject to the condition that such person is duly registered as dental practitioner in his own country from which he has obtained his basic dental qualification and that his degree is recognized by the corresponding dental council or concerned authority

4. Criteria For Selection For Admission

Students for MDS Course shall be admitted based on performance at the competitive examinations held by Central government/State government/Universities or Institutions.

5. Eligibility Certificate from RGUHS

No candidate shall be admitted to any postgraduate MDS course unless the candidate has obtained and produced eligibility certificate issued by University. The candidate has to make an application to the University with the following documents along with the prescribed fee:

1. BDS pass / degree certificate issued by the University.
2. Marks cards of all the university examinations passed (I to IV BDS year course).
3. Attempt Certificate issued by the Principal.
4. Certificate regarding the recognition of the Dental college by the Dental Council of India.
5. Completion of paid rotatory internship certificate from a recognized college.
6. Registration by any State Dental Council and
7. Proof of SC/ ST or Category I, as the case may be. Candidates should obtain the Eligibility Certificate before the last date for admission as notified by the University. A candidate who has been admitted to postgraduate course should register his / her name in the University within a month of admission after paying the registration fee.

6. Duration of the Course

The Course shall be of three years duration.

All the candidates for the degree of MDS are required to pursue the recommended: course for at least three academic years as full time candidates in an institution affiliated to and approved for Postgraduate studies by Rajiv Gandhi University of Health Sciences, Karnataka, and recognized by the Dental Council India.

7. Method of training

The training of postgraduate for degree shall be full time with graded responsibilities in the management and treatment of patients entrusted to his/her care. The participation of the students in all facets of educational process is essential. Every candidate should take part in seminars, group discussions, grand rounds, case demonstration, clinics, journal review meetings, CPC and clinical meetings. Every candidate should participate in the teaching and training programme of undergraduate students. Training should include involvement in laboratory and experimental work, and research studies

8. Attendance, Progress and Conduct

A candidate pursuing degree/diploma course should work in the concerned department of the institution for the full period as a full time student. No candidate is permitted to own a clinic/work in clinic/laboratory/nursing home while studying postgraduate course, candidate shall join any other course of study or appear for any other examination conducted by this university or any other university in India or abroad during the period of registration.

Each year shall be taken as a unit for the purpose of calculating attendance.

Every candidate shall attend symposia, seminars, conferences, journal review meetings, grand rounds, CPC, case presentation, clinics and lectures during each year prescribed by the department and not absent himself / herself from work without reasons.

Every candidate shall have not less than 80 percent of attendance in each year of I course. However, candidates should not be absent continuously as the course is a full time one

9. Monitoring Progress of Studies

Work diary / Log Book: Every candidate shall maintain a work diary and record of his/her participation in the training programme conducted by the department such as journal reviews, seminars, etc. Please see Chapter IV for model checklists and logbook. Special mention may be made of the presentations by the candidate as well as details of clinical or laboratory procedures, if any conducted by the candidate. The work diary shall be scrutinized and certified by the Head of the Department and Head of the Institution, and presented in the university practical/clinical examination.

Periodic tests:

In case of degree courses of three years duration, the concerned departments may conduct three tests, two of them be annual tests, one at the end of first year and the other in the second year. The third test may be held three months before the final examination. The tests may include written papers, practical / clinical and viva voce. Records and marks obtained in such tests will be maintained by the Head of the Department and sent to the University, when called for.

Records:

Records and marks obtained in tests will be maintained by the Head of the Department and will be made available to the University when called for.

10. Dissertation

Every candidate pursuing MDS degree course is required to carry out work on a selected research project under the guidance of a recognized post graduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of a problem, formulation of a hypothesis, search and review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, comparison of results and drawing conclusions.

Every candidate shall submit to the Registrar of the University in the prescribed proforma, a synopsis containing particulars of proposed dissertation work within six months from the date of commencement of the course on or before the dates notified by the University. The synopsis shall be sent through the proper channel.

Such synopsis will be reviewed and the dissertation topic will be registered by the University. No change in the dissertation topic or guide shall be made without prior approval of the University.

The dissertation should be written under the following headings:

- i. Introduction
- ii. Aims or Objectives of study
- iii. Review of literature
- iv. Results
- v. Discussions
- vi. Conclusion
- vii. Summery
- viii. Reference
- ix. Tables
- x. Annexures

The written text of dissertation shall be not less than 50 pages and shall not exceed 150 pages excluding references, tables, questionnaires and other annexure. It should be typed in double line spacing on one side of paper (A4 size, 8.27" x 11.69") and properly. Spiral binding should be avoided. The dissertation shall be certified by the guide, head of the department and head of the Institution.

Four copies of dissertation thus prepared shall be submitted to the Registrar (Evaluation), six months before final examination on or before the dates notified by the University

The dissertation shall be valued by examiners appointed by the University. Approval dissertation work is an essential precondition for a candidate to appear in the University examination.

Guide: The academic qualification and teaching experience required for recognition by this University as a guide for dissertation work is as laid down by Dental Council of India / Rajiv Gandhi University of Health Sciences.

Co-guide: A co-guide may be included provided the work requires substantial cont from a sister department or from another institution recognised for teaching/training by Rajiv Gandhi University of Health Sciences/Dental Council of India. The co-guide shall be a recognized postgraduate teacher of Rajiv Gandhi University of Health Sciences.

Change of guide: In the event of a registered guide leaving the college for any rea in the event of death of guide, guide may be changed with prior permission from the university.

11. Scheme of Examination

Eligibility : The following requirements shall be fulfilled by every candidate to eligible to appear for the final examination.

- i) **Attendance:** Every candidate shall have fulfilled the attendance prescribed by the University during each academic year of the postgraduate course.
- ii) **Progress and conduct:** Every candidate shall have participated in seminars, review meetings, symposia, conferences, case presentations, clinics and didactic during each year as designed by the concerned department
- iii) **Work diary and Logbook:** Every candidate shall maintain a work diary and logbook for recording his/her participation in the training programmes conducted by the department. The work diary and logbook shall be verified and certified by the Head of the Department and Head of the institution. (Please see Section IV for Model Checklist and Logbook)

The certification of satisfactory progress by the head of the department and head of the institution shall be based on (i), (ii) and (iii) mentioned above.

Schedule of Examination: The examination for M.D.S. courses shall be held at the end of three academic years (six academic terms). The university shall conduct two examinations in a year at an interval of four to six months between the two examinations. Not more than two examinations shall be conducted in an academic year.

12. University Examination

M.D.S. Degree examinations in any branch of study shall consist of dissertation, written paper (Theory), Practical/Clinical and Viva voce.

(a) Dissertation: Acceptance of dissertation shall be a precondition for the candidate to appear for the final examination.

(b)Written Examination (Theory): Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. The fourth paper will be to write an essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics in each paper is shown in Section III along with course description of the concerned speciality, and as clause 14 in this section. ADS

(c)Practical / Clinical Examination:

In case of practical examination, it should be aimed at assessing competence and skills of techniques and procedures. It should also aim at testing student's ability to make relevant and valid observations, interpretation and inference of laboratory or experimental or clinical work relating to his/her subject for undertaking independent work as a specialist.

The actual format of clinical examination in various specialities are given in Section III. The total marks for practical / clinical examination shall be 200.

(d)Viva Voce: Viva-Voce examination shall aim at assessing depth of knowledge, logical reasoning, confidence and oral communication skills. The total marks shall be 100 and the distribution of marks shall be as under:

- (i) For examination of all components of syllabus 80 Marks
- (ii) For (Pedagogy) demonstration of teaching skills 20 Marks

Examiners

There shall be at least four examiners in each branch of study. Out of four, two shall be external examiners and two shall be internal examiners. The qualification and teaching experience for appointment as an examiner shall be as laid down by RGUHS and Dental Council of India from time to time

13. Criteria for Declaring as Pass

To pass in the University examination, a candidate shall secure in both theory examination and the practical/clinical including viva voce independently an aggregate of 50% of total marks allotted (150 marks out of 300 allotted for theory and 150 out of 200 for clinical + 100 for viva voce together). A candidate securing less mark as described above shall be declared to have failed in the examination.

A candidate who is declared successful in the MDS Examination shall be granted a Degree of Master of Dental Surgery in the respective specialty. ADS

14. Distribution of Topics in theory papers in various branches of study specialities:

SYLLABUS DISTRIBUTION AMONG 4 PAPERS IN VARIOUS SPECIALITIES:

Prosthodontics and Crown & Bridge

Paper-I -	Applied Anatomy, physiology, pathology and Dental Materials
Paper-II -	Removable Prosthodontics and Oral Implantology
Paper-III -	Fixed Prosthodontics
Paper-IV -	Essay

Periodontology

Paper-I - pharmacology	Applied Anatomy, Physiology, Biochemistry, Pathology and
Paper-II -	Etiopathogenesis
Paper-III -	Clinical Periodontology and Oral Implantology
Paper-IV -	Essay

Oral & Maxillofacial Surgery

Paper-I -	Applied Anatomy, Physiology and Pathology
Paper-II -	Minor oral Surgery and Trauma
Paper-III -	Maxillofacial Surgery and Oral Implantology
Paper-IV -	Essay

Conservative and Endodontics

Paper-I -	Applied Anatomy, Physiology, Pathology and dental materials
Paper-II -	Conservative dentistry & Aesthetic Dentistry
Paper-III -	Endodontics
Paper IV -	Essay

Orthodontics & Dentofacial Orthopaedics

Paper-I -	Applied anatomy, physiology, pathology, genetics physical anthropology & dental material
Paper-II -	Diagnosis and treatment planning.
Paper-III -	Clinical Orthodontics and Mechanotherapy
Paper-IV -	Essay

Oral Pathology & Microbiology and Forensic Odontology

Paper- I -	Applied Anatomy, Physiology, Pathology and Research Methodology
Paper-II -	Oral pathology, Microbiology and Oncology
Paper-III -	Laboratory Techniques and Diagnosis
Paper-IV -	Essay

Public Health Dentistry

Paper-I -	Applied anatomy, physiology, pathology & research methodology
Paper-II -	Public Health
Paper III -	Dental Public Health
Paper-IV -	Essay

Pediatrics & Preventive Dentistry

Paper-I -	Applied Anatomy, Physiology, Pathology, Microbiology, Nutrition and Dietetics
Paper-II -	Clinical pediatric dentistry
Paper-III -	Preventive and community dentistry as applied to pediatric dentistry

Paper-IV - Essay

Oral Medicine and Radiology

Paper-I- Applied anatomy, physiology, pathology and pharmacology.
Paper II - Diagnosis, diagnostic methods and implantology and Applied Oral
Pathology
Paper-III- Oral medicine, there-entice and laboratory investigations
Paper-IV- Essay

SECTION II

GOALS & OBJECTIVES OF MDS COURSE

Goals:

The goals of postgraduate training in various specialities is to train B.D.S. graduate who will, after successful completion of the course:

- ©Practice respective speciality efficiently and effectively, backed by scientific knowledge and skill.
- ©Exercise empathy and a caring attitude and maintain high ethical standards.
- © Continue to evince keen interest in continuing professional education in the speciality and allied specialities irrespective of whether in teaching or practice.
- ©Willing to share the knowledge and skills with any learner, junior or a colleague.
- ©Develop the faculty for critical analysis and evaluation of various concepts and views, to adopt the most rational approach.

Objectives:

The objective is to train a candidate so as to ensure higher competence in both general and special area of interest and prepare him for a career in teaching, research and speciality practice. A candidate must achieve a high degree of clinical proficiency in the subject matter and develop competence in research and its methodology as related to the field concerned.

The above objectives are to be achieved by the time the candidate completes the course. The objectives may be considered as under -

1. Knowledge (Cognitive domain)
2. Skills (Psycho motor domain)
3. Human values, ethical practice and communication abilities

Knowledge:

- © Demonstrate understanding of basic sciences relevant to speciality.
- © Describe etiology, pathophysiology, principles of diagnosis and management of common problems within the speciality in adults and children.
- © Identify social, economic, environmental and emotional determinants in a given case and take them into account for planning treatment.
- © Recognise conditions that may be outside the area of speciality/competence and to refer them to an appropriate specialist.
- © Update knowledge by self study and by attending courses, conferences, seminars relevant to speciality.
- © Undertake audit, use information technology and carryout research both and clinical with the aim of publishing or presenting the work at various seminars and gatherings.

Skills:

1. Take a proper clinical history, examine the patient, perform essential diagnostic procedures and order relevant tests and interpret them to come to a reasonable diagnosis about the condition.
2. Acquire adequate skills and competence in performing various procedures required in the speciality.

Human values, ethical practice and communication abilities:

- © Adopt ethical principles in all aspects of practice.
- © Professional honesty and integrity are to be fostered.
- © Patient care is to be delivered irrespective of social status, caste, creed or religion of the patient.
- © Develop communication skills, in particular and skill to explain various options available in management and to obtain a true informed consent from the patient
- © Provide leadership and get the best out of his team in a congenial working atmosphere.
- © Apply high moral and ethical standards while carrying out human or animal research.
- © Be humble and accept the limitations in his knowledge and skill and to ask for help from colleagues when needed.
- © Respect patient's rights and privileges including patient's right to information and right to seek a second opinion.

SECTION III

COURSE DESCRIPTION OF VARIOUS SPECIALTIES

1. DEFINITIONS OF VARIOUS SPECIALITIES:

1. Prosthodontics and Crown & Bridge

Prosthodontics and Crown & Bridge and Oral Implantology i.e. that branch of Dental art and science pertaining to the restoration and maintenance of oral function, health, comfort and appearance by the replacement of missing or lost natural teeth and associated tissues either by fixed or removable artificial substitutes.

2. Periodontology

Periodontology and Oral Implantology is the science dealing with the health and diseases of the investing and supporting structures of the teeth and oral mucous membrane.

3. Oral & Maxillofacial Surgery

Oral and Maxillofacial surgery and Implantology deals with the diagnosis and surgical and adjunctive treatment of diseases, injuries and defects of the human jaws and associated oral and facial structures.

4. Conservative Dentistry and Endodontics

Conservative dentistry deals with prevention and treatment of the diseases and injuries of the hard tissues and the pulp of the tooth and associated periapical lesions.

5. Orthodontics and Dentofacial Orthopedics

Deals with prevention and correction of oral anomalies and malocclusion and the harmonizing of the structures involved, so that the dental mechanisms will function in a normal way.

6. Oral Pathology & Microbiology

Oral Pathology deals with the nature of oral diseases, their causes, processes and effects. It relates the clinical manifestation of oral diseases to the physiologic and anatomic changes associated with these diseases.

7. Public Health Dentistry

Community Dentistry is the science and art of preventing and controlling Dental diseases and promoting Dental health through organized community efforts.

8. Paedodontics and Preventive Dentistry

Deals with prevention and treatment of oral and Dental ailments that may occur during childhood.

9. Oral Medicine and Radiology

Oral Medicine is that specialty of dentistry concerned with the basic diagnostic procedures and techniques useful in recognizing the diseases of the oral tissues of local and constitutional origin and their medical management.

Radiology is a science dealing with x-rays and their uses in diagnosis and treatment of diseases in relation to orofacial diseases.

2. Course contents Prosthodontics

Aim:

To train dental graduates so as to ensure higher competence in both general and special area of Prosthodontics and prepare a candidate for teaching, research and clinical abilities including prevention and after care in prosthodontics including crown and bridge and implantology.

General Objectives of the Course:

© Training programme in Prosthodontic dentistry including Crown & Bridge & Implantology is structured to achieve knowledge and skill in theoretical and clinical laboratory, attitude, communicative skills and ability to research with understanding of social, cultural, education and environmental background of the society

© To have acquired adequate knowledge and understanding of applied basic and systematic medical science knowledge in general and particular to head and neck.

© The postgraduates will be able to provide Prosthodontic therapy for patients with competence and working knowledge with understanding of applied medical behavioral and clinical science that are beyond the treatment skills of the general BDS graduate and MDS graduate of other specialities to demonstrate evaluative and judgment skills in making appropriate decisions regarding prevention, treatment aftercare and referral to deliver comprehensive care to patients.

Knowledge

The candidate should possess knowledge applied basic and systematic medical sciences.

© On human anatomy, embryology, histology, applied in general and particular to head and neck, Physiology & Biochemistry, Pathology and microbiology, virology, Health and diseases of various systems of the body (systemic) principles in surgery and medicine, Pharmacology, Nutrition, behavioral Science, Age changes, genetics, Immunology, Congenital defects and syndrome and Anthropology, Bioengineering, Bio-medical and Biological Principle and application Dental material science

© Ability to diagnose and planned treatment for patients requiring a Prosthodontic therapy

© Ability to read and interpret a radiograph and other investigations for the purpose of diagnoses treatment plan

© Tooth and tooth surface restorations, Complete denture prosthodontics, removable partial dentures Prosthodontics, fixed prosthodontics and maxillofacial and Craniofacial Prosthodontics, implants supported Prosthodontics, T.M.J, and occlusion, craniofacial esthetic, and biomaterials. Craniofacial disorders - problems of psychogenic origin.

© Age changes and Prosthodontic Therapy for aged.

© Ability to diagnose failed restoration and provide Prosthodontic therapy and after care.

© Should have essential knowledge on ethics, laws and Jurisprudence and forensic odontology in Prosthodontics

© General health conditions and emergency as related to prosthodontics treatment,

© Identify social, cultural, economic, environmental, educational and emotional determinants of the patient and consider them in planning the treatment.

- © Identify cases, which are outside the area of his speciality/ competence and refer them to appropriate specialists.
- © Advice regarding case management involving surgical, interim treatment etc.
- © Competent specialization in team management of craniofacial design.
- © Should attend continuing education programmes, seminars and conferences related to prosthodontics in thus updating himself.
- © Teach and guide his / her team, colleague and other students.
- © Should be able to use information technology tools and carry out research basic and clinical, with the aims of publishing his/ her work and presenting his work at various scientific forum.
- © Should have essential knowledge of personal hygiene, infection control, prevent of cross infection and safe disposal of waste, keeping in view the risks of transfer of Hepatitis & HIV
- © Should have an ability to plan to establish Prosthodontic clinic/hospital teaching department and practice management
- © Should have a sound knowledge for the application of pharmacology. Effects drugs on oral tissue and systems of a body and for medically compromised

Skills

- © The candidate should be able to examine the patients requiring Prosthodontic therapy, investigate the patient systemically, analyze the investigation results, radiography, diagnose the ailment, plan a treatment, communicate it with the patient and execute it.
- © Understand the prevalence and prevention of diseases of craniomandibular system related to Prosthetic dentistry.
- © The candidate should be able to restore the lost functions of the stomatognathic system namely speech, mastication etc to provide a quality health care for craniofacial region
- © The candidate should be able to interact with other speciality including a medical speciality for a planned team management of patients for a craniofacial and oral acquired and congenital defects, Temporomandibular joint syndromes, esthetics, Implant supported Prosthetics and problems of Psychogenic origin,
- © Should be able to demonstrate the clinical competence necessary to carry out appropriate treatment at higher level of knowledge, training and practice skills currently available in their specialty area.
- © Identify target diseases and awareness amongst the population for Prosthodontic therapy.
- © Perform clinical and Laboratory procedure with understanding of biomaterials, tissue conditions related to prosthesis and have competent dexterity and skill for performing clinical and laboratory procedures in fixed, removable, implant and maxillofacial TMJ, esthetics Prosthodontics.
- © Laboratory technique management based on skills and knowledge of Dental Materials and dental equipment and instruments, management.
- © To understand demographic distribution and target diseases of Cranio mandibular region related to Prosthodontic including crown & bridge and implantology.

Attitudes

© Adopt ethical principles in all Prosthodontic practice. Professional honesty and integrity are to be fostered. Treatment to be delivered irrespective of social status, caste, creed or religion of patient.

© Willing to share the knowledge and clinical experience with professional colleagues.

© Willing to adopt new methods and techniques in prosthodontics from time to time based on scientific research, which is in patient's best interest.

© Respect patient's rights and privileges including patients right to information and right to seek second opinion.

Communication Abilities

© Develop communication skills, in particular, to explain treatment option available in management.

© Provide leadership and get the best out of his group in a congenial working atmosphere.

© Should be able to communicate in simple understandable language with the patient and explain the principles of prosthodontics to the patient. He should be able to guide and counsel the patient with regard to various treatment modalities available.

© Develop the ability to communicate with professional colleagues through various media like Internet, e-mail, videoconference, and etc. to render the best possible treatment.

Course Contents

© The candidates shall undergo training for 3 academic years with satisfactory attendance of 80% for each year.

© The course includes epidemiology and demographic studies, research and teaching skills.

© Ability to prevent, diagnose and treat with after care for all patients for control of diseases and / or treatment related syndromes with patient satisfaction for restoring functions of Stomatognathic system by Prosthodontic therapy

The program outline addresses the knowledge, procedural and operative skills needed in Masters Degree in Prosthodontics. A minimum of 3 years of formal training through a graded system of education as specified will enable the trainee to achieve Masters Degree in Prosthodontics including Crown & Bridge and Implantology, competently and have the necessary skills/ knowledge to update themselves with advancements in the field. The course content has been identified and categorized as Essential knowledge as given below.

Essential Knowledge

The topics to be considered are: Basic Sciences, Biological and mechanical considerations in Prosthodontics including Crown and Bridge Implantology and Material Science.

APPLIED BASIC SCIENCES

© Although knowledge on the applied aspects of Anatomy, Embryology, Histology and applied in general and particular to head and neck, Physiology, Biochemistry, Pathology and Microbiology, Virology.

© Pharmacology, Health and diseases of various systems of Body (systemic) principles in surgery medicine and Anesthesia, Nutrition, Behavioral sciences, age changes, genetics, Dental Material Science, congenital defects and Syndromes and Anthropology,

Biomaterial Sciences Bio-engineering and Biomedical and Research Methodology as related to Masters degree prosthodontics including crown & bridge and implantology.

It is desirable to have adequate knowledge in Bio-statistics Research Methodology and use of computers. To develop necessary teaching skills in Prosthodontics including crown and bridge and implantology

Applied anatomy of Head and Neck

General Human Anatomy - Gross Anatomy, anatomy of Head & Neck in detail. Cranial and facial bones, TMJ and function, muscles of mastication and facial expression, muscles of neck and chain of back muscles including muscles of deglutition and tongue, arterial supply and venous drainage of the head and neck, anatomy of the Para nasal sinuses with relation**

to the Vth cranial nerve. General consideration of the structure and function of the brain, ^considerations of V, VII, XI, XII, cranial nerves and autonomic nervous system of the head and neck. The salivary glands, Pharynx, Larynx Trachea, Esophagus, Functional Anatomy mastication, Deglutition, speech, respiration, and circulation, teeth eruption, morphology, elusion and function. Anatomy of TMJ, its movements and myofacial pain dysfunction syndrome.

Embryology- Development of the face, tongue, jaws, TMJ, Paranasal sinuses, pharynx, larynx, trachea, esophagus, Salivary glands, Development of oral and Para oral tissue including detailed aspects of tooth and dental hard tissue formation

Growth & Development - Facial form and Facial growth and development overview of Dentofacial growth process and physiology from fetal period to maturity and old age, comprehensive study of craniofacial biology. General physical growth, functional and anatomical aspects of the head, changes in craniofacial skeletal, relationship between . development of the dentition and facial growth.

Dental Anatomy - Anatomy of primary and secondary dentition, concept of occlusion, mechanism of articulation, and masticatory function. Detailed structural and functional study of the oral dental and Para oral tissues. Normal occlusion, development of occlusion in deciduous mixed and permanent dentitions, root length, root configuration, tooth-numbering system.

Histology - histology of enamel, dentin, Cementum, periodontal ligament and alveolar bone, pulp anatomy, histology and biological consideration. Salivary glands and Histology of epithelial tissues including glands.

Histology of general and specific connective tissue including bone, hematopoietic system, lymphoid etc.

Muscle and neural tissues Endocrinal system including thyroid Salivary glands

Histology of skin, oral mucosa, respiratory mucosa, connective tissue, bone, cartilage, cellular elements of blood vessels, blood, lymphatic, nerves, muscles, tongue, tooth and its surrounding structures.

Anthropology & Evolution - Comparative study of tooth, joints, jaws, muscles of mastication and facial expression, tongue, palate, facial profile and facial skeletal system. Comparative anatomy of skull, bone, brain, musculo - skeletal system, neuromuscular coordination, posture and gait - plantigrade and orthograde posture.

Applied Genetics and Heredity - Principles of orofacial genetics, molecular basis of genetics, genetic risks, counseling, bioethics and relationship to Orthodontic management. Dentofacial anomalies, Anatomical, psychological and pathological characteristic of major groups of developmental defects of the orofacial structures

cell biology - Detailed study of the structure and function of the mammalian cell with special emphasis on ultra structural features and molecular aspects. Detailed consideration of Intercellular junctions. Cell cycle and division, cell-to-cell and cell-extra cellular matrix interactions.

Applied Physiology and Nutrition - Introduction, Mastication, deglutition, digestion and assimilation, Homeostasis, fluid and electrolyte balance. Blood composition, volume, function, blood groups and hemorrhage, Blood transfusion, circulation, Heart, Pulse, Blood pressure, capillary and lymphatic circulation, shock, respiration, control, anoxia, hypoxia, asphyxia, artificial respiration. Endocrine glands in particular reference to pituitary, parathyroid and thyroid glands and sex hormones. Role of calcium and Vit D in growth and development of teeth, bone and jaws. Role of Vit. A, C and B complex in oral mucosal and periodontal health. Physiology and function of the masticatory system. Speech mechanism, mastication, swallowing and deglutition mechanism, salivary glands and Saliva

Endocrines- General principles of endocrine activity and disorders relating to pituitary, thyroid, pancreas, parathyroid, adrenals, gonads, including pregnancy and lactation. Physiology of saliva, urine formation, normal and abnormal constituents, Physiology of pain, Sympathetic and parasympathetic nervous system. Neuromuscular co-ordination of the stomatognathic system.

Applied Pharmacology and Therapeutics- Definition of terminologies used - Dosage and mode of administration of drugs. Action and fate of drugs in the body, Drug addiction, tolerance and hypersensitive reactions, Drugs acting on the central nervous system, general anesthetics hypnotics. Analeptics and tranquilizers, Local anesthetics, Chemotherapeutics and antibiotics, Antitubercular and anti syphilitic drugs, Analgesics and antipyretics, Antiseptics, styptics, Sialogogues and antisialogogues, Haematinics, Cortisone, ACTH, insulin and other antidiabetics vitamins: A, D, B - complex group C and K etc. Chemotherapy and Radiotherapy

Applied Pathology - Inflammation, repair and degeneration, Necrosis and gangrene, Circulatory disturbances, Ischemia, hyperemia, chronic venous congestion, edema, thrombosis, embolism and infarction. Infection and infective granulomas, Allergy and hypersensitive reaction, Neoplasm; Classification of tumors, Carcinogenesis, characteristics of benign and malignant tumors, spread of tumors. Applied histopathology and clinical pathology.

Applied Microbiology- Immunity, knowledge of organisms commonly associated with diseases of the oral cavity (morphology cultural characteristics etc) of strepto, staphylo, pneumo, gono and meningococci, Clostridia group of organisms, Spirochetes, organisms of tuberculosis, leprosy, diphtheria, actinomycosis and moniliasis etc. Virology, Cross infection control, sterilization and hospital waste management

a) Applied Oral Pathology -Developmental disturbances of oral and Para oral structures, Regressive changes of teeth, Bacterial, viral and mycotic infections of oral cavity, Dental caries, diseases of pulp and periapical tissues, Physical and chemical injuries of the oral cavity, oral manifestations of metabolic and endocrine disturbances, Diseases of the blood and blood forming organism in relation to the oral cavity, Periodontal diseases, Diseases of the skin, nerves and muscles in relation to the Oral cavity.

b) Laboratory determinations- Blood groups, blood matching, R.B.C. and W.B.C. count, Bleeding and clotting time, Smears and cultures - urine analysis and culture

BioStatistics- Study of Biostatistics as applied to dentistry and research. Definition, aim characteristics and limitations of statistics, planning of statistical experiments, sampling,

collection, classification and presentation of data (Tables, graphs, pictograms etc)
Analysis of data

Introduction to biostatistics- Scope and need for statistical application to biological data. Definition of selected terms - scale of measurements related to statistics, Methods of collecting data, presentation of the statistical diagrams and graphs.

Frequency curves, mean, mode of median, Standard deviation and co-efficient of variation, Correlation - Co-efficient and its significance, Binominal distributions normal distribution and Poisson distribution, Tests of significance

Research methodology - Understanding and evaluating dental research, scientific method and the behavior of scientists, understanding to logic - inductive logic - analogy, models, authority, hypothesis and causation, Quacks, Cranks, Abuses of Logic, Measurement and Errors of measurement, presentation of results, Reliability, Sensitivity and specificity diagnosis test and measurement, Research Strategies, Observation, Correlation, Experimentation and Experimental design. Logic of statistical interference balance judgements, judgement under uncertainty, clinical vs., scientific judgement, problem with clinical judgement, forming scientific judgements, the problem of contradictory evidence, citation analysis as a Means of literature evaluation, influencing judgement: Lower forms of Rhetorical life, Denigration, Terminal, Inexactitude.

Applied Radiology- Introduction, radiation, background of radiation, sources, radiation biology, somatic damage, genetic damage, protection from primary and secondary radiation, Principles of X-ray production, Applied principles of radio therapy and after care.

Roentgenographs Techniques- Intra oral: Extra oral roentgenography, Methods of localization digital radiology and ultra sound, Normal anatomical landmarks of teeth and jaws in radiograms, temporomandibular joint radiograms, neck radiograms.

Applied medicine- Systemic diseases and its influence on general health and oral and&fenta! health. Medical emergencies in the dental offices - Prevention, preparation, medico legal consideration, unconsciousness, respiratory distress, altered consciousness, seizures, drug related emergencies, chest pain, cardiac arrest, premedication, and management of ambulatory patients, resuscitation, applied psychiatry, child, adult and senior citizens. Assessment of case, premaliation, inhibition, monitoring, extubalin, complication assist in O.T. for anesthesia.

Applied surgery & Anesthesia- General principles of surgery, wound healing, incision wound care, hospital care, control of hemorrhage, electrolyte balance. Common bandages, sutures, splints, shifting of critically ill patients, prophylactic therapy, bone surgeries, grafts, etc, surgical techniques, nursing assistance, anesthetic assistance.

Principles in speech therapy, surgical and radiological craniofacial oncology, applied surgical ENT and ophthalmology.

Plastic surgery - Applied understanding and assistance in programmes of plastic surgery for prosthodontics therapy.

Applied Dental Material

© All materials used for treatment of craniofacial disorders - Clinical, treatment, and laboratory materials, Associated materials, Technical consideration, shelf life, storage, manipulations, sterilization, and waste management.

© Students shall be trained and practiced for all clinical procedures with an advanced knowledge of theory of principles, concepts and techniques of various honorably accepted methods and materials for Prosthodontics, treatment modalities includes honorable accepted methods of diagnosis, treatment plan, records maintenance, and treatment and laboratory procedures and after care and preventive.

© Understanding all applied aspects for achieving physical, psychological well being of the patients for control of diseases and / or treatment related syndromes with the patient satisfaction and restoring function of Cranio mandibular system for a quality life of a patient

© The theoretical knowledge and clinical practice shall include principles involved for support, retention, stability, esthetics, phonation, mastication, occlusion, behavioral, psychological, preventive and social aspects of science of Prosthodontics including Crown & Bridge and Implantology

© Theoretical knowledge and clinical practice shall include knowledge for laboratory practice and material science. Students shall acquire knowledge and practice of history taking, systemic and oro and Craniofacial region and diagnosis and treatment plan and prognosis record maintaining. A comprehensive rehabilitation concept with pre prosthetic treatment plan including surgical Reevaluation and prosthodontic treatment plan, impressions, jaw relations, utility of face bow and articulators, selection and positioning of teeth for retention, stability, esthetics, phonation and psychological comfort. Fit and insertion and instruction for patients after care and preventive Prosthodontics, management of failed restorations.

© TMJ syndromes, occlusion rehabilitation and craniofacial esthetics. State of the art clinical methods and materials for implants supported extra oral and intra oral prosthesis.

© Student shall acquire knowledge of testing biological, mechanical and other physical property of all material used for the clinical and laboratory procedures in prosthodontic therapy.

© Students shall acquire full knowledge and practice Equipments, instruments, materials, and laboratory procedures at a higher competence with accepted methods.

© All clinical practice shall involve personal and social obligation of cross infection control, sterilization and waste management.

I. REMOVABLE PROSTHODONTICS AND IMPLANTS

a. Prosthodontic treatment for completely edentulous patients - Complete denture, immediate complete denture, single complete denture, tooth supported complete denture, Implant supported Prosthesis for completely edentulous

b. Prosthodontic treatment for partially edentulous patients: - Clasp-retained partial dentures, intra coronal and extra coronal precision attachments retained partial dentures, maxillofacial prosthesis.

Prosthodontic treatment for edentulous patients: -Complete Dentures and Implant supported Prosthesis for Edentulous in both the arches

Complete Denture Prosthesis - Definitions, terminology, G.P.T., Boucher's clinical dental terminology

Scope of Prosthodontics - the Cranio Mandibular system and its functions, the reasons for loss of teeth and methods of restorations,

Infection control, cross infection barrier - clinical and laboratory and hospital and lab waste management

a) Edentulous Predicament, Biomechanics of the edentulous state, Support mechanism for the natural dentition and complete dentures, Biological considerations, Functional and Para functional considerations, Esthetic, behavioral and adaptive responses, Temporomandibular joints changes.

b) Effects of aging of edentulous patients - aging population, distribution and edentulism in old age, impact of age on edentulous mouth - Mucosa, Bone, saliva, jaw movements in old age, taste and smell, nutrition, aging, skin and teeth, concern for personal appearance in old age

c) Sequelae caused by wearing complete denture - the denture in the oral environment - Mucosal reactions, altered taste perception, burning mouth syndrome, gagging, residual ridge reduction, denture stomatitis, flabby ridge, denture irritation hyperplasia, traumatic Ulcers, Oral cancer in denture wearers, nutritional deficiencies, masticatory ability and performance, nutritional status and masticatory functions.

d) Temporomandibular disorders in edentulous patients - Epidemiology, etiology and management, Pharmacotherapy, Physical modalities, and Bio-behavioral modalities

e) Nutrition Care for the denture wearing patient - Impact of dental status of food intake, Gastrointestinal functions, nutritional needs and status of older adults, Calcium and bone health, vitamin and herbal supplementation, dietary counseling and risk factor for malnutrition in patients with dentures and when teeth are extracted.

f) Preparing patient for complete denture patients - Diagnosis and treatment planning for edentulous and partially edentulous patients - familiarity with patients, principles of perception, health questionnaires and identification data, problem identification, prognosis and treatment identification data, problem identification, prognosis and treatment planning - contributing history - patient's history, social information, medical status - systemic status with special reference to debilitating diseases, diseases of the joint, cardiovascular, disease of the skin, neurological disorders, oral malignancies, climacteric, use of drugs, mental health - mental attitude, psychological changes, adaptability, geriatric changes - physiologic, pathological, pathological and intra oral changes. Intra oral health - mucose membrane, alveolar ridges, palate and vestibular sulcus and dental health.

Data collection and recording, visual observation, radiography, palpation, measurement - sulci or fossae, extra oral measurement is the vertical dimension of occlusion, diagnostic casts.

Specific observations - existing dentures, soft tissue health, hard tissue health - teeth, bone.

Biomechanical considerations - jaw relations, border tissues, saliva, muscular development - muscle tones, neuromuscular co-ordination, tongue, cheek and lips.

Interpreting diagnostic findings and treatment planning

g) Pre prosthetic surgery - Improving the patients denture bearing areas and " relations: - non surgical methods - rest for the denture supporting tissues, 0m! correction of the old prosthesis, good nutrition, conditioning of the patients musculature, surgical methods - Correction of conditions, that preclude optimal prosthetic function - hyperplastic ridge - epulis fissuratum and papillomatosis, frenular attachments and pendulous maxillary tuberosities, ridge augmentation, maxillary and Mandibular oral implants, corrections of congenital deformities, discrepancies in jaw size, relief of pressure on the mental foramen, enlargement of denture bearing areas, vestibuloplasty, ridge augmentation, replacement of tooth roots with Osseo integrated denture implants.

h) Immediate Denture - Advantages, disadvantages, contra indication, diagnosis treatment plan and prognosis, Explanation to the patient, Oral examinations, examination of existing prosthesis, tooth modification, prognosis, referrals / adjunctive care, oral prophylaxis and other treatment needs.

First extraction / surgical visit, preliminary impressions and diagnostic casts, management of loose teeth, custom trays, final impressions and final casts two tray or sectional custom impression tray, location of posterior limit and jaw relation records,

setting the denture teeth / verifying jaw relations and the patient try in, laboratory phase, setting of anterior teeth, Wax contouring, flasking and boil out, processing and finishing, surgical templates, surgery and immediate denture insertion, post operative care and patient instructions, subsequent service for the patient on the immediate denture, over denture tooth attachments, implants or implant attachments.

i) Over dentures (tooth supported complete dentures) - indications and treatment planning, advantages and disadvantages, selection of abutment teeth, lose of abutment teeth, tooth supported complete dentures. Non-coping abutments, abutment with copings, abutments with attachments, submerged vital roots, preparations of the retained teeth.

j) Single Dentures: Single Mandibular denture to oppose natural maxillary teeth, single complete maxillary denture to oppose natural Mandibular teeth to oppose a partially edentulous Mandibular arch with fixed prosthesis, partially edentulous Mandibular arch with removable partial dentures. Opposing existing complete dentures, preservation of the residual alveolar ridge, necessity for retaining maxillary teeth and mental trauma.

k) Art of communication in the management of the edentulous predicament - Communication - scope, a model of communication, why communication . important, what are the elements of effective communications, special significance of doctor / patient communication, doctor behavior, The iatrosedative (doctor & act of making calm) recognizing and acknowledging the problem, exploring and identifying the problem, interpreting and explaining the problem, offering a solution to the problem for mobilize their resources to operate most efficient way, recognizing and acknowledging the problem, interpreting and explaining the problem, offering a solution to the problem.

l) Materials prescribed in the management of edentulous patients - Denture base materials, General requirements of biomaterials for edentulous patients, requirement of an ideal denture base, chemical composition of denture base resins, materials used in the fabrication of prosthetic denture teeth, requirement of prosthetic denture teeth, denture lining materials and tissue conditioners, cast metal alloys as denture, bases - base metal alloys.

m) Articulators - Classification, selection, limitations, precision, accuracy and sensitivity, and Functional activities of the lower member of the articulator and uses,

n) Fabrications of complete dentures - complete denture impressions - muscles of facial expressions and anatomical landmarks, support, retention, stability, aims and objectives - preservation, support, stability, aesthetics, and retention. Impression materials and techniques - need of 2 impressions the preliminary impression and final impression.

Developing an analogue / substitute for the maxillary denture bearing area -anatomy of supporting structures - mucous membrane, hard palate, residual ridge, shape of the supporting structure and factors that influence the form and size of the supporting bones, incisive foramen, maxillary tuberosity, sharp spiny process, torus palatinus, Anatomy of peripheral or limiting structures, labial vestibule, Buccal vestibule, vibrating line, preliminary and final impressions, impression making, custom tray and refining the custom tray, preparing the tray to secure the final impression, making the final impression, boxing impression and making the casts

Developing an analogue / substitute for the Mandibular denture bearing area-Mandible - anatomy of supporting structure, crest of the residual ridge, the Buccal shelf, shape of supporting structure, mylohyoid ridge, mental foramen, genial tubercles, torus mandibularis, Anatomy of peripheral or limiting structure - labial vestibule, Buccal vestibule, lingual border, mylohyoid muscle, retromylohyoid fossa, sublingual gland region, alveolingual sulcus, Mandibular

impressions - preliminary impressions, custom tray, refining, preparing the tray\, final impressions.

o) Mandibular movements, Maxillo mandibular relation and concepts of occlusion - Gnathology, identification of shape and location of arch form - Mandibular and maxillary, occlusion rim, level of occlusal plane and recording of trial denture base, tests to determine vertical dimension of occlusion, interocclusal, centric relation records, Biological and clinical considerations in making jaw relation records and transferring records from the patients to the articulator, Recording of Mandibular movements - influence of opposing tooth contacts, Temporomandibular joint, muscular involvements, neuromuscular regulation of Mandibular motion, the envelope of motion, rest position, Maxillo - Mandibular relations - the centric, eccentric, physiologic rest position, vertical dimension, occlusion, recording methods - mechanical, physiological, Determining the horizontal jaw relation - Functional graphics, tactile or interocclusal check record

method, Orientation / sagittal relation records, Arbitrary / Hinge axis and face bow record, significance and requirement, principles and biological considerations and securing on articulators.

p) Selecting and arranging artificial teeth and occlusion for the edentulous patient - anterior tooth selection, posterior tooth selection, and principles in arrangement of teeth, and factors governing position of teeth - horizontal, vertical. The inclinations and arrangement of teeth for aesthetics, phonetics and mechanics -to concept of occlusion.

q) The Try in - verifying vertical dimension, centric relation, establishment of posterior palatal seal, creating a facial and functional harmony with anterior teeth, harmony of spaces of individual teeth position, harmony with sex, personality and age of the patient, co-relating aesthetics and incisal guidance.

r) Speech considerations with complete dentures - speech production - structural and functional demands, neuropsychological background, speech production and the roll of teeth and other oral structures - bilabial sounds, labiodentals sounds, linguodental sounds, linguoalveolar sound, articulatoric characteristics, acoustic characteristics, auditory characteristics, linguopalatal and linguoalveolar sounds, speech analysis and prosthetic considerations.

s) Waxing contouring and processing the dentures their fit and insertion and after care - laboratory procedure - wax contouring, flasking and processing, laboratory remount procedures and selective, finishing and polishing. Critiquing the finished prosthesis - doctors evaluation, patients evaluation, friends evaluation, elimination of basal surface errors, errors in occlusion, interocclusal records for remounting procedures - verifying centric relation, eliminating occlusal errors, special instructions to the patient - appearance with new denture, mastication with new dentures, speaking with new dentures, speaking with new dentures, oral hygiene with dentures, preserving of residual ridges and educational material for patients, maintaining the comfort and health of the oral cavity in the rehabilitated edentulous patients. Twenty-four hours oral examination and treatment and preventive Prosthodontic - periodontic recall for oral examination 3 to 4 months intervals and yearly intervals.

t) Implant supported Prosthesis for partially edentulous patients - Science of Osseo integration, clinical protocol for treatment with implant supported over dentures, managing problems and complications, implant Prosthodontics for edentulous patients: current and future directions.

u) Implant supported prosthesis for partially edentulous patients - Clinical and laboratory protocol: Implant supported prosthesis, managing problems and implications.

© Introduction and Historical Review

© Biological, clinical and surgical aspects of oral implants

- © Diagnosis and treatment planning
- © Radiological interpretation for selection of fixtures
- © Radiological interpretation for selection of fixtures
- © Splints for guidance for surgical placement of fixtures
- © Intra oral plastic surgery © Guided bone and Tissue generation consideration for implants fixture.
- © Implants supported prosthesis for complete edentulism and partial edentulism
- © Occlusion for implants support prosthesis.
- © Peri-implant tissue and Management
- © Peri-implant and management
- © Maintenance and after care
- © Management of failed restoration.
- © Work authorization for implant supported prosthesis - definitive instructions, legal aspects, delineation of responsibility.

Prosthodontic treatment for partially edentulous patients - Removable partial Prosthodontics -

a. Scope, definition and terminology, Classification of partially edentulous arches - requirements of an acceptable methods of classification, Kennedy's classification, Applegate's rules for applying the Kennedy classification.

b. Components of RPD - major connector - mandibular and maxillary, minor connectors, design, functions, form and location of major and minor connectors, tissue stops, finishing lines, reaction of tissue to metallic coverage

Rest and rest seats - from of the Occlusal rest and rest seat, interproximal Occlusal rest seats, internal Occlusal rests, possible movements of partial dentures, support for rests, lingual rests on canines and incisor teeth, incisal rest and rest seat.

Direct retainer- Internal attachment, extracoronal direct retainer, relative uniformity of retention, flexibility of clasp arms, stabilizing - reciprocal clasp are, criteria for selecting a given clasp design, the basic principles of clasp design, circumferential clasp, bar clasp, combination clasp and other type of retainers.

Indirect Retainer - denture rotation about an axis, factors influencing effectiveness of indirect retainers, forms of indirect retainers, auxiliary Occlusal rest, canine extensions from Occlusal rests, canine rests, continuous bar retainers and linguoplates, modification areas, rugae support, direct - indirect retention.

Principles of removable partial Denture design - bio mechanic considerations, and the factors Influence after mouth preparations - Occlusal relationship of remaining ^T1eeth, orientation of Occlusal plane, available space for restoration, arch integrity, tooth morphology, response of oral structure to previous stress, periodontal conditions, abutment support, tooth supported and tooth and tissue supported, need for indirect retention, clasp design, need for rebasing, secondary impression, need for abutment tooth modification, type of major connector, type of teeth selection, patients past 'experience, method of replacing single teeth or missing anterior teeth.

Difference between tooth supported and tissue supported partial dentures, essential of partial denture design, components of partial denture design, tooth support, ridge

support, stabilizing components, guiding planes, use of splint bar for denture support, internal clip attachments, overlay abutment as support for a denture base, use of a component partial to gain support.

- c. Education of patient
- d. Diagnosis and treatment planning
- e. Design, treatment sequencing and mouth preparation
- f. Surveying - Description of dental surveyor, purposes of surveyor procedure of survey,

Aims and objectives in surveying of diagnostic cast and master cast, Final path of placement, factors that determine path of placement and removal, Recording relation of cast to surveyor, measuring retention, Blocking of master cast - paralleled blockout, shaped blockout, arbitrary blockout and relief.

g. Diagnosis and treatment planning - Infection control and cross infection barriers -clinical and laboratory and hospital and lab waste management, Objectives of prosthodontic treatment, Records, systemic evaluation, Oral examination, preparation of diagnostic cast, interpretation of examination data, radiographic interpretation, periodontal considerations, caries activity, prospective surgical preparation, endodontic treatment, analysis of occlusal factors, fixed restorations, orthodontic treatment, need for determining the design of components, impression procedures and occlusion, need for reshaping remaining teeth, reduction of unfavorable tooth contours, differential diagnosis: fixed or removable partial dentures, choice between complete denture and removable partial dentures, choice of materials

h. Preparation of Mouth for removable partial dentures - Oral surgical preparation, conditioning of abused and irritated tissues, periodontal preparation - objectives of periodontal therapy, periodontal diagnosis, control therapy, periodontal surgery.

i. Preparation of Abutment teeth - Classification of abutment teeth, sequence of abutment preparations on sound enamel or existing restorations, conservative restoration using crowns, splinting abutment teeth, utilization, temporary crowns to be used as abutment.

j. Impression Materials and Procedures for Removable Partial Dentures - Rigid materials, thermoplastic materials, Elastic materials, Impressions of the partially edentulous arch, Tooth supported, tooth tissue supported, Individual impression trays.

k. Support for the Distal Extension Denture Base - Distal extension removable partial denture, Factors influencing the support of distal extension base, Methods for obtaining functional support for the distal extension base.

l. Laboratory Procedures - Duplicating a stone case, Waxing the partial denture frame work, Anatomic replica patterns, Spruing, investing, burnout, casting and finishing of the partial denture framework, making record bases, occlusion rims, making a stone occlusal template from a functional occlusal record, arranging posterior teeth to an opposing cast or template, types of anterior teeth, waxing and investing tinW partial denture before processing acrylic resin bases, processing the denture, remounting and occlusal correction to an occlusal template, polishing the denture.

m. Initial placement, adjustment and servicing of the removable partial denture - adjustments to bearing surfaces of denture framework, adjustment of occlusion in harmony with natural and artificial dentition, instructions to the patient, follow - up services

n. Relining and Rebasing the removable partial denture - Relining tooth supported dentures bases, relining distal extension denture bases, methods of reestablishing occlusion on a relined partial denture.

o. Repairs and additions to removable partial dentures - Broken clasp arms, fractured occlusal rests, distortion or breakage of other components - major and minor connectors, loss of a tooth or teeth not involved in the support or retention of the restoration, loss of an abutment tooth necessitating its replacement and making a new direct retainer, Other types of repairs, Repair by soldering.

p. Removable partial denture considerations in maxillofacial prosthetics - Maxillofacial prosthetics, intra oral prosthesis, design considerations, maxillary prosthesis. Obturators, speech aids, palatal lifts, palatal augmentations, mandibular prosthesis, treatment planning, framework design, class I resection, Class II resection, mandibular flange prosthesis, jaw relation record

q. Management of failed restorations, work authorization.

II. MAXILLOFACIAL REHABILITATION:

Scope, terminology, definitions, cross infection control and hospital waste management, work authorization.

Behavioral and psychological issues in Head and neck cancer, Psychodynamic interactions - clinician and patient - Cancer Chemotherapy: Oral Manifestations, Complications, and management, Radiation therapy of head and neck tumors: Oral effects, Dental manifestations and dental treatment: Etiology, treatment and rehabilitation (restoration)- Acquired defect of the mandible, acquired defects of hard palate, soft palate, clinical management of edentulous and partially edentulous maxillectomy patients, Facial defects, Restoration of speech, Velopharyngeal function, cleft lip and palate, cranial implants, maxillofacial trauma, Lip and cheek support prosthesis, Laryngectomy aids, Obstructive sleep apnoea, Tongue prosthesis, Esophageal prosthesis, Vaginal radiation carrier, Burn stents, Nasal stents, Auditory inserts, trismus appliances, mouth controlled devices for assisting the handicapped, custom prosthesis for lagophthalmos of the eye. Osseo integrated supported facial and maxillofacial prosthesis. Resin bonding for maxillofacial prosthesis, Implant rehabilitation of the mandible compromise by radiotherapy, Craniofacial Osseo integration, Prosthodontic treatment, Material and laboratory procedures for maxillofacial prosthesis.

III. OCCLUSION

Evaluation, Diagnosis and Treatment of Occlusal Problems

Scope, definition, terminology, optimum oral health, anatomic harmony, functional harmony, occlusal stability, causes of deterioration of dental and oral health, Anatomical, physiological, neuro - muscular, psychological, considerations of teeth, muscles of mastication, temporomandibular joint, intra oral and extra oral and facial musculatures, the functions of Cranio mandibular system.

Occlusal therapy, the stomatognathic system, centric relation, vertical dimension, the neutral zone, the occlusal plane, differential diagnosis of temporomandibular disorders, understanding and diagnosing intra articular problems, relating treatment to diagnosis of internal derangements of TMJ, Occlusal splints, Selecting instruments for occlusal diagnosis and treatment, mounting casts, Pankey-mann-schuyler philosophy of complete occlusal rehabilitation, long centric, anterior guidance, restoring lower anterior teeth, restoring upper anterior teeth, determining the type of posterior occlusal contours, methods for determining the plane of occlusion, restoring lower posterior teeth, restoring upper posterior teeth, functionally generated path techniques fro

recording border movements intra orally, occlusal equilibration, Bruxism, Procedural steps in restoring occlusions, requirements for occlusal stability, solving occlusal problems through programmed treatment planning, splinting, solving - occlusal wear problems, deep overbite problems, anterior overjet problems, anterior open bite problems. Treating - end to end occlusion, splayed anterior teeth, cross bite patient, Crowded, irregular, or interlocking anterior bite, using Cephalometric for occlusal analysis, solving severe arch malrelationship problems, transcranial radiography, postoperative care of occlusal therapy.

IV. FIXED PROSTHODONTICS

Scope, definitions and terminology, classification and principles, design, mechanical and biological considerations of components - Retainers, connectors, pontics, work authorization.

© **Diagnosis and treatment planning** - patients history and interview, patients desires and expectations and needs, systemic and emotional health, clinical examinations -head and neck, oral - teeth, occlusal and periodontal, Preparation of diagnostic cast, radiographic interpretation, Aesthetics, endodontics considerations, abutment selection - bone support, root proximities and inclinations, selections of abutments, for cantilever, pier abutments, splinting, available tooth structures and crown morphology, TMJ and muscles mastication and comprehensive planning and prognosis.

© **Management of carious teeth** - caries in aged, caries control, removing infected carious materials, protection of pulp, reconstruction measure for compromising teeth - retentive pins, horizontal slots, retention grooves, prevention of caries, diet, prevention of root caries and vaccine for caries.

© **Periodontal considerations** - attachment units, ligaments, gingivitis, periodont[^]l
Microbiological aspect of periodontal diseases, marginal lesion, occlusal trauma, periodontal pockets attached gingiva, interdental papilla, gingival embrasures, radiographic interpretations of Periodontia, intraoral plastics, periodontal splinting -Fixed prosthodontics with periodontially compromised dentitions, placement of margin restorations.

© **Biomechanical principle of tooth preparations** - individual tooth preparations -
Complete metal Crowns - P.F.C., All porcelain - Cerestore crowns, dicor crowns, incerem etc. porcelain jacket crowns partial 3/4, half and half, ridiculer, telescopic, telescopic, pin - hole, pin - ledge, laminates, inlays, onlays and preparations for restoration of teeth - amalgam, glass lonomer and composite resins, Resin Bond retainer, Gingival marginal preparations - Design, material selection, and biological and mechanical considerations - intracoronal retainer and precision attachments -custom made and ready made

© **Isolation and fluid control** - Rubber dam applications, tissue dilation - soft tissue management for cast restoration, impression materials and techniques, provisional restoration, interocclusal records, laboratory support for fixed Prosthodontics' Occlusion, Occlusal equilibration, articulators, recording and transferring of occlusal relations, cementing of restoration.

© **Resins, Gold and gold alloys, glass lonomer, restorations.**

© **Restorations of endodontically treated teeth, Stomatognathic Dysfunction and managements**

© **Management of failed restorations**

© **Osseo integrated supported fixed Prosthodontics** - Osseo integrated supported and tooth supported fixed Prosthodontics

V. TMJ - Temporomandibular joint dysfunction - Scope, definitions, and terminology

Temporomandibular joint and its function, Orofacial pain, and pain from the temporomandibular joint region, temporomandibular joint dysfunction, temporomandibular joint sounds, temporomandibular joint disorders

Anatomy related, trauma, disc displacement, Osteoarthritis/Osteoarthritis, Hyper mobility and dislocation, infectious arthritis, inflammatory diseases, Eagle's syndrome (Styloid -stylohyoid syndrome), Synovial chondromatosis, Osteochondritis disease, Osteonecrosis, Nerve entrapment process, Growth changes, Tumors, Radiographic imaging

© Etiology, diagnosis and cranio mandibular pain, differential diagnosis and management, orofacial pain - pain from teeth, pulp, dentin, muscle pain, TMJ pain - psycho logic, physiologic - endogenous control, acupuncture analgesia, Placebo effects on analgesia, Trigeminal neuralgia, Temporal arteritis

© Occlusal splint therapy - construction and fitting of occlusal splints, management of occlusal splints, therapeutic effects of occlusal splints, occlusal splints and general muscles performance, TMJ joint uploading and anterior repositioning appliances, use and care of occlusal splints.

© Occlusal adjustment procedures - Reversible - occlusal stabilization splints and physical therapies, jaw exercises, jaw manipulation and other physiotherapy or irreversible therapy - occlusal repositioning appliances, orthodontic treatment, Orthognathic surgery, fixed and removable prosthodontic treatment and occlusal adjustment, removable prosthodontic treatment and occlusal adjustment, Indication for occlusal adjustment, special nature of orofacial pain, Indication for occlusal adjustment, special nature of orofacial pain, Psychopathological considerations, occlusal adjustment philosophies, mandibular position, excursive guidance,, occlusal contact scheme, goals of occlusal adjustment, significance of a slide in centric, Preclinical procedures, clinical procedures for occlusal adjustment.

VI. AESTHETIC

Scope, definitions -

Morpho psychology and esthetics, structural esthetic rules - facial components, dental components, gingival components physical components. Esthetics and its relationship to function - Crown morphology, physiology of occlusion, mastication, occlusal loading and clinical aspect in bio esthetic aspects, Physical and physiologic characteristic and muscular activities of facial muscle, perioral anatomy and muscle retaining exercises Smile - classification and smile components, smile design, esthetic restoration of smile, Esthetic management of the dentogingival unit, intraoral plastic for management of gingival contours, and ridge contours, Periodontal esthetics, Restorations - Tooth colored restorative materials, the clinical and laboratory aspects, marginal fit anatomy, inclinations, form, size, shape, color, embrasures, contact point.

Teaching and learning activities:

All the candidates registered for MDS course shall pursue the course for a period of three years as full - time students. During this period each student shall take part actively in learning and teaching activities designed by the Institution/ University. The following teaching and learning activities in each speciality.

Prosthodontic treatment should be practiced by developing skills by teaching various and more number of patients to establish skill for diagnose and treatment and aftercare with bio-mechanical, biological, bio-esthetics, Bio-phonetics and all treatment should be carried out in more number for developing clinical skill

1. **Lectures:** There shall be didactic lectures both in the speciality and in the allied fields. The postgraduate departments should encourage the guest lectures in the required areas to strengthen the training programmes. It is also desirable to have certain integrated lectures by multidisciplinary teams on selected topics
2. **Journal club:** The journal review meetings shall be held at least once a week. All trainees are expected to participate actively and enter relevant details in logbook. The trainee should make presentations from the allotted journal of selected articles at least 5 times in a year.
3. **Seminars:** The seminars shall be held at least twice a week in the department, all trainees associated with postgraduate teachers are expected to participate actively and enter relevant details in logbook. Each trainee shall make at least 5-seminar presentation in each year.
4. **Symposium:** It is recommended to hold symposium on topics covering multiple disciplines one in each academic year.
5. **Workshops:** It is recommended to hold workshops on topics covering multiple disciplines one in each academic year.
6. **Clinical Postings:** Each trainee shall work in the clinics on regular basis to acquire adequate professional skills and competency in managing various cases to be treated by a specialist
7. **Clinico Pathological Conference:** The Clinico pathological conferences should be held once in a month involving the faculties of oral biology, oral medicine and radiology, oral pathology, oral surgery, period ontology, endodontia and concerned clinical department. The trainees should be encouraged to present the clinical details, ft radiological and histo-pathological interpretations and participation in the discussions, j
8. **Interdepartmental Meetings:** To bring in more integration among various specialities there shall be interdepartmental meeting chaired by the dean with all heads of postgraduate departments at least once a month.
9. **Rural oriented prosthodontic health care** - To carry out a prosthodontic therapy interacting with rural centers and the institution.
10. **Teaching skills:** All the trainees shall be encouraged to take part in undergraduate teaching programmes either in the form of lectures or group discussions
11. **Evaluation skills:** All the trainees shall be encouraged to take part evaluating the skills and knowledge in clinical laboratory practice including theory by formulating question banks and model answers.
12. **Continuing dental education programmes:** Each Postgraduate department shall organize these programmes on regular basis involving the/Qther institutions. The trainees shall also be encouraged to attend such programmes conducted elsewhere.
13. **Conferences/Workshops/Advanced courses:** The trainees shall be encouraged not only to attend conference/workshops/advance courses but also to present at least two papers at state/national speciality meeting during their training period.
14. **Rotation and posting in other departments:** To bring in more integration between the speciality and allied fields each post graduate department shall workout a programme to rotate the trainees in related disciplines and Craniofacial and maxillofacial ward.
15. **Dissertation:** Trainees shall prepare a dissertation based on the clinical or laboratory experimental work or any other study conducted by them under the supervision of the post graduate guide.

I YEAR M.D.S

- © Theoretical exposure of all applied sciences of study
- © Clinical and non-clinical exercises involved in Prosthodontic therapy for assessment and acquiring higher competence.
- © Commencement of Library Assignment within six months.
- © Short epidemiological study relevant to Prosthodontics.
- © Acquaintance with books, journals and referrals To acquire knowledge of list of published books, journal and website for the purpose of gaining knowledge and reference - in the fields of Prosthodontics including Crown & bridge and implantology
- © Acquire knowledge of instruments, equipment, and research tools in Prosthodontics.
- © To acquire knowledge of Dental Material Science - Biological and bwrnecnakal, bio-esthetics knowledge of using in laboratory and clinics including testing methods.
- © Participation and presentation in seminars, didactics lectures
- © Evaluation - Internal Assessment examinations on Applied subjects

II YEAR M.D.S.

- © Acquired confidence in obtaining various phases and techniques for providl Prosthodontic therapy.
- © Acquiring confidence by clinical practice with sufficient numbers of patient requiring tooth and tooth surface restorations.
- © Adequate number of complete denture prosthesis and techniques higher clinical approach by utilizing in semi-adjustable articulators, face bow and graphic tracing.
- © Understanding the use of the dental surveyor and its application in diagnosis and treatment plan in R.P.D.
- © Adequate numbers of R.P.D. covering all clinical partially edentulous situation
- © Adequate number of Crowns, Inlays, laminates F.P.D. covering all clinically, partial edentulous situation.
- © Selection of cases and principles in treatment of edentulous patients, partial or complete by implant supported prosthesis.
- © Treating single edentulous situation by implant support.
- © Diagnosis and treatment planning.
- © 1st stage and ll nd stage implant surgery
- © Understanding the maxillofacial Prosthodontics
- © Treating craniofacial defects
- © Management of orofacial esthetics
- © Prosthetic management of TMJ syndrome
- © Occlusal rehabilitation
- © Maintenance and management of filled restoration
- © Prosthodontic Management of patient with psychogenic origin.
- © Practice of child and geriatric prosthodontics
- © Participation and presentation in seminars, didactics lectures

© Evaluation - Internal Assessment examinations

III YEAR M.D.S

© Clinical and laboratory practice continued from IIInd year

© Occlusal equilibration procedures - Fabrication of stabilizing splint for parafunctional disorders, occlusal disorders and TMJ functions.

© Practice of dental, oral and facial esthetics

© The clinical practice of all aspects of Prosthodontic therapy for elderly patients.

© Implants Prosthodontics - Rehabilitation of Partial Edentulous, Complete edentulism and for craniofacial rehabilitation

© Failures in all aspects of Prosthodontics and its management and after care

© Team management for esthetics, TMJ syndrome and Maxillofacial and Craniofacial Prosthodontics

© Management of Prosthodontics emergencies, resuscitation.

© Candidate should complete the course by attending by large number and variety of patients to master the prosthodontic therapy. This includes the practice management, examinations, treatment planning, communication with patients, clinical and laboratory techniques materials and instrumentation requiring different aspects of prosthodontic therapy, Tooth and Tooth surface restoration, Restoration of root treated teeth, splints for periodontal rehabilitations and fractured jaws, complete dentures, R.P.D. FPD. Immediate dentures over dentures implant supported prosthesis, maxillofacial and body prosthesis, occlusal rehabilitation.

© Prosthetic management of TMJ syndrome

© Management of failed restorations

© Complete and submit Library Assignment 6 months prior to examination.

© Candidates should acquire complete theoretical and clinical knowledge through seminars, symposium, workshops and reading.

© Participation and presentation in seminars, didactic lectures.

© Evaluation - Internal Assessment examinations three months before University examinations.

PROSTHODONTIC TREATMENT MODALITIES

1. Diagnosis and treatment plan in prosthodontics

2. Tooth and tooth surface restorations

- Fillings
- Veneers - composites and ceramics
- Inlays- composite, ceramic and alloys
- Onlay - composite, ceramic and alloys

Management of failed restoration

- Partial crowns - $\frac{3}{4}$, $\frac{4}{5}$, $\frac{7}{8}$, Vz crowns
- Pin-ledge
- Radicular crowns

➤ Full crowns

Management of failed restorations

	PARTIAL	COMPLETE
© Tooth supported	Fixed partial denture	Overdenture
©Tissue Supported	Interim partial denture	Complete denture
	Intermediate partial denture	Immediate denture
		Immediate complete Denture
©Tooth and tissue supported	Cast partial denture	Overdenture
	Precision attachment	
©Implant supported	Cement retained	Bar attachment
	Screw retained	Ball attachment
	Clip attachment	
©Tooth and implant supported	Screw retained	
	Cement retained	
©Root supported	Dowel and core	Overdenture
	Pin retained	

Management of failed restorations

> Distal extension prosthesis

© Tooth borne prosthesis

© Combination distal extension and tooth borne prosthesis

© Retainers for partial dentures - intra coronal, extra coronal or Para coronal intraproximal with cantilevered pontics

> Attached to cantilevered pontics

©Pontics between bridge retainers

©Attached to root coping

©Spring loaded bolts or plungers

© Ring springs

© Bolts

© Rubber device

- © Slide cap attachments
- © Cones crown
- © Hybrid telescope
- © Ring telescope

> Precision attachments

- © Intra coronal attachments
- © Extra coronal attachments
- © Bar - slide attachments
- © Joints and hinge joint attachments

Management of failed restorations

4. Tooth and tissue defects (Maxillo- facial and Cranio-facial prosthesis)

A. Congenital Defects

a. Cleft lip and palate

Obturators

- > Feeding
- > Surgical
- © Immediate
- © Delayed
- > Interim
- > Definitive
- > implant supported prosthesis

- b. Pierre Robin Syndrome
- c. Ectodermal dysplasia
- d. Hemifacial microsomia
- e. Anodontia
- f. Oligodontia
- g. Malformed teeth

- > cast partial denture
- implant supported dentures
- complete dentures

B. Acquired defects

a. Head and neck cancer patients - prosthodontic splints and stents

b. Restoration of facial defects

- Auricular prosthesis

- Nasal prosthesis

- Orbital prosthesis

- Craniofacial implants

c. Midfacial defects

d. Restoration of maxillofacial trauma

e. Hemimandibulectomy

f. Maxillectomy

- g. Lip and cheek support prosthesis
- h. Ocular prosthesis
- i. Speech and Velopharyngeal prosthesis
- j. Laryngectomy aids
- k. Esophageal prosthesis
- l. Nasal stents
- m. Tongue prosthesis
- n. Burn stents
- o. Auditory inserts
- p. Trismus appliances
- q. Prosthesis for lagophthalmos of the eye

Management of failed restorations.

5. T.M.J and Occlusal disturbances

- a. Occlusal equilibration
 - b. Splints -Diagnostic
 -Repositioners / Deprogrammers
 - c. Anterior bite plate
 - d. Posterior bite plate
 - e. Bite raising appliances
 - f. Occlusal rehabilitation
 - g. Behavioral and psychological care for the cancer patient
- Management of failed restorations

6. Esthetic/Smile designing

- a. Laminates / Veneers
- b. Tooth contouring (peg laterals, malformed teeth)
- c. Tooth replacements
- d. Team management

Management of failed restorations

7. Psychological therapy

- a. Questionnaires
- b. Charts, papers, photographs
- c. Models
- d. Case reports
- e. Patient counseling
- f. Behavioral modifications
- g. Referrals
-

8. Geriatric Prosthodontics

- a. Prosthodontics for the elderly
- b. Behavioral and psychological counseling

- c. Removable Prosthodontics
- d. Fixed Prosthodontics
- e. Implant supported Prosthodontics
- f. Maxillofacial Prosthodontics
- g. Psychological and physiological considerations

Management of failed restorations

9. Preventive measures

- a. Diet and nutrition modulation and counseling
- b. Referrals

THE BENCH WORK SHOULD BE COMPLETED BEFORE THE CLINICAL WORK STARTS DURING THE FIRST YEAR OF THE M.D.S COURSE

I. Complete dentures

1. Arrangements in adjustable articulator for

- © Class I
- © Class II
- © Class III
- © Cross bite

2. Various face bow transfer to adjustable articulators

3. Processing of characterized anatomical denture

II. Removable partial denture

1. Design for Kennedy's Classification
(Survey, block out and design)

- a. Class I
- b. Class II
- c. Class III
- d. Class IV

2. Designing of various components of RPD

3. Wax pattern on refractory cast

- a. Class I
- b. Class II
- c. Class III
- d. Class IV

4- Casting and finishing of metal frameworks

5- Acrylisation on metal frameworks for

Class I

Class III with modification

III. Fixed Partial Denture

- © Preparation of ivory teeth/natural teeth
- © Fvc for metal
- © FVC for ceramic
- © *Porcelain jacket crown*
- © Acrylic jacket crown
- © PFM crown

- © 3/4th (canine, premolar and central)
- © 7/8th posterior
- © Proximal half crown
- © Inlay - Class I, II, V
- © Onlay-Pin ledged, pinhole
- © Laminates

2. Preparation of different die system

3. Fabrication of wax pattern by drop wax build up technique

- © Wax in increments to produce wax coping over dies of tooth preparations on substructures.
- © Wax additive technique
- © 3-unit wax pattern (maxillary and Mandibular)
- © Full mouth

4. Pontic design in wax pattern

- © Ridge lap Sanitary
- © Modified ridge lap
- © Modified sanitary
- © Spheroidal or conical

5. Fabrication of metal framework

- © Full metal bridge for posterior (3 units)
- © Coping for anterior (3 unit)
- © Full metal with acrylic facing
- © Full metal with ceramic facing
- © Adhesive bridge for anterior
- © Coping for metal margin ceramic crown
- © Pin ledge crown

6. Fabrication of crowns

- © Post and core
- © All ceramic crowns with characterized
- © Metal ceramic crowns with characterized
- © Full metal crown
- © Precious metal crown

7. Laminates

- © Composites with characterized
- © Ceramic with characterized
- © Acrylic

8. Preparation for composites

- © Laminates
- © Crown
- © Inlay
- © Onlay

- © Class 1
- © Class II
- © Class III
- © Class IV
- © Fractured anterior tooth

IV. Maxillofacial prosthesis

1. Eye
2. Ear
3. Nose
4. Face
5. Body
6. Cranial
7. Hemimaxillectomy
8. Hemimandibulectomy
9. Finger prosthesis
10. Guiding flange
11. Obturator

V. Implant supported prosthesis

1. Step by step procedures - laboratory phase

VI. Other exercises

1. TMJ splints - stabilization appliances, maxillary and Mandibular repositioning appliances
2. Anterior disclusion appliances
3. Chrome cobalt and acrylic resin stabilization appliances
4. Modification in accommodation in irregularities in dentures
5. Occlusal splint
6. Periodontal splint
7. Precision attachments - custom made
8. Over denture coping
9. Full mouth rehabilitation (by drop wax technique, ceramic build up)
10. TMJ appliances -stabilization appliances

Essential Skills

* Key

O -Washes up and observes.

A-Assists a senior

PA- performs procedure under the direct supervision of a senior specialist

PI- Performs independently

SCHEME OF EXAMINATION:

A. Theory: 300 Marks

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows:

Distribution of topics for each paper will be as follows:

Paper I: Applied Basic Sciences: Applied Anatomy, embryology, growth and development, Genetics, Immunology, anthropology, Physiology, nutrition & Biochemistry, Pathology & Microbiology, virology, Applied pharmacology, Research Methodology and bio statistics,. Applied Dental anatomy & histology, Oral pathology & oral Microbiology, Adult and geriatric psychology. Applied dental materials.

Paper II: Removable Prosthodontics and Implant supported prosthesis (Implantology), Geriatric dentistry and Cranio facial Prosthodontics

Paper III: Fixed Prosthodontics, occlusion, TMJ and esthetics.

Paper IV: Essay

*The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical / Clinical Examination : 200 Marks

Examination shall be for three days. If there are more than 6 candidates, it may be extended for one more day. Each candidate shall be examined for a minimum of three days, six hours per day including viva voce

1. Presentation of treated patients and records during their three year training period.

- 25 Marks

Occlusal rehabilitation
T.M.J.

- 5 marks
- 5 marks

Maxillofacial Prosthesis	- 5 marks
2. Present actual treated patients CD. Prosthesis and Insertion	- 90 Marks
1. Discussion on treatment plan and patient review	-10 marks
2. Tentative jaw relation records	- 5 marks
3. Face Bow - transfer	- 5 marks
4. Transferring it on articulators	- 5 marks
5. Extra oral tracing and securing centric and protrusive/lateral.	- 25 marks
6. Transfer in on articulator.	- 5 marks
7. Selection of teeth	- 5 marks
8. Arrangement of teeth	-15 marks
9. Waxedup denture trial	- 10 marks
10. Fit, insertion and instruction of previously processed characterized, anatomic complete denture prosthesis	- 5 marks
All steps will include chair side, lab and viva voce	
3. Fixed Partial Denture	- 50 Marks
a. Case discussion and selection of patients for F.P.D.	- 5 marks
b. Abutment preparation isolation and fluid control	- 25 marks
c. Gingival retraction and impressions	-10 marks
d. Cementation of provisional restoration	-10 marks
4. Removable Partial Denture	- 35 Marks
a. Surveying and designing of partial dentate cast.	-10 marks
b. Discussion on components and material selection including occlusal scheme.	-15 marks

C. Viva Voce 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic be given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes.

PERIODONTICS

Objectives

The following objectives are laid out to achieve the goals of the course

Knowledge

- © Discuss historical perspective to advancement in the subject proper and related topics
- © Describe etiology, pathogenesis, diagnosis and management of common periodontal diseases with emphasis on Indian population
- © Familiarize with the biochemical, microbiologic and immunologic genetic aspects of periodontal pathology
- © Describe various preventive periodontal measures
- © Describe various treatment modalities of periodontal disease from historical aspect to currently available ones
- © Describe interrelationship between periodontal disease and various systemic conditions
- © Describe periodontal hazards due to estrogenic causes and deleterious habits and prevention of it
- © Identify rarities in periodontal disease and environmental/ Emotional determinates in a given case
- © Recognize conditions that may be outside the area of his Speciality/competence and refer them to an appropriate Specialist
- © Decide regarding non-surgical or surgical management of the case
- © Update him by attending course, conferences and seminars relevant to periodontics or by self-learning process.
- © Plan out/ carry out research activity both basic and clinical aspects with the aim of publishing his work in scientific journals
- © Reach to the public to motivate and educate regarding periodontal disease, its prevention and consequences if not treated
- © Plan out epidemiological survey to assess prevalence and incidence of early onset periodontitis and adult periodontitis in Indian population (Region wise)
- © Shall develop knowledge, skill in the science and practice of Oral Implantology
- © Shall develop teaching skill in the field of Periodontology and Oral Implantology

SKILL

©Take a proper clinical history, thorough examination 01 intra orally, extra orally, medical history evaluation, advice essential diagnostic procedures and interpret them to come to a reasonable diagnosis

©Effective motivation and education regarding periodontal disease maintenance after the treatment

©Perform both non-surgical & education regarding periodontal disease, maintenance after the treatment

©Perform both non-surgical and surgical procedures independently

©Provide Basic Life Support Service (BLS) recognizes the need for and advance life support and does the immediate need for that.

Human values, ethical practice to communication abilities

© Adopt ethical principles in all aspects of treatment modalities, Professional honesty & integrity are to be fostered Develop, Adopt ethical principles in all aspects of treatment modalities; Professional honesty & integrity are to be fostered. Develop Communication skills to make awareness regarding periodontal disease Apply high moral and ethical standards while carrying out human or animal research, Be humble, accept the limitations in his knowledge and skill, and ask for help from colleagues when needed, Respect patients rights and privileges, including patients right to information and right to seek a second opinion.

Course Contents

Paper I

Applied Anatomy:

1. Development of the Periodontium
2. Micro and Macro structural anatomy and biology of the periodontal tissues
3. Age changes in the periodontal tissues
4. Anatomy of the Periodontium
 - ©Macroscopic and microscopic anatomy
 - ©Blood supply of the Periodontium
 - ©Lymphatic system of the Periodontium
 - ©Nerves of the Periodontium
5. Temporomandibular joint, Maxillae and Mandible
6. Cranial nerves (5,7,9,11,12)
7. Tongue, oropharynx
8. Muscles of mastication

Physiology

1. Blood
2. Respiratory system - Acknowledge of the respiratory diseases which are a cause of periodontal diseases (periodontal Medicine)
3. Cardiovascular system
 - h. Blood pressure
 - i. Normal ECG
 - j. Shock
4. Endocrinology - hormonal influences on Periodontium
5. Gastrointestinal system
 - a. Salivary secretion - composition, function & regulation
 - b. Reproductive physiology
 - i. Hormones - Actions and regulations, role in periodontal disease
 - ii. Family planning methods
6. Nervous system
 - a. Pain pathways
 - b. Taste - Taste buds, primary taste sensation & pathways for sensation

Biochemistry

1. Basics of carbohydrates, lipids, proteins, vitamins, proteins, enzymes and minen
2. Diet and nutrition and periodontium
3. Biochemical tests and their significance

4. Calcium and phosphorus

Pathology

1. Cell structure and metabolism
2. Inflammation and repair, necrosis and degeneration
3. Immunity and hypersensitivity
4. Circulatory disturbances - edema, hemorrhage, shock, thrombosis, embolism, infarction and hypertension
5. Disturbances of nutrition
6. Diabetes mellitus
7. Cellular growth and differentiation, regulation
8. Lab investigations
9. Blood

Microbiology:

1. General bacteriology
 - a. Identification of bacteria
 - b. Culture media and methods
 - c. Sterilization and disinfection
 2. Immunology and Infection
 3. Systemic bacteriology with special emphasis on oral microbiology - staphylococci, genus actinomyces and other filamentous bacteria and actinobacillus actinomycetumcomitans
 4. Virology
 - a. General properties of viruses
 - b. Candidiasis
6. Applied microbiology
7. Diagnostic microbiology and immunology, hospital infections and management

Pharmacology:

1. General pharmacology
 - a. Definitions - Pharmacokinetics with clinical applications, routes of administration including local drug delivery in Periodontics
 - b. Adverse drug reactions and drug interactions
2. Detailed pharmacology of
 - a. Analgesics - opioid and nonopioid
 - b. Local anesthetics
 - c. Haematinics and coagulants, Anticoagulants
 - d. Vit D and Calcium preparations
 - e. Antidiabetics drugs
 - f. Steroids
 - g. Antibiotics
 - h. Antihypertensive
 - i. Immunosuppressive drugs and their effects on oral tissues
 - j. Antiepileptic drugs
3. Brief pharmacology, dental use and adverse effects of
 - a. General anesthetics
 - b. Antipsychotics
 - c. Antidepressants

- d. Anxiolytic drugs
 - e. Sedatives
 - f. Antiepileptics
 - g. Antihypertensives
 - h. Antianginal drugs
 - i. Diuretics
 - j. Hormones
 - k. Pre-anesthetic medications
4. Drugs used in Bronchial asthma cough
5. Drug therapy of
- a. Emergencies
 - b. Seizures
 - c. Anaphylaxis
 - d. Bleeding
 - e. Shock
 - f. Diabetic ketoacidosis
 - g. Acute addisonian crisis
6. Dental Pharmacology
- a. Antiseptics
 - b. Astringents
 - c. Sialogogues
 - d. Disclosing agents
 - e. Antiplaque agents
7. Fluoride pharmacology

Biostatistics:

- © Introduction, definition and branches of biostatistics
- © Collection of data, sampling, types, bias and errors
- © Compiling data-graphs and charts
- © Measures of central tendency (mean, median and mode), standard deviation variability
- © Tests of significance (chi square test't'test and Z-test)
- © Null hypothesis

Paper II

Etiopathogenesis

1. Classification of periodontal diseases and conditions
2. Epidemiology of gingival and periodontal diseases
3. Defense mechanisms of gingiva
4. Periodontal microbiology
5. Basic concepts of inflammation and immunity
6. Microbial interactions with the host in periodontal diseases

7. Pathogenesis of plaque associated periodontal diseases
8. Dental calculus
9. Role of iatrogenic and other local factors
10. Genetic factors associated with periodontal diseases
11. Influence of systemic diseases and disorders of the periodontium
12. Role of environmental factors in the etiology of periodontal disease
13. Stress and periodontal diseases
14. Occlusion and periodontal diseases
15. Smoking and tobacco in the etiology of periodontal diseases
16. AIDS and periodontium
17. Periodontal medicine
18. Dentinal hypersensitivity

Paper III

Clinical and Therapeutic Periodontology and Oral Implantology

Please note:

Clinical periodontology includes gingival diseases, periodontal diseases, periodontal instrumentation, diagnosis, prognosis and treatment of periodontal diseases.

I. GINGIVAL DISEASES

1. Gingival inflammation
2. Clinical features of gingivitis
3. Gingival enlargement
4. Acute gingival infections
5. Desquamative gingivitis and oral mucous membrane diseases
6. Gingival diseases in the childhood

II. PERIODONTAL DISEASES

1. Periodontal pocket
2. Bone loss and patterns of bone destruction
3. Periodontal response to external forces
4. Masticatory system disorders
5. Chronic periodontitis
6. Aggressive periodontitis
7. Necrotising ulcerative periodontitis
8. Interdisciplinary approaches
 - Orthodontic
 - Endodontic
9. Periodontic considerations

III. TREATMENT OF PERIODONTAL DISEASES

A. History, examination, diagnosis, prognosis and treatment planning

1. Clinical diagnosis
2. Radiographic and other aids in the diagnosis of periodontal diseases
3. Advanced diagnostic techniques

4. Risk assessment
- 5.** Determination of prognosis
6. Treatment plan
7. Rationale for periodontal treatment
8. General principles of anti-infective therapy with special emphasis on infection control in periodontal practice
9. Halitosis and its treatment
10. Bruxism and its treatment

B. Periodontal instrumentation

1. Instrumentation
2. Principles of periodontal instrumentation
3. Instruments used in different parts of the mouth

C. Periodontal therapy

1. Preparation of tooth surface
2. Plaque control
3. Anti microbial and other drugs used in periodontal therapy and wasting diseases of teeth
4. Periodontal management of HIV infected patients
5. Occlusal evaluation and therapy in the management of periodontal diseases
6. Role of orthodontics as an adjunct to periodontal therapy
7. Special emphasis on precautions and treatment for medically compromised patients
8. Periodontal splints
9. Management of dentinal hypersensitivity

D. Periodontal surgical phase - special emphasis on drug prescription

1. General principles of periodontal surgery
2. Surgical anatomy of periodontium and related structures
3. Gingival curettage
4. Gingivectomy technique
5. Treatment of gingival enlargements
6. Periodontal flap
7. Osseous surgery (resective and regenerative;
8. Furcation; Problem and its management
9. The periodontic - endodontic continuum
10. Periodontic plastic and esthetic surgery
11. Recent advances in surgical techniques

E. Future directions and controversial questions in periodontal therapy

1. Future directions for infection control
2. Research directions in regenerative therapy
3. Future directions in anti-inflammatory therapy

4. Future directions in measurement of periodontal diseases

E. Periodontal maintenance phase

1. Supportive periodontal treatment

2. Results of periodontal treatment

IV. ORAL IMPLANTOLOGY

1. Introduction and historical review

2. Biological, clinical and surgical aspects of dental implants

3. Diagnosis and treatment planning

4. Implant surgery

5. Prosthetic aspects of dental implants

6. Diagnosis and treatment of Peri implant complications

7. Special emphasis on plaque control measures implant patients

8. Maintenance phase

V. MANAGEMENT OF MEDICAL EMERGENCIES IN PERIODONTAL PRACTICE

Teaching / learning Activities

© Seminars: - A minimum of 15 seminars to be presented by each student during the P.G. course (At least 5 Seminars per year)

© Journal clubs: - a minimum of 25 Journal articles to be reviewed by each student during the P.G. course

© Interdepartmental Seminars: - Each P.G. student should present at least t seminar in an Interdepartmental meeting during the P.G course. Such meetings maybe held at least once every month

© Library Assignment: - one to be presented at the end of 18 months of the course.

Academic Activities:

I Year

Submission of synopsis for Dissertation - within 6 months from the start of the course

Library Assignment I - to be submitted at the end of the I year

II Year

Library Assignment II - to be submitted at the end of the II year

Scientific Paper presentation at the conferences ill Year

III Year

Scientific Paper/ Poster presentation at conferences

Submission of Dissertation - 6 months before completion of

Skills

First year

Pre - Clinical work

Dental

1. Practice of incisions and suturing techniques on the typhodont models
2. Fabrication of bite guards and splints
3. Occlusal adjustments on the casts mounted on the articulator
4. X- Ray techniques and interpretation
5. Local anesthetic techniques

Medical

1. Basic diagnostic microbiology and immunology, collection and handling sample, culture techniques.
2. Basic understanding of immunological diseases
3. Interpretation of various biochemical investigations
4. Practical training and handling medical emergencies and basic life support devices
5. Basic Biostatistics - Surveying and data analysis Clinical work

- | | |
|------------------------------------|----------|
| 1. Applied periodontal indices | 10 CASES |
| 2. Scaling and root planning (SRP) | |
| a. Hand | 15 CASES |
| b. Ultrasonic | 15 CASES |
| 3. Curettage | 10 CASES |
| 4. Gingivectomy | 20 CASES |
| 5. Ginqivoplasty | 10 CASES |

Clinical Work

- | | |
|--|----------|
| 2. Case history and treatment planning | 10 CASES |
| 3. Local Drug Delivery techniques | 5 CASES |
| 4. Periodontal surgical procedures | |
| -Pocket therapy | |
| -Muco-gingival surgeries | |
| -Implants (2 implants) | |
| -Management of perio endo problems | |
| 5. Occlusal adjustments | 10 CASES |
| 6. Perio splints | 10 CASES |

Third Year

Clinical work

1. Regenerative techniques
- Using various graft and barrier membranes
2. Record, maintenance and follow up of all treated cases including implants

Assessment examinations: - In addition to the regular evaluation, log book etc., assessment examination should be conducted once every six months & progress of the student monitored

Note: The number of cases mentioned are minimum number to be performed by each candidate.

Submission of Synopsis for Dissertation should be done within 6 months of the commencement of the course.

Submission of two copies of Library Assignments at the end of 1 and 2nd year

Submission of pre-clinical work as scheduled. Submission of Dissertation - 6 months before completion of III year. Maintenance of Work Diary/Log book as prescribed by RGUHS.

Monitoring Learning Progress

It is essential to monitor the learning progress to each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring to be done by the staff of the department based on participation of students in various teaching / learning activities? It may be structured and assessment be done using checklists that assess various aspects. Checklists are given in Section IV

SCHEME OF EXAMINATION

Theory : 300 Marks

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows: *

Paper I: Applied Basic Sciences: Applied Anatomy, Physiology, 8s Biochemistry, Pathology, Microbiology, Pharmacology, Research Methodology and Biostatistics. Should Epidemiology come under Paper II?

Paper II: Normal Periodontal structure, Etiology 8s Pathogenesis of Periodontal diseases, epidemiology as related to Periodontics

Paper III: Periodontal diagnosis, therapy 8s Oral implantology

Paper IV: Essay (with emphasis on recent advances in periodontics)

*The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical / Clinical Examination : 200 Marks

The clinical examination shall be of two days duration

1st day

Case discussion

- Long case- One
- Short case - One

Periodontal surgery - Periodontal flap surgery on a previously prepared case in one quadrant of the mouth after getting approval from the examiners

2nd day

Post-surgical review and discussion of the case treated on the 1st day Presentation of dissertation & discussion

All the examiners shall participate in all the aspects of clinical examinations / Viva Voce

Distribution of Marks for Clinical examination (recommended)

a) Long Case discussion	50
b) 2 short cases	50
c) Periodontal surgery	75
d) Post — operative review	25
Total	200

C. Viva Voce: 100 Marks

i. Viva- Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy: 20 marks

A topic is given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes

Topic be given to each candidate in the beginning of clinical examination. He/she is asked make a presentation on the topic for 8-10 minutes.

ORAL AND MAXILLOFACIAL SURGERY

Objectives:

The training program in Oral and Maxillofacial Surgery is structured to achieve the following four objectives-

- © Knowledge
- © Skills
- © Attitude
- © Communicative skills and ability

Knowledge:

- © To have acquired adequate knowledge and understanding of the etiology, patho physiology and diagnosis, treatment planning of various common oral and Maxillofacial surgical problems both minor and major in nature.
- © To have understood the general surgical principles like pre and post surgical management, particularly evaluation, post surgical care, fluid and electrolyte management, blood transfusion and post surgical pain management.
- © Understanding of basic sciences relevant to practice of oral and maxillofacial surgery.
- © Able to identify social, cultural, economic, genetic and environmental factors and their relevance to disease process management in the oral and Maxillofacial region.
- © Essential knowledge of personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste keeping in view the high prevalence of hepatitis and HIV.

Skill

- © To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures and order relevant laboratory tests and interpret them and to arrive at a reasonable diagnosis about the surgical condition.
- © To perform with competence minor oral surgical procedures and common maxillofacial surgery. To treat both surgically and medically (or by other means of the oral and Maxillofacial and the related area).
- © Capable of providing care for maxillofacial surgery patients.

Attitude:

- © Develop attitude to adopt ethical principles in all aspect of surgical practice, professional honesty and integrity are to be fostered. Surgical care is to be delivered irrespective of the social status, caste, creed or religion of the patient.
- © Willing to share the knowledge and clinical experience with professional colleagues.
- © Willing to adopt new and techniques of surgical management developed from time to time based on scientific research which are in the best interest of the patient
- © Respect patient right and privileges, including patients right to information and right to seek a second opinion.
- © Develop attitude to seek opinion from an allied medical and dental specialists as and when required.

Communication skills:

- © Develop adequate communication skills particularly with the patients giving them the various options available to manage a particular surgical problem and obtain a true informed consent from them for the most appropriate treatment available at that point of time
- © Develop the ability to communicate with professional colleagues.

© Develop ability to teach undergraduates.

Course content:

The program outlines addresses both the knowledge needed in Oral and Maxillofacial Surgery and allied medical specialties in its scope. A minimum of three years of formal training through a graded system of education as specified will equip the trainee with skill and knowledge at its completion to be able to practice basic oral and Maxillofacial surgeon competently and have the ability to intelligently pursue further apprenticeship towards advance Maxillofacial surgery.

The topics are considered as under:-

© Basic sciences

© Oral and Maxillofacial surgery

© Allied specialties

Applied Basic Sciences:

A thorough knowledge both on theory and principles in general and in particular the basic medical subjects as relevant to the practice of maxillofacial surgery. It is desirable to have adequate knowledge in bio-statistics, Epidemiology, research methodology, nutrition and computers.

© Anatomy

Development of face, paranasal sinuses and associated structures and their anomalies; surgical anatomy of scalp temple and face, anatomy and its applied aspects of triangles of neck, deep structures of neck, cranial facial bones and its surrounding soft tissues, cranial nerves tongue, stemporal and infratemporal region, orbits and its contents, muscles of face and neck, paranasal sinuses, eyelids and nasal septum teeth gums and palate, salivary glands, pharynx, thyroid and parathyroid glands, larynx, trachea and esophagus, congenital abnormality of orofacial regions, General consideration of the structure and

© Physiology

Nervous system-physiology of nerve conduction, pain pathway, sympathetic and parasympathetic nervous system, hypothalamus and mechanism of controlling body temperature; Blood-its composition hemostasis, blood dyscrasias and its management, hemorrhage and its control, blood grouping, cross matching, blood component therapy, complications of blood transfusion, blood substitutes, auto transfusion, cell savers; digestive system composition and functions of saliva mastication deglutition, digestion, assimilation, urine formation, normal and abnormal constituents; Respiration control of ventilation anoxia, asphyxia, artificial respiration, hypoxia - types and management; CVS - cardiac cycle, shock, heart sounds, blood pressure, hypertension; Endocrinology-metabolism of calcium; endocrinal activity and disorder relating to thyroid gland, parathyroid gland, adrenal gland, pituitary gland, pancreas and gonads; Nutrition-general principles balanced diet. Effect of dietary deficiency, protein energy malnutrition, Kwashiorkor, Marasmus, Nutritional assessment, metabolic responses to stress, need for nutritional support, entrials nutrition, roots of access to GI tract, Parenteral nutrition, Access to central veins, Nutritional support; Fluid and Electrolytic balance/Acid Base metabolism- the body fluid compartment, metabolism of water and electrolytes, factors maintaining hemostasis, causes for treatment of acidosis and alkalosis.

©Biochemistry

General principles governing the various biological principles of the body, such as osmotic pressure, electrolytes, dissociation, oxidation, reduction etc; general composition of body, intermediary metabolism, carbohydrate, proteins, lipids, enzymes, vitamins, minerals and antimetabolites.

© General Pathology

Inflammation - Acute and chronic inflammation, repair and regeneration, necrosis and gangrene, role of component system in acute inflammation, role of arachidonic acid and its metabolites in acute inflammation, growth factors in acute inflammation role of NSAIDs in inflammation, cellular changes in radiation injury and its manifestation; wound management - Wound healing factors influencing healing; properties of suture materials, appropriate uses of sutures; hemostasis - role of endothelium in thrombogenesis; arterial and venous thrombi, disseminated intravascular coagulation; Hypersensitivity; Shock and pulmonary failure: types of shock, diagnosis, resuscitation, pharmacological support, ARDS and its causes and prevention, ventilation and support, Neoplasm I | of tumors, Carcinogens and Carcinogenesis, grading and staging of tumors, various laboratory investigation.

©General microbiology

Immunity, Hepatitis B and its prophylaxis, Knowledge of organisms, commonly associated with diseases of oral cavity, culture and sensitivity tests, various staining techniques-Smears and cultures, urine analysis and culture.

© Oral pathology and microbiology:

Developmental disturbances of oral and para oral structures, regressive changes of teeth, bacterial, viral, mycotic infection of oral cavity, dental caries, diseases of pulp and Periapical tissues, physical and chemical injuries of oral cavity, wide range of pathological lesions of hard and soft tissues of the orofacial regions like the cysts odontogenic infection, benign, malignant neoplasms, salivary gland diseases, maxillary sinus diseases, mucosal diseases, oral aspects of various systemic diseases, role of laboratory investigation in oral surgery.

©Pharmacology and therapeutics:

Definition of terminology used, pharmacokinetics and pharmacodynamic dosage and mode of administration of drugs, action and fate in the body, drug addiction, tolerance and hypersensitive reactions, drugs acting on CNS, general and local anesthetics, antibiotics and analgesics, antiseptics, antitubercular, sialagogues, hematinics, anti diabetic, Vitamins A, B-complex, C.D.E.K

©Computer science

Use of computers in surgery, components of computer and its use in practice-principles of word processing, spreadsheet function database and presentations; the internet and its use. The value of computer based systems in biomedical equipment.

ORAL AND MAXILLOFACIAL SURGERY:

© Evolution of Maxillofacial surgery.

© Diagnosis, history taking, clinical examination, investigations.

© Informed consent/medico-legal issues.

© Concept of essential drugs and rational use of drugs.

© Communication skills with patients- understanding clarity in communication, compassionate explanations and giving emotional support at the time of suffering and bereavement

© Principles of surgical audit - understanding the audit of process and outcome. Methods adopted for the same Basic statistics.

© Principles of evidence based surgery- understanding journal based literature study; the value of textbook, reference book articles, value of review articles; original articles and their critical assessment, understanding the value of retrospective, prospective, randomized control and blinded studies, understanding the principles and the meaning of various Bio-statistical tests applied in these studies.

- © Principles of surgery- developing a surgical diagnosis, basic necessities for surgery, aseptic techniques, incisions, flap designs, tissue handling, homeostasis, dead space management, decontamination and debridement, suturing, edema control, patient general health and nutrition.
- © Medical emergencies - Prevention and management of altered consciousness, sensitivity reaction, chest discomfort, respiratory difficulty.
- © Pre operative workup - Concept of fitness for surgery; basic medical work up; work up in special situation like diabetes renal failure, cardiac and respiratory illness; risk stratification
- © Surgical sutures, drains
- © Post operative care- concept of recovery room care, Airway management, Assessment of Wakefulness, management of cardio vascular instability in this period, Criteria for shifting to the ward, pain management
- © Wound management- Wound healing, factors influencing healing, basic surgical techniques, Properties of suture materials, appropriate use of sutures.
- © Surgical Infections - Asepsis and antisepsis, Microbiological principles, Rational use of antibiotics, special infections like Synergistic Gangrene and Diabetic foot infection, Hepatitis and HIV infection and cross infection.
- © Airway obstruction/management - Anatomy of the airway, principles of keeping the airway patent, mouth to mouth resuscitation, Oropharyngeal airway, endotracheal intubation, Cricothyroidectomy, Tracheostomy.
- © Anesthesia - stages of Anesthesia, pharmacology of inhalation, intravenous and regional anesthetics, muscle relaxants.
- © Facial pain; Facial palsy and nerve injuries.
- © Pain control - acute and chronic pain, cancer and non-cancer pain, patient controlled analgesia
- © General patient management - competence in physical assessment of patients of surgery, competence in evaluation of patients presenting with acute injury, particularly to maxillofacial region. Competence in the evaluation of management of patients for anesthesia
- © Clinical oral surgery - all aspects of dento alveolar surgery
- © Pre-prosthetic surgery - A wide range of surgical reconstructive procedures inv their hard and soft tissues of the edentulous jaws.
- © Temporomandibular joint disorders - TMJ disorders and their sequelae need e> evaluation, assessment and management. It is preferable to be familiar with diagr and therapeutic arthroscopic surgery procedures.
- © Tissue grafting - Understanding of the biological mechanisms involved in auto and heterogeneous tissue grafting.
- © Reconstructive oral and maxillofacial surgery - hard tissue and so reconstruction.
- © Anesthesia - Stages of anesthesia, pharmacology of inhalation, intravenous and regional anesthesia, muscle relaxants.
- © Cyst and tumors of head and neck region and their management - including principles of tumor surgery, giant cell lesion of jaw bones, fibro osseous lesion of jaw lesions. © Neurological disorders of maxillofacial region-diagnosis and management of Trigeminal Neuralgia, MPDS, Bells palsy, Frey's Syndrome, Nerve injuries
- © Maxillofacial trauma - basic principles of treatment, primary care, diagnosis and management of hard and soft tissue injuries, Comprehensive, management including polytrauma patients
- © Assessment of trauma-multiple injuries patients/closed abdominal and chest injuries/penetrating injuries, pelvic fractures, urological injuries, vascular injuries.

- © Orthognathic surgery - The trainee must be familiar with the assessment and correcting of jaw deformities
- © Laser surgery - The application of laser technology in the surgical treatment of lesions amenable to such therapy
- © Distraction osteogenesis in maxillofacial region.
- © Cryosurgeries - Principles, the application of cryosurgery in the surgical management of lesions amenable to such surgeries.
- © Cleft lip and palate surgery- detailed knowledge of the development of the face, head and neck, diagnosis and treatment planning, Current concepts in the management of cleft lip and palate deformity, knowledge of nasal endoscopy and other diagnostic techniques In the evaluation of speech and hearing, concept of multi disciplinary team management.
- © Aesthetic facial surgery - detailed knowledge of structures of facial neck including skin and underlying soft tissues, diagnosis and treatment planning of deformities and conditions affecting facial kin, underlying facial muscles, bone, eyelids, external ear etc. surgical management of post acne scarring, face lift, blepharoplasty, otoplasty, facial bone recountouring etc.
- © Craniofacial surgery - basic knowledge of developmental anomalies of face, head and neck, basics concept in the diagnosis and planning of various head and neck anomalies including facial cleft, craniosynostosis, syndromes, etc., Current concepts in the management of craniofacial anomalies
- © Head and neck oncology - understanding of the principles of management of head and neck oncology including various pre cancerous lesions, Experience in the surgical techniques of reconstruction following ablative surgery.
- © Micro vascular surgery.
- © Implantology - principles, surgical procedures for insertion of various types of implants.
- © Maxillofacial radiology/radio diagnosis
- © Other diagnostic methods and imaging techniques

Allied specialties:

- © General medicine: General assessment of the patient including children with special iphasis on cardiovascular diseases endocrinal and metabolic respiratory and renal eases, Blood dyscrasias
- © General surgery: Principles of general surgery, exposure to common general surgical procedures.
- © Neuro - surgery: Evaluation of a patient with head injury, examination of various Neuro-surgical procedures
- © ENT/Ophthalmology: Examination of ear, nose throat, exposure to ENT surgical procedures, ophthalmic examination and evaluation, exposure to ophthalmic surgical procedures.
- © Orthopedic: basic principles of orthopedic surgery, bone diseases and trauma as relevant to Maxillofacial surgery, interpretation of radiographs, CT, MRI and ultrasoi
- © Anesthesia: Evaluation of patients for GA techniques and management of emergencies, various IV sedation techniques

Academic Clinical programme (applicable for all three years):

- © Seminars to be presented attended once in a week.

© Journal clubs (departmental and interdepartmental) to be conducted once in fifteen days.

© Departmental and interdepartmental discussions to be held once in a month.

© Minimum 2 scientific papers should be presented.

© Every candidate shall maintain a logbook to record his/hers work or participate all activities such as journal clubs, seminars, CDE programs etc. this work scrutinized and certified by the head of the departmental and head of the institute and presented to the university every year

Year by year programme: I Year First term:

Dissection, basic sciences, basic computer sciences, exodontias, seminars on basic selection of dissertation topic, library assignment topic, attending O.T and ward preparation of synopses and its submission within the six months after admission to the university as per calendar of events.

Second term (rotation and postings in other department):

Oncology	- 2 months
Emergency	- 1 month
General medicine-	- 15 days
General surgery/anesthesia	- 15 days
Ophthalmology	-15 days
Neurology	-15 days
ENT	-15 days

Examination of basic sciences-one paper of the three hour duration to be conducted by the college.

II Year

Minor oral surgery and higher surgical training Submission of library assignment by the end of first term

Examination on minor oral surgical procedures - one paper of three hours duration to be conducted by the college.

III Year

Maxillofacial surgery, submission of dissertation in the first term, i.e. six months before the final examination to the university.

Examination of three hours duration three months before the final examination to be conducted by the college. It is desirable to enter general surgical skills and operative procedure that are observed, assisted or performed in the log book in the format as given by RGUHS in the revised ordinance governing MDS degree course.

Final examination at the end of the third

SL No	Procedure	Category	Year	Number
	Injection I.M. and I.V.	PI	I,II	50,20
2	Minor suturing and removal of sutures	Pi	I	N,A
3	Incision & drainage of an abscess	PI	I	10
	Surgical extraction	PI	I	15
5	Impacted teeth	PI, PA	I, II	20,10
6	Pre prosthetic surgery-	PI		
	a) corrective procedures	PI	I	15
	b) ridge extension	PA	I,II	3
	c) ridge reconstruction	A	II,III	3
7	OAF closure	PI, PA	I, II	3,2
	Cyst enucleation	PI,PA	I, H	5,5
	Mandibular fractures	PI,PA	I,II	10,10
10	Peri-apical surgery	PI,PA	I	5
11	Infection management	PI,PA	I, II	N,A
12	Biopsy procedures	PI	I, H	N,A
13	Removal of salivary calculi	PA	I, H	3,5
14	Benign tumors	PA, A	II, III	3,3
15	mid face fractures	PA, A	II, III	3,5
16	Implants	PA,A	II, III	5,5
17	Tracheotomy	PA,A	II, III	2,2
18	Skin grafts	PA	III	3,5
19	Orthognathic surgery	PA,A	II, III	3
20	Harvesting bone & cartilage grafts	PA		3 2 2
	a) Iliac crest	A		
	b) Rib	A		
	c) Calvarial	A,0		
	d) Fibula			
21	T.M. Joint surgery	PA, A	II, I,	1
22	Jaw resections	PA, A	III, II	3,3
23	Onco surgery	A,0	III, III	3,3

24	Micro vascular anastomosis	A,0	III	5,10
25	Cleft lip & palate	PA,A	II, III	10,15
26	Distraction osteogenesis	A,0	II, III	2,3
27	Rhinoplasty	A,0	III	3,5
28	Access osteotomies and base of skull surgeries	A,0	III	1,3

ORAL AND MAXILLOFACIAL SURGERY

Paper I: Applied Basic Sciences: Applied Anatomy, Physiology, Biochemistry, General and Oral Pathology and Microbiology and Pharmacology Applied Anatomy

1. Surgical anatomy of the scalp, temple and face
2. Anatomy of the triangles of neck and deep structures of the neck
3. Cranial and facial bones and its surrounding soft tissues with its applied aspects in maxillofacial injuries.
4. Muscles of head and neck
5. Arterial supply, venous drainage and lymphatics of head and neck
6. Congenital abnormalities of the head and neck
7. Surgical anatomy of the cranial nerves
8. Anatomy of the tongue and its applied aspects
9. Surgical anatomy of the temporal and infratemporal regions
10. Anatomy and its applied aspects of salivary glands, pharynx, thyroid and parathyroid gland, larynx, trachea esophagus
11. Tooth eruption, morphology, and occlusion.
12. Surgical anatomy of the nose.
13. The structure and function of the brain including surgical anatomy of intra cranial venous sinuses.
14. Autonomous nervous system of head and neck
15. Functional anatomy of mastication, deglutition, speech, respiration and circulation
16. Development of face, paranasal sinuses and associated structures and their anomalies
17. TMJ: surgical anatomy and function

Physiology:

1. Nervous system

© Physiology of nerve conduction, pain pathway, sympathetic and parasympathetic nervous system, hypothalamus and mechanism of controlling body temperature

2. Blood

©Composition

- © Haemostasis, various blood dyscrasias and its management of patients with the same
- © Hemorrhage and its control
- © Capillary and lymphatic circulation.
- © Blood grouping, transfusing procedures.

3.Digestive system

- © Saliva - composition and functions of saliva
- © Mastication deglutition, digestion, assimilation
- © Urine formation, normal and abnormal constituents

4. Respiration

- © Control of ventilation anoxia, asphyxia, artificial respiration
- © Hypoxia - types and management

5.Cardiovascular System

- © Cardiac cycle,
- © Shock
- © Heart sounds,
- © Blood pressure,
- © Hypertension:

6.Endocrinology

- © General endocrinal activity and disorder relating to thyroid gland,
- © Parathyroid gland, adrenal gland, pituitary gland, pancreas and gonads:
- © Metabolism of calcium

7. Nutrition

- © General principles balanced diet, effect of dietary deficiency, protein malnutrition, Kwashiorkor, Marasmus:
- © Fluid and Electrolytic balance in maintaining haemostasis and significance in minor and major surgical procedures

Biochemistry

General principles governing the various biological activities of the body, such as osmotic

pressure, electrolytes, dissociation, oxidation, reduction etc.

General composition of the body Intermediary metabolism

Carbohydrates, proteins, lipids, and their metabolism Nucleoproteins, nucleic acid and nucleotides and their metabolism Enzymes, vitamins and minerals Hormones

Body and other fluids. Metabolism of inorganic elements. Detoxification in the body.

Antimetabolites.

Pathology:

1. Inflammation-

- © Repair and regeneration, necrosis and gangrene

- © Role of component system in acute inflammation,
- © Role of arachidonic acid and its metabolites in acute inflammation,
- © Growth factors in acute inflammation
- © Role of molecular events in cell growth and intercellular signaling cell surface receptors

- © Role of NSAIDs in inflammation,
- © Cellular changes in radiation injury and its manifestation:

2. Haemostasis

- © Role of endothelium in thrombogenesis,
- © Arterial and venous thrombi,
- © Disseminated Intravascular coagulation

3. Shock:

- © Pathogenesis of hemorrhagic, neurogenic, septic, cardiogenic shock
- © Circulatory disturbances, ischemia hyperemia, venous congestion, edema infarction

4. Chromosomal abnormalities:

- © Marfan Syndrome, Ehler's Danlos Syndrome, Fragile X- Syndrome

5. Hypersensitivity:

- © Anaphylaxis, type 2 hypersensitivity, type 3 sensitivity and cell mediated reaction. And its clinical importance, systemic lupus erythematosus.
- © Infection and infective granulomas.

6. Neoplasia:

- © Classification of tumors.
- © Carcinogenesis and carcinogen- chemical, viral and microbial
- © Grading and staging of cancers, tumor Angiogenesis, Paraneoplastic syndrome, spread of tumors.
- © Characteristics of benign and malignant tumors

7. Others:

- © Sex linked alpha gamma globulinemia.
- © AIDS
- © Management of immune deficiency patients requiring surgical procedures
- © De George Syndrome
- © Ghon's complex, post primary pulmonary tuberculosis - pathology and pathogenesis.

8. Oral Pathology:

- © Developmental disturbances of oral and Para oral structures
- © Regressive changes of teeth.
- © Bacterial, viral and mycotic infections of oral cavity
- © Dental caries, diseases of pulp and periapical tissues
- © Physical and chemical injuries of the oral cavity
- © Oral manifestations of metabolic and endocrinal disturbances
- © Diseases of jawbones and TMJ
- © Diseases of blood and blood forming organs in relation to oral cavity
- © Cysts of the oral cavity © Salivary gland diseases © Role of laboratory investigations in oral surgery

9. Microbiology:

- © Immunity

- © Knowledge of organisms commonly associated with disease of oral cavity.
- © Morphology cultural characteristics of strepto, staphylo, pneumo, gono, meningo, Clostridium group of organism, spirochetes, organisms of TB, leprosy, diphtheria, actinomycosis and moniliasis
- © Hepatitis B and its prophylaxis
- © Culture and sensitivity test
- © Laboratory determinations
- © Blood groups, blood matching, RBC and WBC count
- © Bleeding and clotting time etc, smears and cultures,
- © Urine analysis and cultures. Applied Pharmacology and Therapeutics:
 1. Definition of terminologies used
 2. Dosage and mode of administration of drugs.
 3. Action and fate of drugs in the body
 4. Drug addiction, tolerance and hypersensitive reactions.
 5. Drugs acting on the CNS
 6. General and local anesthetics, hypnotics, analeptics, and tranquilizers.
 7. Chemo therapeutics and antibiotics
 8. Analgesics and antipyretics
 9. Antitubercular and antisyphilitic drugs.
 10. Antiseptics, sialogogues and antisialogogues
 11. Haematinics
 12. Antidiabetics
 13. Vitamins A, B-complex, C, D, E, K

Paper II: Minor Oral Surgery and Trauma

MINOR ORAL SURGERY

© Principles of Surgery: Developing a surgical diagnosis, basic necessities! Surgery, Aseptic Technique, Incisions, Flap Design Tissue handling, Haemostasis dead space management, decontamination and debridement, Suturing, Oedema control, patient general health and nutrition.

© Medical Emergencies: prevention and management of altered consciousness (syncope, orthostatic hypotension, seizures, diabetes mellitus, adrenal insufficiency hypersensitivity reactions, chest discomfort, and respiratory difficulty.

1. Examination and Diagnosis: clinical history, physical and radiographic, clinical and laboratory diagnosis, oral manifestations of systemic diseases, implications systemic diseases in surgical patients.
2. Haemorrhage and Shock : applied physiology, clinical abnormalities coagulation, extra vascular hemorrhage, and hemorrhagic lesions, management secondary hemorrhage, shock.
3. Exodontia: principles of extraction, indications and contraindications, types of extraction, complications and their management, principles of elevators and elevators used in oral surgery.
4. Impaction: surgical anatomy, classification, indications and contraindications, diagnosis, procedures, complications and their management.
5. Surgical Aids to Eruption Of Teeth: surgical exposure of unerupted teeth, surgical repositioning of partially erupted teeth.
6. Transplantation of Teeth

7. Surgical Endodontics : indications and contraindications, diagnosis, procedures of periradicular surgery
8. Procedures To Improve Alveolar soft tissues: requirements, types (alveoplasty, tuberosity reduction, mylohyoid ridge reduction, genial reduction, removal of exostosis, vestibuloplasty)
9. Procedures to Improve Alveolar soft Tissues: hypermobile tissues- operative / sclerosing method, epulis fissuratum, frenectomy and frenotomy
10. Infection of Head and Neck: Odontogenic and non Odontogenic infections, factors affecting spread of infection, diagnosis and differential diagnosis, management of facial space infections, Ludwig angina, cavernous sinus thrombosis.
11. Chronic Infections of the Jaws : Osteomyelitis (types, etiology, pathogenesis, management) osteoradionecrosis
12. Maxillary Sinus: maxillary sinusitis - types, pathology, treatment, closure of Oro - antral fistula. Caldwell- luc operation
13. Cysts of the Orofacial region: classification, diagnosis, management of OKC, dentigerous, radicular non Odontogenic, ranula
14. Neurological Disorders of the maxillofacial region: diagnosis and management of trigeminal neuralgia, MPDS, Bell's palsy, Frey's syndrome, nerve injuries.
15. Implantology: definition, classification, indications and contraindications, advantages and disadvantages, surgical procedure.
16. Anesthesia

Local Anesthesia: classification of local anesthetic drugs, modes of action indications and contraindications, advantages and disadvantages, techniques, complications and their management.

General Anesthesia: classification, stages of GA, mechanism of action, indications, and contraindications, advantages and disadvantages, post anesthetic complications and emergencies, anesthetic for dental procedures in children, pre medication, conscious sedation, legal aspects for GA
17. Trauma
18. Surgical Anatomy of head and Neck
19. Etiology of Injury
20. Basic Principles of Treatment
21. Primary Care: resuscitation, establishment of airway, management of hemorrhage, management of head injuries and admission to hospital.
22. Diagnosis: clinical, radiological
23. Soft Tissue Injury of Face and Scalp: classification and management of soft tissue wounds, injuries to structure requiring special treatment.
24. Dento Alveolar Fractures: examination and diagnosis, classification, treatment, prevention.
25. Mandibular Fractures: classification, examination and diagnosis, general principles of treatment, complications and their management
26. Fracture of Zygomatic Complex: classification, examination and diagnosis, general principles of treatment, complications and their management.
27. Orbital Fractures: blow out fractures
28. Nasal Fractures
29. Fractures of Middle third of the Facial Skeleton: emergency care, fractured maxilla, and treatment of Le Fort I, II, III, fractures of Naso orbito ethmoidal region.

30. Ophthalmic Injuries: minor injuries, non-perforating injuries, perforating injuries, retinobulbar hemorrhage, and traumatic optic neuropathy.
31. Traumatic Injuries to Frontal sinus: diagnosis, classification, treatment
32. Maxillofacial injuries in Geriatric and pediatric Patients
33. Gun shot wounds and War Injuries
34. Osseointegration in Maxillofacial Reconstruction
35. Metabolic response to Trauma: neuro endocrine responses, inflammatory mediators, clinical implications
36. Healing of Traumatic Injuries: soft tissues, bone, cartilage, response of peripheral nerve to injury
37. Nutritional Consideration following Trauma
38. Tracheostomy: indications and contraindications, procedure, complications and their management.

PAPER III :MAXILLOFACIAL SURGERY Salivary gland

- © Sialography
- © Salivary fistula and management
- © Diseases of salivary gland - developmental disturbances, cysts, inflammation and sialolithiasis
- © Mucocele and Ranula
- © Tumors of salivary gland and their management
- © Staging of salivary gland tumors
- © Parotidectomy

Temporomandibular Joint

- © Etiology, history signs, symptoms, examination and diagnosis of temporomandibular joint disorders
- © Ankylosis and management of the same with different treatment modalities
- © MPDS and management
- © Condylectomy - different procedures
- © Various approaches to TMJ
- © Recurrent dislocations - Etiology and Management

Oncology

- © Biopsy
- © Management of pre-malignant tumors of head and neck region
- © Benign and Malignant tumors of Head and Neck region
- © Staging of oral cancer and tumor markers
- © Management of oral cancer
- © Radical Neck dissection
- © Modes of spread of tumors
- © Diagnosis and management of tumors of nasal, paranasal, neck, tongue, cheek, maxilla and mandible
- © Radiation therapy in maxillofacial regions.
- © Lateral neck swellings

Orthognathic surgery

- © Diagnosis and treatment planning
- © Cephalometric analysis
- © Model surgery
- © Maxillary and mandibular repositioning procedures
- © Segmental osteotomies
- © Management of apertognathia
- © Genioplasty
- © Distraction osteogenesis

Cysts and tumor of oro facial region

- © Odontogenic and non-Odontogenic tumors and their management
- © Giant lesions of jawbone
- © Fibro osseous lesions of jawbone
- © Cysts of jaw

Laser surgery

- © The application of laser technology in surgical treatment of lesions Cryosurgery
- © Principles, applications of cryosurgery in surgical management of Cleft lip and palate surgery
- © Detailed knowledge of the development of the face, head and neck
- © Diagnosis and treatment planning
- © Current concepts in the management of cleft lip and palate deformity
- © Knowledge of Naso endoscopy and other diagnostic techniques in the evaluation of speech and hearing
- © Concept of multidisciplinary team management

Aesthetic facial surgery

- © Detailed knowledge of the structures of the face and neck including skin a underlying soft tissue
- © Diagnosis and treatment planning of deformities and conditions affecting facial skin
- © Underlying facial muscles, bone. Eyelids external ear
- © Surgical management of post acne scarring, facelift, blepharoplasty, otoplasty, facial bone recontouring, etc

Craniofacial surgery

- © Basic knowledge of developmental anomalies of the face, head and neck
- © Basic concepts in the diagnosis and planning of various head and neck anomalies including facial clefts, craniosynostosis, syndromes, etc.
- © Current concept in the management of Craniofacial anomalies

Monitoring Learning Progress

It is essential to monitor the learning progress to each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring to be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklists are given in Section IV

Scheme of Examination

A. Theory : 400 Mark

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows *:

Paper I : Applied Basic Sciences: Applied Anatomy, Physiology, Biochemistry, General and Oral Pathology and Microbiology and Pharmacology

Paper II : Minor Oral Surgery and Trauma

Paper III: Maxillofacial Surgery

Paper IV: Essay

B. Practical / Clinical Examination : 200 Marks .

Minor Oral Surgery -100 Marks

Each candidate is required to perform the minor oral surgical procedures under local anaesthesia. The minor surgical cases may include removal of impacted lower third molar, cyst enucleation, any similar procedure where students can exhibit their professional skills in raising the flap, removing the bone and suturing the wound.

(a) One long case - 60 marks

(b) Two short cases - 20 marks each

C. Viva Voce: 100 Marks

i. Viva-voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also. ii. Pedagogy Exercise: 20 marks

A topic be given to each candidate in the beginning of clinical examination. He/she is asked make a presentation on the topic for 8-10 minutes.

CONSERVATIVE DENTISTRY

Objectives

The following objectives are laid out to achieve the goals of the course. These are to be achieved by the time the candidate completes the course. These objectives may be considered under the following subtitles.

Knowledge

At the end of 36 months of training, the candidates should be able to:

© Describe aetiology, pathophysiology, periapical diagnosis and management of common restorative situations, endodontic situations that will include contemporary management of dental caries, management of trauma and pulpal pathoses including periodontal situations.

© Demonstrate understanding of basic sciences as relevant to conservative / restorative dentistry and Endodontics.

© Identify social, economic, environmental and emotional determinants in a given case or community and take them into account for planning and execution at individual and community level.

© Ability to master differential diagnosis and recognize conditions that may require multi disciplinary approach or a clinical situation outside the realm of the specialty, which he or she should be able to recognize and refer to appropriate specialist.

© Update himself by self-study and by attended basic and advanced courses, conferences, seminars, and workshops in the specialty of Conservative Dentistry- Endodontics-Dental Materials and Restorative Dentistry.

© Ability to teach, guide, colleagues and other students. Use information technology tools and carry out research both basic and clinical with the aim of his publishing his work and presenting the same at scientific platform

Skills

© Take proper chair side history, exam the patient and perform medical and dental diagnostic procedures and order as well as perform relevant tests and interpret to them to come to a reasonable diagnosis about the dental condition in general and Conservative Dentistry - Endodontics in particular. And undertake complete patient monitoring including preoperative as well as post operative care of the patient.

© Perform all levels of restorative work and surgical and non-surgical Endodontics including endodontic endosseous implants, as well as endodontic-periodontal surgical procedures as part of multidisciplinary approach to clinical condition.

© Provide basic life saving support in emergency situations.

© Manage acute pulpal and pulpo periodontal situations.

© Have a thorough knowledge of infection control measures in the dental clinical environment and laboratories.

Human Values, Ethical Practice and Communication Abilities

© Adopt ethical principles in all aspects of restorative and contemporary Endodontics" including non-surgical and surgical Endodontics. © Professional honesty and integrity should be the top priority.

© Dental care has to be provided regardless of social status, caste, creed or religion of the patient.

© Develop communication skills- in particular to explain various options available management and to obtain a true informed consent from the patient.

© Apply high moral and ethical standards while carrying on human or animal research. He / She shall not carry out any heroic procedures and must know his limitations in performing all aspects of restorative dentistry including Endodontics. Ask for help from colleagues or seniors

when required without hesitation O Respect patient's rights and privileges including patients right to information.

Course Contents

Paper 1:

Applied Anatomy of Head and Neck

© Development of face, paranasal sinuses and the associated structures and their anomalies, cranial and facial bones, TMJ anatomy and function, arterial and venous drainage of head and neck, muscles of face and neck including muscles of mastication and deglutition, brief consideration of structures and function of brain. Brief consideration of all cranial nerves and autonomic nervous system of head and neck. Salivary glands, Functional anatomy of mastication, deglutition and speech. Detailed anatomy of deciduous and permanent teeth, general consideration in physiology of permanent dentition, form, function, alignment, contact, occlusion.)

© Internal anatomy of permanent teeth and its significance

© Applied histology, histology of skin, oral mucosa, connective tissue, bone cartilage, blood vessels, lymphatics, nerves, muscles, tongue.

Development of Teeth

© Enamel - development and composition, physical characteristics, chemical properties, structure

© Age changes - clinical structure

© Dentin - development, physical and chemical properties, structure type of dentin, innervations, age and functional changes.

© Pulp - development, histological structures, innervations, functions, regressive changes, clinical considerations.

© Cementum - composition, cementogenesis, structure, function, clinical consideration.

© Periodontal ligament - development, structure, function and clinical consideration.

© Salivary glands - structure, function, clinical considerations.

Applied Physiology

© Mastication, deglutition, digestion and assimilation, fluid and electrolyte balance.

© Blood composition, volume, function, blood groups, haemostasis, coagulation, blood transfusion, circulation, heart, pulse, blood pressure, shock, respiration, control, anoxia, hypoxia, asphyxia, artificial respiration, and endocrinology - general principles of endocrine activity and disorders relating to pituitary, thyroid, parathyroid, adrenals including pregnancy and lactation.

© Physiology of saliva - composition, function, clinical significance.

© Clinical significance of vitamins, diet and nutrition - balanced diet.

© Physiology of pain, sympathetic and Para sympathetic nervous system, pain pathways, physiology of pulpal pain, Odontogenic and non Odontogenic pain, pain disorders - typical and atypical, biochemistry such as osmotic pressure, electrolytic dissociation, oxidation, reduction etc., carbohydrates, proteins, lipids and their metabolism, nucleoproteins, nucleic acid and their metabolism. Enzymes, vitamin and minerals, metabolism of inorganic elements, detoxification in the body, anti metabolites, chemistry of blood lymph and urine.

Pathology

© Inflammation, repair, degeneration, necrosis and gangrene.

- © Circulatory disturbances - ischemia, hyperemia, edema, thrombosis, embolism, infarction, allergy and hypersensitivity reaction.
- © Neoplasms - classifications of tumors, characteristics of benign and malignant tumors, spread tumors.
- © Blood dyscrasias
- © Developmental disturbances of oral and Para oral structures, dental caries, regressive changes of teeth, pulp, periapical pathology, pulp reaction to dental caries and dental procedures.
- © Bacterial, viral, mycotic infections of the oral cavity.

Microbiology

- © Pathways of pulpal infection, oral flora and micro organisms associated with endodontic diseases, pathogenesis, host defense, bacterial virulence factors, healing, theory of focal infections, microbes or relevance to dentistry - strepto, staphylococci, lactobacilli, comyebacterium, actinomycetes, Clostridium, neisseria, vibrio, bacterioids, fusobacteria, spirochetes, mycobacterium, virus and fungi.
- © Cross infection, infection control, infection control procedure, sterilization and disinfection.
- © Immunology - antigen antibody reaction, allergy, hypersensitivity and anaphylaxis, auto immunity, grafts, viral hepatitis, HIV infections and aids. Identification and isolation of microorganisms from infected root canals. Culture medium and culturing technique (Aerobic and anaerobic interpretation and antibiotic sensitivity test).

Pharmacology

- © Dosage and route of *administration of drugs, actions and fate of drug in body, drug addiction, tolerance of hypersensitivity reactions.*
- © Local anesthesia - *agents and chemistry, pharmacological actions, fate and metabolism of anaesthetic, ideal properties, techniques and complications.*
- © General anesthesia - *pre medications, neuro muscular blocking agents, induction agents, inhalation anesthesia, and agents used, assessment of anesthetic problems in medically compromised patients.*
- © *Anaesthetic emergencies*
- © *Antihistamines, corticosteroids, chemotherapeutic and antibiotics, drug resistance, haemostasis, and haemostatic agents, anticoagulants, sympathomimetic drugs, vitamins and minerals (A, B, C, D, E, K IRON), anti sialogogue, immunosuppressants, drug interactions, antiseptics, disinfectants, anti viral agents, drugs acting on CNS.*

Biostatistics

- © *Introduction, Basic concepts, Sampling, Health information systems - collection, compilation, presentation of data. Elementary statistical methods - presentation of statistical data, Statistical averages - measures of central tendency, measures of dispersion, Normal distribution. Tests of significance - parametric and non - parametric tests (Fisher exact test, Sign test, Median test, Mann Whitney test, Krusical Wallis one way analysis, Friedmann two way analysis, Regression analysis), Correlation and regression, Use of computers.*

Research Methodology

- © *Essential features of a protocol for research in humans*
- © *Experimental and non-experimental study designs*
- © *Ethical considerations of research*

Applied Dental Materials

© *Physical and mechanical properties of dental materials, biocompatibility.*

© *Impression materials, detailed study of various restorative materials, restorative resin and recent advances in composite resins, bonding- recent developments- tarnish and corrosion, dental amalgam, direct filling gold, casting alloys, inlay wax, die materials, investments, casting procedures, defects, dental cements for restoration and pulp protection (luting, liners, bases) cavity varnishes.*

© *Dental ceramics-recent advances, finishing and polishing materials.* © *Dental burs - design and mechanics of cutting - other modalities of tooth preparation.* © *Methods of testing biocompatibility of materials used.*

Paper II: Conservative Dentistry

1. *Examination, diagnosis and treatment plan*

2. *Occlusion as related to conservative dentistry, contact, contour, its significance. Separation of teeth, matrices, used in conservative dentistry.*

3. *Dental caries- epidemiology, recent concept of etiological factors, pathophysiology, Histopathology, diagnosis, caries activity tests, prevention of dental caries and management - recent methods.*

4. *Hand and rotary cutting instruments, development of rotary equipment, speed ranges hazards.*

5. *Dental burs and other modalities of tooth preparation- recent developments (air abrasions, lasers etc)*

6. *Infection control procedures in conservative dentistry, isolation equipments etc.*

7. *Direct concepts in tooth preparation for amalgam, composite, GIC and restorative techniques, failures and management.*

8. *Direct and indirect composite restorations.*

9. *Indirect tooth colored restorations- ceramic, inlays and onlays, veneers, crowns, recent advances in fabrication and materials.*

a. Tissue management

10. *Impression procedures used for direct restorations.*

11. *Cast metal restorations, indications, contraindications, tooth preparation for class I inlay, Onlay full crown restorations.*

Restorative techniques, direct and indirect methods of fabrication including materials used for fabrication like inlay wax, investment materials and

12. *Direct gold restorations.*

13. *Recent advances in restorative materials and procedures.*

14. *Management of non-carious lesion.*

15. *Advance knowledge of minimal intervention dentistry.*

16. *Recent advances in restoration of endodontically treated teeth and grossly mutilated teeth*

17. *Hypersensitivity, theories, causes and management.*

18. *Lasers in Conservative Dentistry*

19. *CAD-CAM & CAD-CIM in restorative dentistry*

20. *Dental imaging and its applications in restorative dentistry (clinical photography)*

21. *Principles of esthetics*

- Facial analysis
- Smile design
- Principles of esthetic integration
- Treatment planning in esthetic dentistry

Paper III:
Endodontics

1. Rationale of endodontics.
2. Knowledge of internal anatomy of permanent teeth, anatomy of root apex and its implications in endodontic treatment.
3. Dentin and pulp complex.
4. Pulp and periapical pathology
5. Pathobiology of periapex.
6. Diagnostic procedure - recent advances and various aids used for diagnosis-
 - a. Orofacial dental pain emergencies: endodontic diagnosis and management
7. Case selection and treatment planning
8. Infection control procedures used in endodontics (aseptic techniques such as rubber dam, sterilization of instruments etc.)
9. Access cavity preparation - objectives and principles
10. Endodontic instruments and instrumentation - recent developments, detailed description of hand, rotary, sonic, ultra sonic etc..
11. Working length determination / cleaning and shaping of root canal system and recent development in techniques of canal preparation.
12. Root canal irrigants and intra canal medicaments used including non - surgical endodontics by calcium hydroxide.
13. Endodontic microbiology.
14. Obturating materials, various obturation techniques and recent advances in obturation of root canal.
15. Traumatic injuries and management - endodontic treatment for young permanent teeth. Pediatric endodontics - treatment of immature apex.
16. Endodontic surgeries, recent developments in technique and devices, endosseous endodontic implants - biology of bone and wound healing.
17. Endoperio interrelationship, endo + Perio lesion and management
18. Drugs and chemicals used in endodontics
19. Endo emergencies and management.
20. Restoration of endodontically treated teeth, recent advances.
21. Geriatric endodontics
22. Endo emergencies and management.
23. Biologic response of pulp to various restorative materials and operative procedures.
24. Lasers in endodontics.
25. Multidisciplinary approach to endodontic situations.
26. Endodontic radiology- digital technology in endodontic practice.
27. Local anesthesia in endodontics.
28. Procedural errors in endodontics and their management.
29. Endodontic failures and retreatment.

30. Resorptions and its management.
31. Microscopes in endodontics.
32. Single visit endodontics, current concepts and controversies.

Teaching / Learning Activities The following is the minimum required to be completed before the candidate can be considered eligible to appear for final MDS exam.

First Year

Pre Clinical Work - Operative and Endodontics

Preclinical work on typodont teeth

- | | |
|--|------|
| 1. Class 2 amalgam cavities | |
| a. Conservative preparation | - 03 |
| b. Conventional preparation | - 03 |
| 2. Inlay cavity preparation on premolars | - 10 |
| And molars - MO, DO, MOD | - 06 |
| a. Wax pattern | - 04 |
| b. Casing | - 02 |
| 3. Onlay preparation on molars a. Casting | - 01 |
| 4. Full Crown | |
| a. Anterior | 05 |
| b. Posterior | 05 |
| (2 each to be processed) | - 02 |
| 5. 7/8 crown (1 to be processed) | - 02 |
| 6. 3/4 crown premolars (1 to be processed) | - 02 |

Pre Clinical work on natural teeth

- | | |
|--|----|
| 1. Inlay on molars and premolars MO, DO, and MOD | 08 |
| a. Casting | 02 |
| b. Wax pattern | 02 |
| 2. Amalgam cavity preparation | |
| a. Conventional | 02 |
| b. Conservative | 02 |
| 3. Pin retained amalgam on molar teeth | 02 |
| 4. Post and core build up | |
| Anterior teeth | 10 |
| Posterior teeth | 05 |
| 5. Casting | |
| Anterior | 04 |
| Posterior | 02 |
| 6. Onlay on molars | 03 |
| (1 to be processed) | |
| 7. Full crown premolars and molars | 04 |
| 8. Full crown anterior | 06 |

(2 and 3 to be processed)

9. Veneers anterior teeth (indirect method) 02

10. Composite inlay (class 2) 03

11. Full tooth wax carving - all permanent teeth

Endodontics

1. Sectioning of all maxillary and mandibular teeth.

2. Sectioning of teeth - in relation to deciduous molar, 2nd primary upper and lower molar 1 each

3. Access cavity opening and root canal therapy in relation to maxillary and mandibular permanent teeth

4. Access cavity preparation and BMP Anterior

a. Conventional prep

b. Step back

c. Crown down

Obturation

03

5. BMP Premolar 06 (2 upper and 2 lower) obturation 1 each

6. BMP Molar 06 (3 upper - 2 first molars and 1 second molar, 3 lower - 2 first molars and 1 second molar) obturation 1 each

7. Post and core preparation and fabrication in relation to anterior and posterior teeth

a. Anterior 10 (casting 4)

b. Posterior 05 (casting 2)

8. Removable dies 04

Note: Technique work to be completed in the first four months

Clinical work

A Composite restorations 30

B GIC Restorations 30

C Complex amalgam restorations 05

D Composite inlay + veneers
(direct and indirect) 05

E Ceramic jacket crowns 05

F Post and core for anterior teeth 05

G Bleaching
vital 05

Non vital 05

H. RCT Anterior 20

I. Endo surgery - observation and assisting 05

Presentation of

© Seminars - 5 seminars by each student - should include topics in dental conservative dentistry and endodontics

© Journal clubs - by each student

© Submission of synopsis at the end of 6 months

© Library assignment work

© Internal assessment - theory and clinicals.

Second Year

Case discussion-5

1	Ceramic jacket crowns	10
2	Post and core for anterior teeth	10
3	Post and core for posterior teeth	05
4	Composite restoration	05
5	Full crown for posterior teeth	15
6	Cast gold inlay	05
7	Other special types of work such as splinting- Reattachment of fractured teeth etc.	05
8	Anterior RCT	20
9	Posterior RCT	30
10	Endo surgery performed independently	05
11	Management of endo - Perio problems	05
©	Under graduate teaching program as allotted by the HOD	
©	Seminars - 5 by each student	
©	Journal club - 5 by each student	
©	Dissertation work	
©	Prepare scientific paper and present in conference and clinical meeting	
©	Library assignment to be submitted 18 months after starting of the course	
©	Internal assessment - theory and clinical	

Third Year

Dissertation work to be submitted 6 months before final examination.

Clinical work

© Cast gold inlay- Onlay, cuspal restoration	10
© Post and core	
© Molar endodontics	20
© Endo surgery	50
All other types of surgeries including crown lengthening, perioesthetics, hemi sectioning, splinting, replantation, endodontic implants.	05

Presentation of

©	Seminars
©	Journal club
	Teaching - lecture (under graduates)
©	Internal assessment - theory and clinical

Monitoring Learning Progress

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklists are given in Section IV.

Scheme of Examination

A. Theory

SCHEME OF EXAMINATION:

A. Theory : 300 Marks

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long

questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows: *

PAPER-I : Applied Basic Sciences: Applied Anatomy, Physiology, Pathology including Oral Microbiology, Pharmacology, Biostatistics and Research Methodology and Applied Dental Materials.

PAPER-II : Conservative Dentistry

PAPER-III: Endodontics

PAPER-IV: Essay

B. Clinical 200 Marks

The duration of Clinical and Viva Voce examination will be 2 days for a batch of four students. If the number of candidates exceeds 4, the programme can be extended to 3rd day.

Day 1

Clinical Exercise I - 50 Marks

Cast core preparation

- (i) Tooth Preparation - 10 marks
- (ii) Direct Wax Pattern - 10 marks
- (iii) Casting - 10 marks
- (iv) Cementation - 10 marks
- (v) retention & Elastomeric Impression - 10 marks

Clinical Exercise II - 50 Marks

(inlay Exercise)

- (i) Tooth preparation for Class II Gold Inlay-25 marks
- (ii) Fabrication of Direct Wax Pattern- 25 marks

Day 2

Clinical Exercise III - 100 Marks

(Molar Endodontics)

- (i) Local Anesthesia and Rubber Dam application-20 marks
- (ii) Access Cavity- 20 marks
- (iii) Working length determination-20 marks
- (iv) Canal Preparation- 20 marks
- (v) Master cone selection-20 marks

C. Viva Voce : 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic is given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes.

Day 3:

Viva-Voce (Continued if more than 4 students are taking examination or shortage of time on 2nd day)

ORTHODONTICS & DENTOFACIAL ORTHOPAEDICS

Objectives

The training programme in Orthodontics is to structure and achieve the following four objectives

Knowledge of

1. The dynamic interaction of biologic processes and mechanical forces acting on the stomatognathic system during orthodontic treatment
2. The etiology, pathophysiology, diagnosis and treatment planning of various common Orthodontic problems
3. Various treatment modalities in Orthodontics preventive interceptive and corrective.
4. Basic sciences relevant to the practice of Orthodontics
5. Interaction of social, cultural, economic, genetic and environmental factors and their relevance to management of oro - facial deformities
6. Factors affecting the long-range stability of orthodontic correction and their management
7. Personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste, keeping in view the high prevalence of Hepatitis and HIV and other highly contagious diseases.

Skills

1. To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures, and interpret them and arrive at a reasonable diagnosis about the Dentofacial deformities.
2. To be competent to fabricate and manage the most appropriate appliance - intra or extra oral, removable or fixed, mechanical or functional, and active or passive - for the treatment of any orthodontic problem to be treated singly or as a part of multidisciplinary treatment of orofacial deformities.

Attitudes:

1. Develop an attitude to adopt ethical principles in all aspects of Orthodontic practice.
2. Professional honesty and integrity are to be fostered
3. Treatment care is to be delivered irrespective of the social Status, cast, creed or colleagues
4. Willingness to share the knowledge and clinical experience with professional colleagues
5. Willingness to adopt, after a critical assessment, new methods and techniques of orthodontic management developed from time to time based on scientific research, which are in the best interest of the patient
6. Respect patients rights and privileges, including patients right to information and right to seek a second opinion
7. Develop attitude to seek opinion from allied medical and dental specialists as and when required

Communication skills

1. Develop adequate communication skills particularly with the patients giving them various options available to manage a particular Dentofacial problem and to obtain a true informed consent from them for the most appropriate treatment available at that point of time.
2. Develop the ability to communicate with professional colleagues, in Orthodontics or other specialities through various media like correspondence, Internet, e-video, conference, etc. To render the best possible treatment.

Course Content

The program outlined, addresses both the knowledge needed in Orthodontics and allied Medical specialities in its scope. A minimum of three years of formal training through a graded system of education as specifies, will equip the trainee with skill and knowledge at its completion to be able

to practice basic Orthodontics and have the ability to intelligently pursue further apprenticeship towards advanced Orthodontics.

Spread of the Curriculum

Six months teaching of basic subjects including completion of pre - clinical exercises 2 ft years of coverage of all the relevant topics in Orthodontics, clinical training involving treatment of patients and submission of dissertation. These may be divided into blocks of 6 to 8 months duration each, depending on the training policies of each institution.

I. Applied Anatomy:

© Prenatal growth of head:

Stages of embryonic development, origin of head, origin of face, origin of teeth.

© Postnatal growth of head:

Bones of skull, the oral cavity, development of chin, the hyoid bone, general growth of head, face growth.

© Bone growth:

Origin of bone, composition of bone, units of bone structure, schedule of Ossification, mechanical properties of bone, roentgen graphic appearance of bone

© Assessment of growth and development:

Growth prediction, growth spurts, the concept of normality and growth increments of growth, differential growth, gradient of growth, methods of gathering growth data. Theories of growth and recent advances, factors affecting physical growth.

© Muscles of mastication:

Development of muscles, muscle change during growth, muscle function facial development, muscle function and malocclusion

© Development of dentition and occlusion:

Dental development periods, order of tooth eruption, chronology of permanent tooth formation, periods of occlusal development, pattern of occlusion.

© Assessment of skeletal age

The carpal bones, carpal x - rays, cervical vertebrae II

Physiology

© Endocrinology and its disorders

(Growth hormone, thyroid hormone, parathyroid hormone, ACTH) pituitary gland hormones, thyroid gland hormones, parathyroid gland hormones

© Calcium and its metabolism

© Nutrition-metabolism and their disorders: proteins, carbohydrates, fats, vitamins and minerals.

© Muscle physiology

© Craniofacial Biology: cell adhesion molecules and mechanism of adhesion

© Bleeding disorders in orthodontics: Hemophilia

III Dental materials:

© Gypsum products: dental plaster, dental stone and their properties, setting reaction etc.

© Impression materials: impression materials in general and particularly of alginate impression material.

© Acrylics: chemistry, composition physical properties

© Composites: composition types, properties setting reaction

- © Banding and bonding cements: Zn (P04)2, zinc silicophosphate, Zinc polycarboxylate, resin cements and glass ionomer cements
- © Wrought metal alloys: deformation, strain hardening, annealing, recovery, recrystallization, grain growth, properties of metal alloys
- © Orthodontic arch wires: stainless steel gold, wrought cobalt chromium nickel alloys, alpha&beta titanium alloys
- © Elastics: Latex and non-latex elastics.
- © Applied physics, Bioengineering and metallurgy.
- © Specification and tests methods used for materials used in Orthodontics
- © Survey of all contemporary literature and Recent advances in above - mentioned materials.

IV. Genetics:

- © Cell structure, DNA, RNA, protein synthesis, cell division
- © Chromosomal abnormalities © Principles of orofacial genetics •
- © Genetics in malocclusion
- © 5 Molecular basis of genetics
- © Studies related to malocclusion
- © Recent advances in genetics related to malocclusion
- © Genetic counseling
- © Bioethics and relationship to Orthodontic management of patients.

V Physical Anthropology:

- © Evolutionary development of dentition
- © Evolutionary development of jaws.

VI Pathology:

- © Inflammation
- © Necrosis

VII Biostatistics:

- © Statistical principles
- © Data Collection
- © Method of presentation
- © Method of Summarizing
- © Methods of analysis - different tests/errors
- © Sampling and Sampling technique
- © Experimental models, design and interpretation
- © Development of skills for preparing clear concise and cogent scientific abstracts and publication

VIII. Applied research methodology in Orthodontics

- © Experimental design
- © Animal experimental protocol
- © Principles in the development, execution and interpretation of **methodologies in** Orthodontics
- © Critical Scientific appraisal of literature.

IX. Applied Pharmacology:

X. Orthodontic history:

- © Relationship of TMJ anatomy and pathology and related neuromuscular physiology.

XII. Etiology and Classification of malocclusion:

© A comprehensive review of the local and systemic factors in the causation of malocclusion

© Various classifications of malocclusion

XIII. Dentofacial Anomalies:

© Anatomical, physiological and pathological characteristics of major groups of developmental defects of the orofacial structures.

XIV. Child and Adult Psychology:

© Stages of child development.

© Theories of psychological development.

© Management of child in orthodontic treatment.

© Management of handicapped child.

© Motivation and Psychological problems related to malocclusion / orthodontics

© Adolescent psychology

© Behavioral psychology and communication

XV. Diagnostic procedures and treatment planning in orthodontics

© Emphasis on the process of data gathering, synthesis and translating it into a treatment plan

© Problem cases - analysis of cases and its management

© Adult cases, handicapped and mentally retarded cases and their special problems

© Critique of treated cases. Cephalometrics

© Instrumentation

© Image processing

© Tracing and analysis of errors and applications

© Radiation hygiene

© Advanced Cephalometrics techniques

© Comprehensive review of literature

© Video imaging principles and application.

XVII. Practice management in Orthodontics

© Economics and dynamics of solo and group practices

© Personal management

© Materials management

© Public relations

© Professional relationship

© Dental ethics and jurisprudence

© Office sterilization procedures

© Community based Orthodontics.

XVIII. Clinical Orthodontics

Myofunctional Orthodontics:

© Basic principles

© Contemporary appliances - their design and manipulation

© Case selection and evaluation of the treatment results

© Review of the current literature.

Dentofacial Orthopedics

© Principles

© Biomechanics

© Appliance design and manipulation

© Review of contemporary literature

Cleft lip and palate rehabilitation:

© Diagnosis and treatment planning

© Mechanotherapy

© Special growth problems of cleft cases

© Speech physiology, pathology and elements of therapy as applied to orthodontics

© Team rehabilitative procedures.

Biology of tooth movement:

© Principles of tooth movement-review

© Review of contemporary literature

© Applied histophysiology of bone, periodontal ligament

© Molecular and ultra cellular consideration in tooth movement

Orthodontic / Orthognathic surgery:

© Orthodontist' role in conjoint diagnosis and treatment planning

© Pre and post-surgical Orthodontics

© Participation in actual clinical cases, progress evaluation and post retention study

© Review of current literature

Ortho / Perio / Prostho inter relationship

© Principles of interdisciplinary patient treatment © Common problems and their management

Basic principles of Mechanotherapy Includes Removable appliances and fixed appliances

© Design

© Construction

© Fabrication

© Management

© Review of current literature on treatment methods and results

Applied preventive aspects in Orthodontics

© Caries and periodontal disease prevention

© Oral hygiene measures

© Clinical procedures

Interceptive Orthodontics

© Principles

© Growth guidance

© Diagnosis and treatment planning

© Therapy emphasis on:

a. Dento-facial problems

b. Tooth material discrepancies

c. Minor surgery for Orthodontics

Retention and relapse

© Mechanotherapy - special reference to stability of results with various procedures

© Post retention analysis

© Review of contemporary literature

XIX. Recent advances like:

© Use of implants

- © Lasers
- © Application of F.E.M.
- © Distraction Osteogenesis

Skills:

II. Pre - Clinical Exercises

A general outline of the type of exercises is given here. Every institution can decide the details of exercises under each category.

1. General Wire bending exercises to develop the manual dexterity.
2. Clasps, Bows and springs used in the removable appliances.
3. Soldering and welding exercises.
4. Fabrication of removable habit breaking, mechanical and functional appliances, also all types of space maintainers and space regainers.
5. Bonwill Hawley Ideal arch preparation.
6. Construction of orthodontic models trimmed and polished preferably as per specifications of Tweed or A.B.O.
7. Cephalometric tracing and various Analyses, also superimposition methods -
8. Fixed appliance orthodontic exercises.

a) Training shall be imparted in one basic technique i.e. Standard Edgewise / Begg technique or its derivative / Straight wire etc., with adequate exposure to other techniques.

b) Orthodontic exercise

- i. Band making
- ii. Bracket positioning and placement
- iii. Different stages in treatment appropriate to technique taught
9. Clinical photography
10. Computerized imaging
11. Preparation of surgical splints, and splints for TMJ problems.
12. Handling of equipments like vacuum forming appliances and hydro solder etc

First Year

I. Basic Pre-Clinical Exercise Work for the MDS Students:

First 6 Months

1. Non-appliance exercises

All the following exercises should be done with 0.7 or 0.8mm wire

Sl. No.	Exercise	No.
1	Straightening of 6" & 8" long wire	1 each
2	Square	1
3	Rectangle	1
4	Triangle of 2" side	1
5	Circle of 2" side	1
6	Bending of 5U's	1
7	Bending of 5V's	1

2. Clasps

Sl. No	Exercise	No.
1	$\frac{3}{4}$ Clasps	2
2	Full clasps	2
3	Triangular Clasps	2
4	Adam's clasp - upper molar	2
5	Adam's Clasp - lower molar	2
6	Adam's Clasp - Pre-molar	2
7	Adam's Clasp - Incisor	2
8	Modification of Adam's - With Helix	2
9	Modification of Adam's - With distal extension	2
10	Modification of Adam's - With soldered tube	2
11	Duyzing Clasps on Molars	2
12	Southend Clasp	1

3. LABIAL BOWS

SL NO	EXERCISE	NO
1	Short labial bow (upper & lower)	1
2	Long labial bow (upper & lower)	1
3	Robert's retractor	1
4	High labial bow-with apron spring's	1
5	Mill's labial bow	1
6	Reverse loop labial bow	1
7	Retention labial bow soldered to Adam's clasp	1
8	Retention labial bow extending distal to second molar	
9	Fitted labial bow	
10	Split high labial bow	1

4. SPRINGS

SL NO	EXERCISE	NO
-------	----------	----

1	Finger spring-mesial movement	2
2	Finger spring-distal movement	2
3	Double cantilever spring	2
4	Flapper spring	2
5	Coffin spring	2
6	T spring	2

5. CANINE RETRACTORS

SL NO	EXERCISE	NO
1	u loop canine retractor	2PAIRS
2	Helical canine retractor	2PAIRS
3	Palatal canine retractor	2PAIRS
4	Self -supporting canine retractor	2PAIRS
5	Self -supporting canine retractor	2PAIRS

6. Appliances

SL NO	EXERCISE
1	Hawley's retention appliance with anterior bite plane
2	Upper Hawley's appliance with posterior bite plane
3	Upper expansion appliance with coffin spring
4	Upper expansion appliance with coffin spring
5	Upper expansion appliance with expansion screw
6	Habit breaking appliance with tongue crib
7	Oral screen and double oral screen
8	Lip bumper
9	Splint for Bruxism
10	Catalans appliance
11	Activator
12	Bionator

13	Frankel-FR 2 appliance
14	Twin block
15	Lingual arch
16	TPA
17	Quad helix
18	Bihelix
19	Utility arches
20	Pendulum appliance

7. Soldering exercises

Sl.No.	Exercise	No.
1	Star	1
2	Comb	1
3	Christmas tree .	1
4	Soldering buccaltube on molar bands	1

8. Welding exercises

Sl.No.	Exercise
1	Pinching and welding of molar, premolar, canine and Incisor bands
2	Welding of buccal tubes and brackets on molar bands and incisor bands

9. Impression of upper and lower arches in alginate

10. Study model preparation

11. Model analysis

Sl. No.	EXERCISE
1	Impression of upper and lower dental arches
2	PREPARATION OF STUDY MODEL - 1 And all the permanent dentition analyses to be done.
3	PREPARATION OF STUDY MODEL - 2 And all the permanent dentition analyses to be done.
4	PREPARATION OF STUDY MODEL - 3 And all the mixed dentition analyses to be done.

12. Cephalometrics

Sl. No.	EXERCISE
1	Lateral cephalogram to be traced in five different colors and super imposed to see the accuracy of tracing
2	Steiner's analysis
3	Down's analysis
4	Tweed analysis
5	Rickett's analysis
6	Burrstone analysis
7	Rakosi's analysis
8	Mc Namara analysis
9	Bjork analysis
10	Coben's analysis
11	Harvold's analysis
12	Soft tissue analysis - Holdaway and Burstone

13. Basics of Clinical Photography including Digital Photography

14. Light wire bending exercises for the Begg technique

Sl. No.	Exercise
1	Wire bending technique on 0.016' wire circle "Z" Omega
2	Bonwill-Hawley diagram
3	Making a standard arch wire
4	Inter maxillary hooks- Boot leg and Inter Maxillary type
5	Upper and Lower arch wire
6	Bending a double back arch wire
7	Bayonet bends (vertical and horizontal offsets)
8	Stage-III arch wire
9	Torquing auxiliary (upper)
10	Reverse Torquing (lower)
11	Up righting spring

15. Typhodont exercises

- Teeth setting in Class-II division I malocclusion with maxillary anterior proclination and mandibular anterior crowding
- Band pinching, welding brackets and buccal tubes to the bands
- Stage-I
- Stage-II
- Pre Stage-I

6. Stage-III

CLINICAL WORK:

Once the basic pre-clinical work is completed the students can take up clinical cases and W clinical training is for the two and half years.

Each postgraduate student should start with a minimum of 50 cases of his/her own. Additionally he / she should handle a minimum of 20 transferred cases.

The type of cases can be as follows:

- i. Removable active appliances-5cases
- ii. Class-I malocclusion with Crowding
- iii. Class-I malocclusion with bi-maxillary protrusion
- iv. Class-II division-1
- v. Class-II division-2
- vi. Class-III (Orthopedic, Surgical, Orthodontic cases)
- vii. Inter disciplinary cases
- viii. Removable functional appliance cases like activator, Bionator, functional regulator, twin block and new developments
- ix. Fixed functional appliances - Herbst appliance, jasper jumper etc - 5 cases
- x. Dento-facial orthopedic appliances like head gears, rapid maxillary expansion niti expander etc., - 5 cases
- xi. Appliance for arch development such as molar distalization -m 5 cases
- xii. Fixed mechano therapy cases (Begg, PEA, Tip edge, Edgewise)
Retention procedures of above treated cases.

Other work to be done during FIRST YEAR

1. **Seminars:** One Seminar per week to be conducted in the department. A minimum of five seminars should be presented by each student each year
2. **Journal club:** One Journal club per week to re conducted in the department. A minimum of five seminars should be presented by each student each year
3. Protocol for dissertation to be submitted on or before the end of six months from the date of admission.
4. **Under graduate classes:** Around 4 - 5 classes should be handled by each post-graduate student
5. **Field survey:** To be conducted and submit the report
6. **Inter-departmental meetings:** should be held once in a month.
7. **Case discussions**
8. **Field visits:** To attend dental camps and to educate the masses
9. **Basic subjects classes**
10. **Internal assessment or Term paper**

Second Year:

The clinical cases taken up should be followed under the guidance. More case discussions and cases to be taken up. Other routine work as follows.

1. **Seminars:** One Seminar per week to be conducted in the department. Each student should present a minimum of five seminars each year.

2. Journal club: One Journal club per week to be conducted in the department. Each student should present a minimum of five seminars each year.
3. Library assignment to be submitted on or before the end of six months.
4. Undergraduate classes: each post-graduate student should handle Around 4-5 classes.
5. Inter-departmental meetings: Should be held once in a month
6. Case discussions
7. Field visits: To attend dental camps and to educate the masses.
8. Internal assessment or term paper.
9. Dissertation work: On getting the approval from the university work for the dissertation to be started.

Third Year:

The clinical cases taken up should be followed under the guidance. More cases discussions

and cases to be taken up. Other routine work as follows:

- 1. Seminars:** One Seminar per week to be conducted in the department. E student should present a minimum of five seminars each year.
- 2. Journal Club:** One Journal club per week to be conducted in the departments minimum of five seminars should be presented by each student each year
- 3. Under graduate classes:** each post - graduate student, should handle Around 4-5 classes.
- 4. Inter-departmental meetings:** Should be held once in a month.
- 5. The completed dissertation should be submitted six months before the final examination**
- 6. Case discussions**
- 7. Field visits:** To attend dental camps and to educate the masses.
- 8. Finishing and presenting the cases taken up.**
- 9. Preparation of finished cases and presenting the cases (to be presented for the examination)**
- 10. Mock examination**

Dissertation:

- a. The protocol for dissertation should be submitted on or before the end of six months from the date of admission as per calendar of events to the Registrar, Rajiv Gandhi University of Health Sciences, Karnataka, through proper channel.
- b. The completed dissertation should be submitted 6 months before the final examination as per calendar of events to the Registrar (Evaluation), Rajiv Gandhi University of Health Sciences, Karnataka, through proper channel.
- c. The dissertation should not be just a repetition of a previously undertaken study should try to explore some new aspects.
- d. Approval of dissertation is essential before a candidate appears for the Univ examination.

Monitoring Learning Progress

It is essential to monitor the learning progress of each candidate through continuous app and regular assessment. It not only helps teachers to evaluate students, but also

students to evaluate themselves. The monitoring be done by the staff of the department^ participation of students in various teaching / learning activities. It may be structured assessment be done using checklists that assess various aspects. Checklists are given in Section IV.

Scheme of Examination: Theory : 300 Marks

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be-on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows: *

Paper-I: Applied Basic Sciences: Applied anatomy, Physiology, Dental Materials, Genetics, Pathology, Physical Anthropology, Applied Research methodology, Bio-Statistics and Applied Pharmacology.

Paper II: Orthodontic history, Concepts of occlusion and esthetics, Child and Adult Psychology, Etiology and classification of malocclusion, Dentofacial Anomalies, Diagnostic procedures and treatment planning in Orthodontics, Practice management in Orthodontics

Paper III: Clinical Orthodontics

Paper IV : Essay

* The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical / Clinical Examination : 200 Marks

Exercise No: 1 Functional Case : 50 Marks

Selection of case for functional appliance and recording of construction bite. Fabrication and delivery of the appliance the next day.

Exercise No: 2 Multiband exercise 50 Marks

1. III stage with auxiliary springs

OR

2. Bonding of SWA brackets and construction of suitable arch wire.

Exercise No. 3 Display of records of the treated cases (minimum of 5 cases)

5 cases * 15 marks = 75 Marks

Exercise No:4 long case discussions:25 Marks

No	Exercise	Marks allotted	Approximate time
1	Functional appliance	50	1 hour 1 hour
2	III stage mechanics/ Bonding an arch wire fabrication	50	1 hour 30 min
3	Display of case records (a minimum of 5 cases to be presented with all the cases)	75	1 hour
4	Long cases	25	2 hours

C Viva Voce : 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach expression, interpretation of data and communication skills. It

includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic is given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes.

ORAL PATHOLOGY AND MICROBIOLOGY

Objectives:

- © To train a post graduate dental surgeon so as to ensure higher competence in both general and special pathology dealing with the nature of oral diseases, their causes, processes and effects.
- © An oral pathologist is expected to perform routine histopathological evaluation of specimens relating to oral and perioral tissues, to carry out routine diagnostic procedures including hematological, cytological, microbiological, Immunological and ultra structural investigations.
- © He/she is expected to have an understanding of current research methodology, collection and interpretation of data, ability to carry out research projects on clinical and or epidemiological aspects, a working knowledge on current databases, automated data retrieval systems, referencing and skill in writing scientific papers.
- © He/she is expected to present scientific data pertaining to the field, in conferences both as poster and verbal presentations and to take part in group discussions.

Broad outline of theoretical, clinical and practical courses.

1. Study of principles of routine and special techniques used for histopathology including principles of histochemistry, Immunohistochemistry, applied and theoretical biochemical basis of histochemistry as related to oral pathology.
2. Advanced histological and histopathological study of dental and oral tissues including embryonic considerations, clinical considerations, biology, histology, Pathology, prognosis and management of oral oncology, Concepts of oral premalignancy
3. Study of special and applied pathology of oral tissues as well as relation of local pathologic and clinical findings to systemic conditions.
4. Oral microbiology and their relationship to various branches of dentistry.
5. Oral microbiology affecting hard and soft tissues. Study of clinical changes and their significance to dental and oral diseases as related to oral pathology
6. Forensic odontology
7. Inter institutional postings such as cancer hospital, dermatology clinics, regional HIV detection centers, 'sophisticated instrumentation centers for electron microscopy and other techniques.
8. Maintenance of records of all postgraduates activities.
9. Library assignment.
10. University Dissertation.

A. Course contents

First year

1) Biostatistics and Research Methodology

- © Basic principles of biostatistics and study as applied to dentistry and research
- © Collection/organization of data/measurement scales presentation of data analysis.
- © Measures of central tendency.
- © Measures of variability.
- © Sampling and planning of health survey.
- © Probability, normal distribution and indicative statistics.
- © Estimating population values.
- © Tests of significance (parametric/non-parametric qualitative methods.)
- © Analysis of variance
- © Association, correlation and regression.

Approach:

- © Didactic lectures on biostatistics and discussion on research methodology by

eminent researchers.

© Two - day P.G. orientation course including general approach PG course, library and main dissertation, journal club topic selection and presentation, seminars, clinico-pathological meets, teaching methodology and use of audiovisual aids.

2) Applied Gross Anatomy of Head and Neck including Histology:

© Temporomandibular joint

© Trigeminal nerve and facial nerve

© Muscles of mastication

© Tongue

© Salivary glands

© Nerve supply; blood supply, lymphatic drainage and venous drainage of Orofacial tissues.

© Embryology

-Development of face, palate, mandible, maxilla, tongue and applied aspects of the same

-Development of teeth and dental tissues and developmental defects of oral and maxillofacial region and abnormalities of teeth

© Maxillary sinus

© Jaw muscles and facial muscles

Genetics:

Introduction modes of inheritance, chromosomal anomalies of oral tissues and single genetic disorders.

Approach:

To be covered as didactic lectures.

© Posting in department of anatomy for dissection of head, face and neck

3) Physiology (General and oral)

© Saliva

© Pain

© Mastication

© Taste

© Deglutition

© Wound healing

© Vitamins (Influence on growth, development and structure of oral soft and hard tissues and paraoral tissues.)

© Calcium metabolism.

© Theories of mineralization.

© Tooth eruption and shedding.

© Hormones. (Influence on growth, development and structure of oral soft and hard tissues and para oral tissues.)

© Blood and its constituents.

Approach:

To be covered as didactic lectures.

4) Cell Biology:

© Cell-structure and function (ultrastructural and molecular aspects), intercellular junctions, cell cycle and division, cell cycle regulators, cell - cell and cell - extra cellular matrix interactions.

© Detailed molecular aspects of DNA, RNA, and intracellular organelles, transcription and translation and molecular biology techniques.

Approach:

To be covered as seminars and didactic lecture.

5) General Histology:

Light and electron microscopy considerations of Epithelial tissues and glands, bone, hematopoietic system, lymphatic system, muscle, neural tissue, endocrinal system (thyroid, pituitary, parathyroid)

Approach:

- © Topics to be covered as didactic lectures.
- © Postings in the department of anatomy and histology for slide discussion
- © Record book to be maintained.

6) Biochemistry:

- © Chemistry of carbohydrates, lipids and proteins.
- © Methods of identification and purification.
- © Metabolism of carbohydrates, lipids and proteins.
- © Biological oxidation.
- © Various techniques - cell fractionation and ultra filtration, centrifugation, Electrophor Spectrophotometry, and radioactive techniques.

Approach:

- © Topics to be covered as didactic lectures.
- © Postings to the department of biochemistry to familiarize with various techniques
- © Record book to be maintained.

7) General Pathology:

© Inflammation and chemical mediators, thrombosis, embolism, necrosis, repair, degeneration, shock, hemorrhage pathogenic mechanisms at molecular level and blood dyscrasias, Carcinogenesis and Neoplasia.

Approach:

To be covered as seminars and didactic lectures.

8) General Microbiology:

- © Definitions of various types of infections.
- © Routes of infection and spread
- © Sterilization, disinfection and antiseptics.
- © Bacterial genetics.
- © Physiology and growth of microorganisms.

Approach:

- © To be covered as seminars and didactic lectures.
- © Record book to be maintained.

9) Basic Immunology

- © Basic principles of immunity, antigen and antibody reactions.
- © Cell mediated immunity and Humoral immunity.
- © Immunology of hypersensitivity.

- © Immunological basis of the autoimmune phenomena.
- © Immunodeficiency with relevance to opportunistic infections.
- © Basic principles of transplantation and tumor immunity.

Approach:

To be covered as didactic lectures.

10) Systemic microbiology/applied microbiology

Morphology, classification, pathogenicity, mode of transmission, methods of pre collection and transport of specimen, for laboratory diagnosis, staining methods, comi culture media, interpretation of laboratory reports and antibiotic sensitivity tests.

- © Staphylococci
- © Streptococci
- © Corynebacterium diphtheria
- © Mycobacteria
- © Clostridia, bacteroides and fusobacteria © Actinomycetales
- © Spirochetes

Virology:

General properties: structure, broad classification of viruses, pathogenesis, pathology of viral infections.

Herpes virus: list of viruses included, lesions produced, pathogenesis, latency

principles and laboratory diagnosis.

Hepatitis virus: list of viruses, pathogenesis, and mode of infection, list of diagnostic tests, and their interpretations, methods of prevention and control.

Human Immunodeficiency virus: structure with relevance to laboratory diagnosis, type of infection, laboratory tests and their interpretation, universal precautions, specific precautions and recent trends in diagnosis and prophylaxis.

Mycology:

- © General properties of fungi, classification bases on disease, superficial, subcutaneous, deep opportunistic infections.
- © General principles of fungal infections, diagnosis rapid diagnosis method of collection of sample and examination for fungi.

Approach:

- © To be covered as seminars and didactic lectures
- © Postings to the dept. of microbiology to familiarize with relevant diagnostic methods
- © Record book to be maintained

11) Oral Biology (oral and dental histology)

- © Structure and function of oral, dental and paraoral tissues including their ultra structure, molecular and biochemical aspects.
- © Study of morphology of permanent and deciduous teeth
(Lectures and practical demonstrations to be given by PG students)

Approach:

- © To be covered as seminars and didactic lectures.

- © Slide discussion on histological appearance of normal oral tissues.
- © Record book to be maintained.

12) Basic molecular biology and techniques:

experimental aspects - DNA extraction, PCR, western blotting.

Approach:

- © To be covered as didactic lectures
- © Postings in centers where facilities are available for demonstration of routine molecular biology techniques.
- © Record book to be maintained.

13) Basic histo techniques and microscopy:

- © Routine hematological tests and clinical significance of the same.
- © Biopsy procedures for oral lesions.
- © Processing of tissues for Paraffin lesions.
- © Microtome and principles of microtomy.
- © Routine stains, principles and theories of staining techniques
- © Microscope, principles and theories of microscopy.
- © Light microscopy and various other types including electron microscopy.
- © Methods of tissue preparation for ground sections, decalcified sections.

Approach:

- © Topics to be covered as seminars.
- © Preparation of ground and decalcified sections, tissue processing, sectioning and staining.
- © Record book to be maintained

Academic activities:

- © Submission of synopsis of dissertation at the end of six months.
- © Journal clubs and seminars to be presented by every post graduate student twice a month.
- © To attend interdepartmental meetings.
- © To attend dental camps based on the survey to be done.
- © Part -1 year ending examination to be conducted by the college.

SECOND YEAR

Oral pathology

- © Developmental defects of oral and maxillofacial region and abnormalities of teeth
Dental caries (Introduction, Epidemiology, microbiology, cariogenic bacterial including properties, acid production in plaque, development of lesion, response of dentine - pulp unit, histopathology, root caries, sequelae and immunology).
- © Pulpal and Periapical diseases
- © Infections of oral and Para oral regions (bacterial, viral and fungal infection)
- © Non - neoplastic disorders of salivary glands
- © Bone pathology
- © Hematological disorders
- © Physical and chemical injuries, allergic and Immunological diseases.
- © Cysts of odontogenic origin
- © Dermatologic diseases.
- © Periodontal diseases

- © Oral manifestations of systemic diseases
- © Facial pain and neuromuscular disorders including TMJ disorders
- © Regressive alterations of teeth

Clinical Pathology:

- © Laboratory investigations - Hematology, Microbiology and Urine analysis
- © Postings to Clinical Pathology for relevant training
- © Record book to be maintained.

Specialized histotechniques and special stains:

Special staining techniques for different tissues.

Immunohistochemistry

Preparation of frozen sections and cytological smears

Approach:

Training to be imparted in the department or in other institutions having the facility Record book to be maintained

Recording of Case history and Clinico-pathological discussions:

Approach

Posting to the department of Oral medicine, Diagnosis and Radiology and Oral and Maxillofacial surgery

Record of case histories to be maintained Dermatology

Study of selected mucocutaneous lesions-etiopathogenesis, pathology, clinical presentation and diagnosis.

Approach

- © Posting to the dept of Dermatology of a Medical college
- © Topics to be covered as Seminars
- © Record of cases seen to be maintained.

Oral oncology

Detailed study including Pathogenesis, molecular and biochemical changes of tumor like lesions and Premalignant lesions affecting the hard and soft tissues of oral and paraoral tissues

Tumour markers

Approach

To be covered as seminars

Posting to a Cancer center to familiarise with the pathological appearances, diagnosis, radio-diagnosis and treatment modalities.

Oral Microbiology and immunology

© Normal Oral microbial flora

© Defense mechanism of the oral cavity

© Microbiology and immunology of Dental caries and Periodontal diseases © Dental caries (Introduction, epidemiology, microbiology, cariogenic bacteria including properties, acid production in plaque, development of lesion, response of dentin-pulp unit, histopathology, root caries, sequelae and immunology)

© Tumor immunology

© Infections of Pulp and Periapical and periodontal tissues

© Oral sepsis and Bacteremia

© Microbial genetics

© Infections of oral and Para oral regions (bacterial, viral and fungal infections)

Approach

To be covered as seminars

Forensic Odontology:

Legal procedures like inquest, medico-legal evidences post mortem examination of violence around mouth and neck, identification of deceased individual-dental importance.

Bite marks rugae patterns and lip prints.

Approach

To be covered as seminars

Posting to a Cancer center to familiarize with the pathological appearances, diagnosis, and radio-diagnosis and treatment modalities

Histopathology - slide discussion

Record book to be maintained

Laboratory techniques and Diagnosis

© Routine hematological tests and clinical significance of the same

© Microtome and principles of microtomy

© Routine stains, principles and theories of staining techniques

© Microscope, principles and theories of microscopy

© Light microscopy and various other types including electron microscopy

© Methods of tissue preparation for ground sections, decalcified sections.

© Special stains and staining techniques for different tissues

© Immunohistochemistry

© Preparation of frozen sections and cytological smears

Other Topics in Oral Pathology.

♦ Detailed description of diseases affecting oral mucosa, teeth, supporting tissues & jaws

♦ Cysts of the oral & Para-oral regions

♦ Systemic diseases affecting oral cavity.

Approach: Seminars & Slide discussions. Record notebook to be maintained. Training in histo-pathology slide reporting.

Experimental aspects of Oral diseases

Approach: Posting is desirable in Centers where animal experimentation is carried out to familiarize with laboratory technique's, upkeep & care of experimental animals.

Recent advances in Oral Pathology.

Approach: Update of knowledge in Oral Pathology through study of recent journals & Internet browsing. Journal Clubs & Group discussions

Academic activities

© Library assignment to be submitted at the end of 6 months © Commencement of dissertation work

© Journal clubs and seminars to be presented by every PG student © Clinico - pathological discussions once in a month by every PG student © To attend interdepartmental meetings.

© Lecture and practical classes and slide discussions to be taken for II BDS students in oral and dental anatomy, dental histology and oral physiology. © Year ending examination (theory and practical) to be conducted by the college.

IIIRD YEAR

- © Non-neoplastic disorders of salivary glands.
- © Bone pathology
- © Physical and chemical injuries, allergic and Immunological diseases.
- © Cysts of odontogenic origin
- © Oral manifestations of systemic diseases

Approach

To be covered as seminars Slide discussions of the same Record book to be maintained

Academic activities

- © Visit to center out Animal experimentation to familiarize with Laboratory techniques, upkeep and care of animals
- © Completion of Dissertation work and submission of the same, six months before the Final Examination
- © Study of Journals, Internet Browsing, and group discussions, to update knowledge in the recent advances in Oral Pathology
- © Lecture and Practical demonstrations for third B.D.S students in Oral pathology and Microbiology
- © Reporting of histopathology slides
- © Journal clubs and Seminars to be presented by every post graduate student twice a month
- © Clinico-pathological discussions by every student once in a month
- © To attend Interdepartmental meetings.

Monitoring learning Progress

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment is done using checklists that assess various aspects. Checklists are given in Section

IV. Scheme of Examination

Theory - 300 Marks

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows *:

PAPER-I : Applied Basic Sciences: Applied anatomy, Physiology (General and oral), Cell Biology, General Histology, Biochemistry, General Pathology, General and systemic Microbiology, Virology, Mycology, Basic Immunology, Oral Biology (oral and dental histology), Biostatistics and Research Methodology

PAPER-II: Oral pathology, Oral Microbiology & Immunology and Forensic Odontology

PAPER-III: Laboratory techniques and Diagnosis and Oncology

PAPER-IV: Essay

* The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical/Clinical - 200 Marks

1. Case Presentation
 - a) Long case - 20 marks
 - b) Short case — 10 marks
2. Clinical Hematology (any two investigations) - 20 Marks

Hb%, bleeding time, clotting time, Total WBC count, Differential WBC count and ESR

3. Smear Presentation - 20 marks

4. Cytology or microbial smear and staining

5. Paraffin sectioning and H & E Staining - 30 Marks

6. Histopathology slide discussion - 100 Marks

C. Viva Voce 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic is given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes

PUBLIC HEALTH DENTISTRY

Objectives

At the end of 3 years of training the candidate should be able to:

Knowledge

© apply basic sciences knowledge regarding etiology, diagnosis and management of the prevention, promotion and treatment of all the oral conditions at the individual and community level.

© Identify social, economic, environmental and emotional determinants in a given individual patient or a community for the purpose of planning and execution of Community Oral Health Program.

© Ability to conduct Oral Health Surveys in order to identify all the oral health problems affecting the community and find solutions using multi - disciplinary approach. © Ability to act as a consultant in community Oral Health, teach, guide and take part in research (both basic and clinical), present and publish the outcome at various scientific conferences and journals, both national and international level.

Skills

The candidate should be able to

1. Take history, conduct clinical examination including all diagnostic procedures to arrive at diagnosis at the individual level and conduct survey of the community at state and national level of all conditions related to oral health to arrive at community diagnosis. Plan and perform all necessary treatment, prevention and promotion of Oral Health at the individual and community level.
2. Plan appropriate Community Oral Health Program, conduct the program and evaluate, at the community level.
3. Ability to make use of knowledge of epidemiology to identify causes and appropriate preventive and control measures.
4. Develop appropriate person power at various levels and their effective utilization.
5. Conduct survey and use appropriate methods to impart Oral Health Education.
6. Develop ways of helping the community towards easy payment plan, and followed by evaluation for their oral health care needs.
7. Develop the planning, implementation, evaluation and administrative skills to carry out successful community Oral Health Programs.

Values:

1. Adopt ethical principles in all aspects of Community Oral Health Activities.
2. To apply ethical and moral standards while carrying out epidemiological researches.
3. Develop communication skills, in particular to explain the causes and prevention of oral diseases to the patient.
4. Be humble and accept the limitations in his knowledge and skill and to ask for help from colleagues when needed and promote teamwork approach.
5. Respect patient's rights and privileges including patients right to information and right to seek a second opinion.

Course Contents:

Paper I: Applied Basic Sciences

I. Applied Anatomy and Histology

A. Applied Anatomy in relation to:

- Development of face
- Branchial arches
- Muscles of facial expression
- Muscles of mastication
- TMJ
- Salivary gland
- Tongue
- Salivary gland
- Tongue
- Hard and soft palate
- Infratemporal fossa
- Paranasal air sinuses
- Pharynx and larynx
- Cranial and spinal nerves- with emphasis on trigeminal, facial, glossopharyngeal and hypoglossal nerve
- Osteology of maxilla and mandible
- Blood supply, venous and lymphatic drainage of head and neck
- Lymph nodes of head and neck
- Structure and relations of alveolar process and edentulous mouth
- Genetics-fundamentals

B. Oral Histology

- Development of dentition, Innervations of dentin and pulp
- Periodontium-development, histology, blood supply, nerve supply and lymphatic drainage
- Oral mucous membrane
- Pulp-periodontal complex

II. Applied Physiology and Biochemistry:

- Cell
- Mastication and deglutition
- Food and nutrition
- Metabolism of carbohydrates, proteins and fats
- Vitamins and minerals
- Fluid and electrolyte balance
- Pain pathway and mechanism-types, properties
- Blood composition and functions, clotting mechanism and erythropoiesis, Blood groups and transfusions, Pulse and blood pressure,
- Dynamics of blood flow
- Cardiovascular homeostasis-heart sounds
- Respiratory system: Normal physiology and variations in health and diseases, Asphyxia and artificial respiration
- Endocrinology: thyroid, parathyroid, adrenals, pituitary, sex hormones and

pregnancy, Endocrine regulation of blood sugar.

III. A. Applied Pathology:

- Pathogenic mechanism of molecular level
- Cellular changes following injury
- Inflammation and chemical mediators
- Oedema, thrombosis and embolism
- Hemorrhage and shock
- Neoplasia and metastasis
- Blood disorders
- Histopathology and pathogenesis of dental caries, periodontal disease, oral mucosal lesions, and malignancies, HIV
- Propagation of dental infection

B. Microbiology

- Microbial flora of oral cavity
- Bacteriology of dental caries and periodontal disease
- Methods of sterilization
- Virology of HIV, herpes, hepatitis
- Parasitology
- Basic immunology - basic concepts of immune system in human body
- Cellular and humoral immunity Antigen and antibody system
- Hypersensitivity and Autoimmune diseases

C. Oral Pathology

- Detailed description of diseases affecting the oral mucosa, teeth, supporting tissues and jaws.

IV. Physical and Social Anthropology

- Introduction and definition
- Appreciation of the biological basis of health and disease
- Evolution of human race, various studies of different races by anthropological methods

V. Applied Pharmacology:

- Definition, scope and relations to other branches of medicine, mode of action, bioassay, standardization, pharmacodynamics, pharmacokinetics.
- Chemotherapy of bacterial infections and viral infections - sulphonamides and antibiotics.
- Local anesthesia
- Analgesics and anti-inflammatory drugs
- Hypnotics, tranquilizers and antipyretics
- Important hormones-ACTH, cortisone, insulin and oral antidiabetics.
- Drug addiction and tolerance
- Important pharmacological agents in connection with autonomic nervous system-adrenaline, noradrenaline, atropine
- Brief mention of antihypertensive drugs
- Emergency drugs in dental practice
- Vitamins and haemopoietic drugs

VI. Research Methodology and Biostatistics:

Health informatics: basic understanding of computers and its components, operating software (Windows), Microsoft office, preparation of teaching materials like slides, project, multimedia knowledge.

Research methodology- definitions, types of research, designing written protocol for research, objectivity in methodology, quantification, records and analysis.

Biostatistics-introduction, applications, uses and limitations of bio - statistics in Public Health dentistry, collection of data, presentation of data, measures of central tendency, measures of dispersion, methods of summarizing, parametric and non parametric tests of significance, correlation and regression, multivariate analysis, sampling and sampling techniques - types, errors, bias, trial and calibration

COMPUTERS-Basic operative skills in analysis of data and knowledge of multimedia.

Paper II - Public Health

1. Public Health

- Definition, concepts and philosophy of dental health
- History of public health in India and at international level
- Terminologies used in public health

2. Health

- Definition, concepts and philosophy of health
- Health indicators
- Community and its characteristics and relation to health

3. Disease

- Definition, concepts.
- Multifactorial causation, natural history, risk factors
- Disease control and eradication, evaluation and causation, infection of specific diseases
- Vaccines and immunization

4. General Epidemiology

- Definition and aims, general principles
- Multifactorial causation, natural history, risk factors
- Methods in epidemiology, descriptive, analytical, experimental and classic epidemiology of specific diseases, uses of epidemiology
- Duties of epidemiologist
- General idea of method of investigating chronic diseases, mostly non-infectious nature, epidemic, endemic, and pandemic.
- Ethical conversation in any study requirement
- New knowledge regarding ethical subjects
- Screening of diseases and standard procedures used

5. Environmental Health:

- Impact of important components of the environment of health
- Principles and methods of identification, evaluation and control of such health hazards
- Pollution of air, water, soil, noise, food
- Water purification, international standards of water
- Domestic and industrial toxins, ionizing radiation
- Occupational hazards

- Waster disposal- various methods and sanitation

6. Public Health Education:

- Definition, aims, principles of health education
- Health education, methods, models, contents, planning health education programs

7.Public Health Practice and Administration System In India

8.Ethics And Jurisprudence

- Basic principles of law
- Contract laws- dentist - patient relationships & Legal forms of practice
- Dental malpractice
- Person identification through dentistry
- Legal protection for practicing dentist.
- Consumer protection act

9.Nutrition In Public Health:

- Study of science of nutrition and its application to human problem e Nutritional surveys and their evaluations
- Influence of nutrition and diet on general health and oral health, dental caries, periodontal disease and oral cancers
- Dietary constituents and cariogenecity e Guidelines for nutrition

10. Behavioral Sciences:

- Definition and introduction
- Sociology: social class, social group, family types, communities and social relationships, culture, its effect on oral health.
- Psychology: definition, development of child psychology, anxiety, fear and phobia, intelligence, learning, motivation, personalities, fear, dentist-patient relationship, modeling and experience

11 Hospital Administration:

- Departmental maintenance, organizational structures
- Types of practices
- Biomedical waste management

11.Health Care Delivery System:

- International oral health care delivery systems - Review
- Central and state system in general and oral health care delivery system if any
- National and health policy
- National health programme
- Primary health care - concepts, oral health in PHC and its implications
- National and international health organizations
- Dentists Act 1928, Dental council of India, Ethics, Indian Dental Association
- Role of W.H.O. and Voluntary organizations in Health Care for the *Community*

13. Oral Biology And Genetics:

- A detailed study of cell structure
- Introduction to Genetics, Gene structure, DNA, RNA
- Genetic counseling, gene typing

- Genetic approaches in the study of oral disorders
- Genetic Engineering - Answer to current health problems

Paper III: Dental Public Health

1. Dental Public Health:

- History
- Definition and concepts of dental public health
- Differences between clinical and community dentistry
- Critical review of current practice
- Dental problems of specific population groups such as chronically ill, handicapped and institutionalized group

2. Epidemiology of Oral Diseases and Conditions

- Dental caries, gingival, periodontal disease malocclusion, dental Fluorosis, oral cancer, TMJ disorders and other oral health related problems.

3. Oral Survey Procedures:

- Planning
- Implementation
- WHO basic oral health methods 1997
- Indices for dental diseases and conditions
- Evaluation

4. Delivery of Dental Care

- Dental person power - dental auxiliaries
- Dentist - population ratios,
- Public dental care programs
- School dental health programs- Incremental and comprehensive care
- Private practice and group practice
- Oral health policy - National and international policy

5. Payment for Dental care

- Prepayment
- Post-payment
- Reimbursement plans
- Voluntary agencies
- Health insurance

6. Evaluation of Quality of Dental care

- Problems in public and private oral health care system program
- Evaluation of quality of services, governmental control

7. Preventive Dentistry

- Levels of prevention
- Preventive oral health programs screening, health education and motivation
- Prevention of all dental diseases-dental caries, periodontal diseases, oral cancer, malocclusion and Dentofacial anomalies
- Role of dentist in prevention of oral diseases at individual and community level.
- Fluoride
- History

- Mechanism of action
- Metabolism
- Fluoride toxicity
- Fluorosis
- Systemic and topical preparations
- Advantages and disadvantages of each
- Update regarding Fluorosis
- Epidemiological studies
- Methods of fluoride supplements
- Defluoridation techniques
 - Plaque control measures-
- Health Education
- Personal oral hygiene
- Tooth brushing technique
- Dentifrices, mouth rinses
 - Pit and fissure sealant, ART
 - Preventive oral health care for medically compromised individual
 - Update on recent preventive modalities
 - Caries vaccines
 - Dietary counseling

8. Practice Management

- Definition
- Principles of management of dental practice and types
- Organization and administration of dental practice
- Ethical and legal issues in dental practice
- Current trends

Structured Training Schedule

First Year Seminars

- 5 seminars in basic sciences subject,
- To conduct 10 journal clubs Library assignment on assigned topics - 2
- Submission of synopsis for dissertation-within 6 months
- Periodic review of dissertation at two monthly intervals

Clinical Training

1. Clinical assessment of patient
2. Learning different criteria and instruments used in various oral indices - 5 cases each
 - Oral Hygiene Index - Greene and Vermillion
 - Oral Hygiene Index - Simplified
 - DMF - DMF (T), DMF (S)
 - Def
 - Fluorosis Indices - Dean's Fluorosis Index, Tooth Surface Index for Fluorosis, Th\$| and Fejerskov Index

Community Periodontal Index (CPI) Plaque Index-Silness and Loe WHO Oral Health Assessment Form -1997

- Carrying out treatment (under comprehensive oral health care) of 10 patients - maintaining complete records.

Field Programme:

1. Carrying out preventive programs and health education for school children of the adopted school.
2. School based preventive programs-
 - Topical Fluoride application-Sodium Fluoride, Stannous Fluoride, AckW* Phosphate Fluoride preparations and Fluoride varnishes, Fluoride mouth rinses
 - Pit and Fissure Sealant - chemically cured (GIC), light cured
 - Minimal Invasive Treatment-Preventive Resin Restorations (PRR), Atraumatic Restorative Treatment (ART)
 - Organizing and carrying out dental camps in both urban and rural areas.
3. Visit to slum, water treatment plant, sewage treatment plant, and Milk dairy, Public Health Institute, Anti-Tobacco Cell, Primary Health Center and submitting reports.
4. In additions the postgraduate shall assist and guide the under graduate students in their clinical and field programs.

Second Year

Seminars

- Seminars in Public Health and Dental Public Health topics
- Conducting journal clubs
- Short term research project on assigned topics - 2
- Periodic review of dissertation at monthly reviews

Clinical Training-Continuation of the clinical training

1. Clinical assessment of patient
2. Learning different criteria and instruments used in various oral indices e Oral Hygiene Index - Greene and Vermillion
 - Oral Hygiene Index – Simplified
 - DMF - DMF (T), DMF (S)
 - Def t/s
 - Fluorosis Indices - Dean's Fluorosis Index, Tooth Surface Index for Fluorosis, Thylstrup and Fejerskov Index
 - Community Periodontal Index (CPI)
 - Plaque Index-Silness and Loe
 - WHO Oral Health Assessment Form -1987
 - Carrying out treatment (under comprehensive oral health care) of 10 patients - maintaining complete records

Field Program - Continuation of field program

1. Carrying out school dental health education
2. School based preventive programs-

- Topical Fluoride application-Sodium Fluoride, Stannous Fluoride, Acidulated Phosphate Fluoride preparations and Fluoride varnishes, Fluoride mouth rinses
 - Pit and Fissure Sealant - chemically cured (GIC); light cured
 - Minimal Invasive Treatment-Preventive Resin Restorations (PRR), Atraumatic Restorative Treatment (ART)
 - Organizing and carrying out dental camps in both urban and rural areas.
5. Assessing oral health status of various target groups like School children, Expectant mothers Handicapped, Underprivileged, and geriatric populations. Plan dental manpower and financing dental health care for the above group.
6. Application of the following preventive measures in clinic-10 Cases each.
- Topical Fluoride application - Sodium Fluoride, Stannous Fluoride, Acidula' Phosphate Fluoride preparations and Fluoride varnishes.
 - Pit and Fissure Sealant
7. Planning total health care for school children in an adopted school:
- a) Periodic surveying of school children
 - b) Incremental dental care
 - c) Comprehensive dental care
8. Organizing and conducting community oral health surveys for all oral condition- 3 surveys
9. In addition the postgraduate shall assist and guide the under graduate student in their clinical and field programs
10. To take lecture classes (2) for Undergraduate students in order to learn teaching method (pedagogy) on assigned topic.

Third Year:

Seminars

- Seminars on recent advances in Preventive Dentistry and Dental Public Health
- Critical evaluation of scientific articles -10 articles
- Completion and submission of dissertation

Clinical Training

1. Clinical assessment of patient
 2. Learning different criteria and instruments used in various oral indices - 5 each
- Oral Hygiene Index - Greene and Vermillion
 - Oral Hygiene Index – Simplified
 - DMF - DMF (T), DMF (S)
 - Def t/s
 - Fluorosis Indices - Dean's Fluorosis Index, Tooth Surface Index for Fluorosis
 - Thylstrup and Fejerskov Index
 - Community Periodontal Index (CPI)
 - Plaque Index-Silness and Loe
 - WHO Oral Health Assessment Form -1987
 - Carrying out treatment (under comprehensive oral health care) of 10 patients - maintaining complete records

3. Carrying out school dental health education
 4. School based preventive programs-
 - Topical Fluoride application - Sodium Fluoride, Stannous Fluoride, Acidulated Phosphate Fluoride preparations and Fluoride varnishes.
 - Pit and Fissure Sealant
 - Minimal Invasive Techniques - Preventive Resin Restorations (PRR), Atraumatic Restorative Treatment (ART)
 5. To take lecture classes (2) for Undergraduate students in order to learn teaching methods (pedagogy) on assigned topic
 6. Exercise on solving community health problems -10 problems
 7. Application of the following preventive measures in clinic -10 cases each.
 - Topical Fluoride application - Sodium Fluoride, Stannous Fluoride, Acidulated Phosphate Fluoride preparations
 - Pit and Fissure sealants
 8. Dental - health education training of school teachers, social workers, health workers,
 9. Posting at dental satellite centers/ nodal centers
 10. In addition the post graduate shall assist and guide the under graduate students in their clinical and field programs
- Before completing the third year M.D.S., a student must have attended two national conferences. Attempts should be made to present two scientific papers, publication of a scientific article in a journal.

Monitoring Learning Process:

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklists are given in Section IV.

Scheme of Examination

A. Theory 300 Marks'

Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows: *

PAPER-I : Applied Basic Sciences: Applied Anatomy and Histology, Applied Physiology and Biochemistry, Applied Pathology, Microbiology, Oral Pathology, Physical and Social Anthropology, Applied Pharmacology and Research Methodology and statistics.

PAPER II: Public Health

PAPER-III: Dental Public Health

PAPER-IV: Essay

Topics of current interest in community oral health?

* The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical / Clinical Examination : 200 Marks

1. Clinical examination of at least 2 patients representing the community- includss history, main complaints, examination and recording of the findings, using indices for the assessment of oral health and presentation of the observation including diagnosis, comprehensive treatment planning. (50 Marks -1 % Hrs)

2. Performing

- a. One of the treatment procedures as per treatment plan. (Restorative, surgical, rehabilitation)
- b. Preventive oral health care procedure. (50 Marks -1 % Hrs)
- c. One of the procedures specified in the curriculum

3 Critical evaluation of a given research article published in an international journal
(50 Marks -1 Hour)

4 Problem solving - a hypothetical oral health situation existing in a communityis given with sufficient data. The student as a specialist in community dentistry is expected to suggest practical solutions to the existing oral health situation of the given community.

(50 Marks -1 Hour)

C. Viva Voce 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic be given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minute

PAEDODONTICS & PREVENTIVE DENTISTRY

Objectives

At the end of 3 years of training the candidate should be able to

1. Create not only a good oral health in the child but also a good citizen tomorrow.
2. Instill a positive attitude and behavior in children
3. Understand the principles of prevention and preventive dentistry right from birth to adolescence
4. Guide and counsel the parents in regards to various treatment modalities including different facets of preventive dentistry
5. Prevent and intercept developing malocclusion

Skills

1. Obtain proper clinical history, methodological examination of the child patient, perform essential diagnostic procedures and interpret them, and arrive at a reasonable diagnosis and treat appropriately
2. Be competent to treat dental diseases which are occurring in child patient.
3. Manage to repair and restore the lost / tooth structure to maintain harmony between both hard and soft tissues of the oral cavity.
4. Manage the disabled children effectively and efficiently, tailored to the needs of individual requirement and conditions.

Attitudes

1. Develop an attitude to adopt ethical principles in all aspects of Pedodontic practice.
2. Professional honesty and integrity are to be fostered
3. Treatment care is to be delivered irrespective of the social status, cast, creed, and religion of the patients.
4. Willingness to share the knowledge and clinical experience with professional colleagues.
5. Willingness to adopt, after a critical assessment, new methods and techniques of Pedodontic management developed from time to time, based on scientific research, which are in the best interest of the child patient.
6. Respect child patient's rights and privileges, including child patients right to information and right to seek a second opinion.
7. Develop an attitude to seek opinion from allied medical and dental specialities, as and when required

Course contents

1. Applied Anatomy & genetics
2. Applied Physiology
3. Applied Pathology
4. Nutrition and Dietetics
5. Growth & Development: Prenatal and postnatal development of cranium, face, jaws, teeth and supporting structures. Chronology of dental development and development of occlusion. Dimensional changes in dental arches. Cephalometric evaluation of growth.
6. Child Psychology: Development & Classification of behavior, personality, intelligence in children, theories of child psychology, stages of psychological child development, fear anxiety, apprehension and its management
7. Behavior Management: Non-pharmacological and Pharmacological methods.
8. Child Abuse & Dental Neglect

9. Conscious Sedation, Deep Sedation & General Anesthesia in Pediatric Dentistry: (Including Other Drugs, Synergic & Antagonistic Actions of Various Drugs Used in Children)

10. Preventive Pedodontics: Concepts, chair side preventive measures for dental diseases, high-risk caries including rampant & extensive caries - Recognition, Features & Preventive Management, Pit and Fissures Sealants, Oral Hygiene measures, Correlation of brushing with dental caries and periodontal diseases. Diet & Nutrition as related to dental caries. Diet Counseling

11. Dental Plaque: Definition, Initiation, Pathogenesis, Biochemistry, and Morphology & Metabolism.

12. Microbiology & Immunology as related to Oral Diseases in Children. Basic concepts, immune system in human body, Auto Immune diseases, Histopathology, Pathogenesis, Immunology of dental caries, Periodontal diseases. Tumors, Oral Mucosal lesions etc.

13. Gingival & Periodontal diseases in Children:

- Normal Gingiva & Periodontium in children.
- Gingival & Periodontal diseases - Etiology, Pathogenesis, Prevention & Management

14. Pediatric Operative Dentistry

- Principle Of Operative Dentistry along with modifications of materials/past, current & latest including tooth colored materials.
- Modifications required for cavity preparation in primary and young permanent teeth.
- Various Isolation Techniques
- Restorations of decayed primary, young permanent and permanent teeth in children using various restorative material like Glass Ionomer, Composites, Silver, Amalgam & latest material (gallium)
- Stainless steel, Polycarbonate & Resin Crowns / Veneers & fibre pvit systems.

15. Pediatric Endodontics:

a. **Primary Dentition:** - Diagnosis of pulpal diseases and their management - Pulp capping,

Pulpotomy, Pulpectomy (Materials & Methods), Controversies & recent concepts.

b. Young permanent teeth and permanent teeth, Pulp capping, Pulpotomy, Apexogenesis, Apexification, Concepts, Techniques and Materials used for different procedures.

c. Recent advances in Pediatric diagnosis and Endodontics.

16. Prosthetic consideration in-Paediatric Dentistry.

17. Traumatic Injuries in Children:

- Classifications & Importance.
- Sequelae & reaction of teeth to trauma.
- Management of Traumatized teeth with latest concepts.
- Management of jaw fracture in children.

18. Interceptive Orthodontics:

a. Concepts of occlusion and esthetics: Structure and function of all anatomic components

of occlusion, mechanics of articulations, recording of masticatory function, diagnosis of Occlusal dysfunction, relationship of TMJ anatomy and pathology and related neuromuscular physiology.

b. A comprehensive review of the local and systemic factors in the causation of malocclusion.

c. Recognition and management of normal and abnormal developmental occlusions in primary, mixed and permanent dentitions in children (Occlusal Guidance).

d. Biology of tooth movement: A comprehensive review of the principles of teeth movement

Review of contemporary literature. Histopathology of bone and Periodontal ligament, Molecular and ultra cellular consideration in tooth movement.

- e. Myofunctional appliances: Basic principles, contemporary appliances: Design & Fabrication
- f. Removable appliances: Basic principles, contemporary' appliances: Design & Fabrication
- g. Case selection & diagnosis in interceptive Orthodontics (Cephalometric, Image processing, Tracing, Radiation hygiene, Video imaging 8s advance Cephalometric techniques).
- h. Space Management: Etiology, Diagnosis of space problems, analysis, Biomechanics, Planned extraction in interception orthodontics.
19. Oral Habits in Children:
 - Definition, Etiology & Classification
 - Clinical features of digit sucking, tongue thrusting, mouth breathing 8s various other secondary habits.
 - Management of oral habits in children
20. Dental ware of Children with special needs:
 - Definition Etiology, Classification, Behavioral, Clinical features 8s Management of children with:
 - Physically handicapping conditions
 - Mentally compromising conditions
 - Medically compromising conditions
 - Genetic disorders
21. Oral manifestations of Systemic Conditions in Children 8s their Management
22. Management of Minor Oral Surgical Procedures in Children
23. Dental Radiology as related to Pediatric Dentistry
24. Cariology
 - Historical background
 - Definition, Etiology & Pathogenesis
 - Caries pattern in primary, young permanent and permanent teeth in children.
 - Rampant caries, early childhood caries and extensive caries. Definition, etiology, Pathogenesis, Clinical features, Complications 8s Management.
 - Role of diet and nutrition in Dental Caries
 - Dietary modifications 8s Diet counseling.
 - Subjective 8s objective methods of Caries detection with emphasis on Caries Activity tests, Caries prediction, Caries susceptibility 8s their clinical Applications
25. Pediatric Oral Medicine 8s Clinical Pathology: Recognition 8s Management of developmental dental anomalies, teething disorders, stomatological conditions, mucosal lesions, viral infections etc.
26. Congenital Abnormalities in Children: Definition, Classification, Clinical features of Management.
27. Dental Emergencies in Children and their Management.
28. Dental Materials used in Pediatric Dentistry.
29. Preventive Dentistry:
 - Definition
 - Principles 8s Scope
 - Types of prevention
 - Different preventive measures used in Pediatric Dentistry including fissure sealants and caries vaccine.
30. Dental Health Education 8s School Dental Health Programmes
31. Dental health concepts, Effects of civilization and environment, Dental Health delivery system, Public Health measures related to children along with principles of Pediatric Preventive Dentistry
32. Fluorides:

- Historical background
 - Systemic & Topical fluorides
 - Mechanism of action
 - Toxicity & Management
 - Defluoridation techniques.
33. Medicological aspects in Paediatric Dentistry with emphasis on informed concept.
 34. Counseling in Paediatric Dentistry
 35. Case History Recording, Outline of principles of examination, diagnosis & treatment planning.
 36. Epidemiology: Concepts, Methods of recording & evaluation of various oral diseases. Various national & global trends of epidemiology of oral diseases.
 37. Comprehensive Infant Oral Health Care.
 38. Principles of Bio-Statistics & Research Methodology & Understanding of Computers and Photography
 39. Comprehensive cleft care management with emphasis on counseling, feeding, nasoalveolar bone remodeling, speech rehabilitation.
 40. Setting up of Pedodontics & Preventive Dentistry Clinic.
 41. Emerging concept in Paediatric Dentistry of scope of laser/minimum invasive procedures :

1ST YEAR

Preclinical Work

(Duration - first 6 Months of First Year MDS)

(One On Each Exercise)

1. Carving of all deciduous teeth
2. Basic wire bending exercises
3. Fabrication of
 - a. Maxillary bite plate / Hawley's'
 - b. Maxillary expansion screw appliance
 - c. Canine retractor appliance
 - d. All habit breaking appliances
 - i. Removable type
 - ii. Fixed type
 - iii. Partially fixed and removable
 - e. Two Myofunctional appliance
 - f. Making of inclined plane appliance
 - g. Feeding appliances
4. Basic soldering exercise I - making of a lamppost of stainless steel wire pieces of different gauges soldered on either side of heavy gauge main post.
5. Fabrication of space maintainers
 - a. Removable type-
 - Unilateral Non - functional space maintainer
 - Bilateral Non-Functional space maintainer
 - Unilateral functional space maintainer
 - Bilateral functional space maintainer
 - b. Space Regainers -
 - Hawley's appliances with Helical space regainer
 - Removable appliance with Slingshot space regainer
 - Removable appliance with Dumbbell space regainer
 - c. Fixed Space maintainers
 - Band & long loop space maintainer
 - Band & short loop space maintainer
 - Mayne's space maintainer
 - Transpalatal arch space maintainer
 - Nance Palatal holding arch
 - Nance Palatal holding arch with canine stoppers

- Gerbcr space regainer
 - Distal shoe appliance
 - a. Active space maintainers
 - b. For guiding the eruption of first permanent molar - rags
 - c. Arch holding device
 - d. Functional space maintainer
6. Basics for spot welding exercise
7. Collection of extracted deciduous and permanent teeth
- a. Sectioning of the teeth at various levels and planes
 - b. Drawing of section and shapes of pulp
 - c. Phantom Head Excercises : Performing ideal cavity preparation for various restorative materials for both Deciduous and permanent teeth
 - d. Performing pulpotomy, root canal treatment and Apexification procedure
 - i) Tooth preparation and fabrication of various temporary and permanent restorations on fractured anterior teeth.
 - ii) Preparation of teeth for various types of crowns
 - iii) Laminates/veneers
 - iv) Bonding & banding exercise
8. Performing of behavioral rating and IQ tests for children.
9. Computation of: -
- Caries index and performing various carrier activity test.
 - Oral Hygiene Index
 - Periodontal Index
 - Fluorosis Index
10. Surgical Exercises : a. Fabrication of splints b. Type of Wiring c. Suturing, various pvit system, prcing & porm. tuli
- a. Taking of periapical, occlusal, bitewing radiographs of children
 - b. Developing and processing of films, thus obtained
 - c. Tracing of soft tissue dental and skeletal landmarks as observed on Cephalometric radiographs and drawing of various planes and angles, further interpretation of Cephalometric radiographs is analysis.
 - d. Mixed dentition cast analysis
11. Library assignment
12. Synopsis

Clinical work Requirements from 7 to 36 months

The following is the minimum requirement to be completed before the candidate can be considered eligible to appear in the final M.D.S Examinations: -

No,	Clinical Work	Total	7 To 12 Months	13 To 24 Months	25 To 36 Months
1	Behavior Management of different age groups children with complete records.	17 '	2	10	5

2	Detailed Case evaluation with complete records, treatment planning and presentation of cases with chair side and discussion	17	2	10	5
3	Step-by-step chair side preventive dentistry scheduled for high risk children with gingival and periodontal diseases & Dental Caries	11	1	5	5
4	Practical application of Preventive dentistry concepts in a class of 35-50 children & Dental Health Education & Motivation.	7	1	4	2
5	Pediatric Operative Dentistry with application of recent concepts. (a). Management of Dental Caries (I) Class I	50	30	10	10

	(II) Class II	100	40	50	10
	(III) Other Restorations 100	20	50	30	
	(b). Management of traumatized anterior teeth	15	04	06	05
	(c) Aesthetic Restorations	25	05	10	10
	(d). Pediatric Endodontic Procedures- Deciduous teeth				
	Pulpotomy /Pulpectomy	150	30	50	70
	Permanent Molars-	20	3	7	10
	Permanent Incisor-	15	2	3	10
	Apexification & Apexogenesis	20	02	08	10
6	Stainless Steel Crowns	50	10	20	20
7	Other Crowns	05	01	02	02
8	Fixed Space Maintainers	30	08	12	10
9	Removable Space Maintainers	20	05	07	08
10	Functional Maintainers	05	01	02	02

11	Preventive measures like fluoride applications & Pit & Fissure Sealants applications with complete follow-up and diet counseling	20	08	08	04
12	Special Assignments(i) School Dental Health Programmes	03	01	01	01
	(ii) Camps etc.,	02	01	01	

13 Library usage

14.Laboratory usage

15.Continuing Dental Health Programme

(The figures given against Sl. No. 4 to 12 are the minimum number of recommended procedures to be performed)

Monitoring Learning Progress

It is essential to monitor the learning progress to each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring to be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklists are given Section IV.

Scheme of Examination

A. Theory 300 Marks

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows: *

PAPER-I : Applied Basic Sciences : Applied Anatomy, Physiology, Pathology, Microbiology, Nutrition & Dietetics, Growth & Development and Dental plaque, Genetics.

PAPER-II : Clinical Paedodontics

1. Conscious sedation, Deep Sedation & General Anesthesia in Pediatric Dentistry
2. Gingival & Periodontal Diseases in Children
3. Pediatric Operative Dentistry
4. Pediatric Endodontics
5. Traumatic Injuries in Children Interceptive Orthodontics
6. Oral Habits in children
7. Dental Care of Children with special needs
8. Oral Manifestations of Systemic Conditions in Children & their Management
9. Management of Minor Oral Surgical Procedures in Children
10. Dental Radiology as Related to Pediatric Dentistry
11. Pediatric Oral Medicine & Clinical Pathology
12. Congenital Abnormalities in Children
13. Dental Emergencies in Children & Their Management
14. Dental Materials Used in Pediatric Dentistry
15. Case History Recording
16. Setting up of Paedodontic & Preventive Dentistry Clinic

PAPER III: Preventive and Community Dentistry as applied to Pediatric Dentistry

1. Child Psychology
2. Behavior Management

3. Child Abuse & Dental Neglect
4. Preventive Pedodontics
5. Cariology
6. Preventive Dentistry
7. Dental Health Education 8s School Dental Health Programmes
8. Fluorides
9. Epidemiology
10. Comprehensive Infant Oral Health Care/Comprehensive cleft care
11. Principles of Bio-Statistics 8s Research Methodology 8s Understanding of Computers and Photography

PAPER-IV: Essay

* The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical Examination 200 Marks

The Clinical / Practical and Viva-Voce Examinations are conducted for a minimum of two days.

First Day:

1. Case Discussion, Pulp Therapy i.e. Pulpectomy on a Primary Molar.

Case Discussion	20 marks
Rubber Dam application	10 marks
Working length X-ray	20 marks
Obturation	20 marks
Total	70 marks

Case Discussion, Crown preparation on a Primary Molar for Stainless steel crown and cementation of the same.

Case discussion	10 marks
Crown Preparation	20 marks
Crown selection and Cementation	20 marks
Total	50 marks

Case discussion, band adaptation for fixed type of space maintainer and-impression making.

Case discussion	20 marks
Band adaptation	20 marks
Impression	20 marks
Total	60 marks

Second Day:

1. Evaluation of Fixed Space Maintainer and Cementation : 20 marks

C. Viva Voce : 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic is given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes

PROCEDURAL AND OPERATIVE SKILLS SHOULD BE AS ON

1st yr-

Examination of patients case history recording- 100
FNAC- 50
Biopsy- 50
Observe assist and perform under supervision
Intra oral radiographs perform under interpretation-500

2nd yr-

1. Dental treatment to medically compromised patients
- Observe, assist, and perform under supervision
2. Extra - oral radiographs, digital radiography 20
- Observe, assist and perform under supervision

Operative skills:

1. Giving intra — muscular and intravenous injections
2. Administration of oxygen and life saving drugs to the patients
3. Performing basic CPR and certification by Red Cross

3rd Year

All the above

Performed independently - Case history: Routine cases - 100

Interesting Cases - 25

Intra - oral Radiographs - 100

Periapical view - 100

Bitewing view - 50

Occlusal view - 50

Extra — oral radiographs of different views – 100

ORAL MEDICINE AND RADIOLOGY

Objectives:

At the end of 3 years of training the candidate should be able to

Knowledge: Theoretical, Clinical and practical knowledge of all mucosal lesions, diagnostic procedures pertaining to them and latest information of imaging modules.

Skills and Attitude: Three important skills need to be imparted

1. Diagnostic skill in recognition of oral lesions and their management
2. Research skills in handling scientific problems pertaining to oral treatment
3. Clinical and Didactic skills in encouraging younger doctors to attain learning objectives

Attitudes: the positive mental attitude and the persistence of continued learning need to be inculcated

Course Contents

Paper I: Applied Basic Sciences

Applied Anatomy

1. Gross anatomy of the face:

- a. Muscles of Facial Expression And Muscles Of Mastication
- b. Facial nerve
- c. Facial artery
- d. Facial vein

e. Parotid gland and its relations

2. Neck region:

- a. Triangles of the neck with special reference to Carotid, Digastric triangles and midline structures
- b. Facial spaces
- c. Carotid system of arteries, Vertebral Artery, and Subclavian arteries
- d. Jugular system

Internal jugular

External jugular

- e. Lymphatic drainage
- f. Cervical plane
- g. Muscles derived from Pharyngeal arches
- h. Infratemporal fossa in detail and temporomandibular joint
- i. Endocrine glands

Pituitary

j. Sympathetic chain

k. Cranial nerves-V, VII, IX, XI, & XII

- Thyroid
- Parathyroid

I. Exocrine glands

- Parotid
- Thyroid
- Parathyroid

3. Oral Cavity:

- a.Vestibule and oral cavity proper
- b.Tongue and teeth
- c.Palate - soft and hard
- 4.Nasal Cavity
 - a.Nasal septum
 - b.Lateral wall of nasal cavity
 - c.Paranasal air sinuses
- 5.Pharynx:

Gross salient features of brain and spinal cord with references to attachment of cranial nerves to the brainstem.

Detailed study of the cranial nerve nuclei of V, VII, IX, X, XI, XII Osteology: Comparative study of fetal and adult skull Mandible:

Development, ossification, age changes and evaluation of mandible in detail

Embryology

1. Development of face, palate, nasal septum and nasal cavity, paranasal air sinuses
2. Pharyngeal apparatus in detail including the floor of the primitive pharynx
3. Development of tooth in detail and the age changes
4. Development of salivary glands
5. Congenital anomalies of face must be dealt in detail.

Histology:

1. Study of epithelium of oral cavity and the respiratory tract
2. Connective tissue
3. Muscular tissue
4. Nervous tissue
5. Blood vessels
6. Cartilage
7. Bone and tooth
8. Tongue
9. Salivary glands
- 10.Tonsil, thymus, lymph nodes

Physiology:

1. General Physiology:
 - Cell
 - Body Fluid Compartments
 - Classification
 - Composition
 - Cellular transport
 - RMP and action potential Muscle Nerve Physiology
2. Structure of a neuron and properties of nerve fibers
3. Structure of muscle fibers and properties of muscle fibers
4. Neuromuscular transmission
5. Mechanism of muscle contraction

Blood:

2. RBC and Hb
3. WBC - Structure and functions
4. Platelets - functions and applied aspects
5. Plasma proteins
6. Blood Coagulation with applied aspects
7. Blood groups
8. Lymph and applied aspects

Respiratory System:

- Air passages, composition of air, dead space, mechanics of respiration with pressure and volume changes
- Lung volumes and capacities and applied aspects
- Oxygen and carbon dioxide transport
- Neural regulation of respiration
- Chemical regulation of respiration
- Hypoxia, effects of increased barometric pressure and decreased barometric pressure
- Cardio-Vascular System:
- Cardiac Cycle
- Regulation of heart rate/ Stroke volume / cardiac output / blood flow
- Regulation of blood pressure
- Shock, hypertension, cardiac failure

Excretory system

- Renal function tests

Gastro - intestinal tract:

- Composition, functions and regulation of:
- Saliva
- Gastric juice
- Pancreatic juice
- Bile and intestinal juice
- Mastication and deglutition

Endocrine system:

- Hormones - classification and mechanism of action
- Hypothalamic and pituitary hormones
- Thyroid hormones
- Parathyroid hormones and calcium homeostasis
- Pancreatic hormones
- Adrenal hormones

Central Nervous System:

- Ascending tract with special references to pain pathway

Special Senses:

- Gustation and Olfaction

Biochemistry

3. Carbohydrates - Disaccharides specifically maltose, lactose, sucrose

-Digestion of starch/absorption of glucose

-Metabolism of glucose, specifically glycolysis, TCA cycle, gluconeogenesis

- Blood sugar regulation
- Glycogen storage regulation
- Glycogen storage diseases
- Galactosemia and fructosemia

2. Lipids

- Fatty acids- Essential/non essential
- Metabolism of fatty acids- oxidation, ketone body formation, utilization ketosis
- Outline of cholesterol metabolism- synthesis and products formed from cholesterol

3. Protein

- Amino acids- essential/non essential, complete/ incomplete proteins
- Transamination/ Deamination (Definition with examples)
- Urea cycle
- Tyrosine- Hormones synthesized from tyrosine
- In born errors of amino acid metabolism
- Methionine and transmethylation

4. Nucleic Acids

- Purines/Pyrimidines Purine analogs in medicine
- DNA/RNA-Outline of structure
- Transcription/translation Steps of protein synthesis Inhibitors of protein synthesis Regulation of gene function

5. Minerals

- Calcium/Phosphorus metabolism specifically regulation of serum calcium levels
- Iron metabolism
- Iodine metabolism
- Trace elements in nutrition

6. Energy Metabolism

- Basal metabolic rate
- Specific dynamic action (SDA) of foods

7. Vitamins

- Mainly these vitamins and their metabolic role- specifically vitamin A, Vitamin C, Vitamin D, Thiamin, Riboflavin, Niacin, Pyridoxine

Pathology:

1. Inflammation:

- Repair and regeneration, necrosis and gangrene
- Role of complement system in acute inflammation
- Role of arachidonic acid and its metabolites in acute inflammation
- Growth factors in acute inflammation
- Role of molecular events in cell growth and intercellular signaling cell surface receptors
- Role of NSAIDS in inflammation
- Cellular changes in radiation injury and its manifestations

Homeostasis

- Role of Endothelium in thrombo - genesis
- Arterial and venous thrombi
- Disseminated Intravascular Coagulation

Shock

- Pathogenesis of hemorrhagic, neurogenic, septic, cardiogenic shock, circulatory disturbances, ischemic hyperemia, venous congestion, edema, infarction

Chromosomal Abnormalities:

- Marfan's syndrome
- Ehler's Danlos Syndrome
- Fragile X Syndrome

Hypersensitivity:

- Anaphylaxis
- Type II Hypersensitivity
- Type III Hypersensitivity
- Cell mediated Reaction and its clinical importance
- Systemic Lupus Erythematosus
- Infection and infective granulomas

Neoplasia:

- Classification of Tumors
- Carcinogenesis & Carcinogens - Chemical, Viral and Microbial
- Grading and Staging of Cancer, tumor Angiogenesis, Paraneoplastic Syndrome
- Spread of tumors
- Characteristics of benign and malignant tumors

Others:

- Sex linked agammaglobulinemia
- AIDS
- Management of Immune deficiency patients requiring surgical procedures
- De George's Syndrome
- Ghon's complex, post primary pulmonary tuberculosis - pathology and pathogenesis

Pharmacology:

1. Definition of terminologies used
2. Dosage and mode of administration of drugs
3. Action and fate of drugs in the body
4. Drugs acting on the CNS
5. Drug addiction, tolerance and hypersensitive reactions
6. General and local anesthetics, hypnotics, analeptics, and tranquilizers
7. Chemotherapeutics and antibiotics
8. Analgesics and anti-pyretics
9. Anti-tubercular and anti-syphilitic drugs
10. Antiseptics, sialogogues, and anti-sialogogues
11. Haematinics
12. Anti-diabetics
13. Vitamins - A B Complex, C, D, E, K
14. Steroids

Paper II: Oral And Maxillofacial Radiology

Study includes Seminars / lectures / Demonstrations

1. History of radiology, structure of x - ray tube, production of x - ray, property of x rays
2. Biological effects of radiation
3. Filtration of collimation, grids and units of radiation
4. Films and recording media
5. Processing of image in radiology
6. Design of x -ray department, dark room and use of automatic processing units
7. Localization by radiographic techniques
8. Faults of dental radiographs and concept of ideal radiograph
9. Quality assurance and audit in dental radiology
10. Extra - oral-imaging techniques
11. OPG and other radiologic techniques
12. Advanced imaging technique like CT Scan, MRI, Ultras one & thermo graphic
13. Radio nucleotide techniques
14. Contrast radiography in salivary gland, TMJ, and other radiolucent pathologies
15. Radiation protection and ICRP guidelines
16. Art of radiographic report, writing and descriptors preferred in reports
17. Radiograph differential diagnosis of radiolucent, radio opaque and mixed lesions
18. Digital radiology and its various types of advantages

Paper III: Oral Medicine, therapeutics and laboratory investigations

1. Study includes seminars / lectures / discussion
2. Methods of clinical diagnosis of oral and systemic diseases as applicable to oral tissue including modern diagnostic techniques
3. Laboratory investigations including special investigations of oral and bro - facial diseases
4. Teeth in local and systemic diseases, congenital, and hereditary disorders
5. Oral manifestations of systemic diseases
6. Oro - facial pain
7. Psychosomatic aspects of oral diseases
8. Management of medically compromised patients including medical emergencies in the dental chair
9. Congenital and Hereditary disorders involving tissues of oro facial region
10. Systemic diseases due to oral foci of infection
11. Hematological, Dermatological, Metabolic, Nutritional, & Endocrinal conditions with oral manifestations
12. Neuromuscular diseases affecting oro -facial region
13. Salivary gland disorders
14. Tongue in oral and systemic diseases
15. TMJ dysfunction and diseases
16. Concept of immunity as related to oro - facial lesions, including AIDS
17. Cysts, Neoplasms, Odontomes, and fibro - osseous lesions
18. Oral changes in Osteo - dystrophies and chondro - dystrophies
19. Pre malignant and malignant lesions of oro facial region
20. Allergy and other miscellaneous conditions
21. Therapeutics in oral medicine -clinical pharmacology
22. Forensic odontology

23.Computers in oral diagnosis and imaging

24.Evidence based oral care in treatment planning

Essential Knowledge

Basic medical subjects, Oral Medicine, Clinical Dentistry, Management of Medical Emergencies, Oral Radiology, Techniques and Inter - Operation, Diagnosis of Oro-facial Disorders

Procedural and Operative Skills:

(The numbers mentioned are minimum to be performed by each candidate)

1st Year

Observe, Assist, & Perform under supervision

1. *Examination of Patient* - *Case history recordings* -50

- *FNAC & Biopsy* - 5 each

2. Observe, Assist, & Perform under supervision
Intra - oral radiograph
Perform an interpret -100

2nd year

1. *Dental treatment to medically compromised patients*

- *Observe, assist, and perform under supervision*

2. *Extra - oral radiographs, digital radiography* - 25

- *Observe, assist and perform under supervision*

Operative skills:

1. *Giving intra - muscular and intravenous injections*

2. *Administration of oxygen and life saving drugs to the patients*

3. *Performing basic CPR and certification by Red Cross*

3rd Year

All the above

Performed independently-Case history: Routine cases -25

Interesting Cases - 25

Intra - oral Radiographs - 100

Periapical view - 50

Bitewing view - 25

- Occlusal view - 25

Extra-oral radiographs of different views - 50

Monitoring Learning Progress

It is essential to monitor the learning progress to each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also students to evaluate themselves. The monitoring to be done by the staff of the department based on participation of students in various teaching / learning activities. It may be structured and assessment be done using checklists that assess various aspects. Checklists are given in Section IV

Scheme of Examination

Theory

Written examination shall consist of four question papers each of three hours duration. Total marks for each paper will be 75. Paper I, II and III shall consist of two long

questions carrying 20 marks each and 5 short essay questions carrying 7 marks each. Paper IV will be on Essay. Questions on recent advances may be asked in any or all the papers. Distribution of topics for each paper will be as follows: *

PAPER-I : *Applied Basic Sciences* : Applied Anatomy, Physiology, Biochemistry, Pathology, and Pharmacology.

PAPER-II Oral and Maxillofacial Radiology

PAPER-III- Oral Medicine, therapeutics and laboratory investigations

PAPER-IV- Essay

* The topics assigned to the different papers are generally evaluated under those sections. However a strict division of the subject may not be possible and some overlapping of topics is inevitable. Students should be prepared to answer overlapping topics.

B. Practical / Clinical Examination 200 Marks

1st Day

Clinical Case Presentation

2 Spotters	2 x 10 = 20 Marks
2 Short Cases	2 x 15 = 30 Marks
1 Long Case	1 x 50 = 50 Marks

Total =100 Marks

Radiology Exercise

I.A) One Intra Oral Radiograph	10 Marks
B) One Occlusal Radiograph	30 Marks
II. A) Two Extra Oral Radiograph Including technique and interpretation	2 x 30 = 60 Marks

2nd Day

C. Viva Voce : 100 Marks

i. Viva-Voce examination: 80 marks

All examiners will conduct viva-voce conjointly on candidate's comprehension, analytical approach, expression, interpretation of data and communication skills. It includes all components of course contents. It includes presentation and discussion on dissertation also.

ii. Pedagogy Exercise: 20 marks

A topic is given to each candidate in the beginning of clinical examination. He/she is asked to make a presentation on the topic for 8-10 minutes

SECTION IV

TEACHING/LEARNING ACTIVITIES AND MONITORING LEARNING PROGRESS

All the candidates registered for MDS course in various specialties shall pursue the course for a period of 3 years as full time students. During this period, each student shall take part actively in learning activities designed by the institution / university. A list is given below. Institutions may include additional activities, if so, desired.

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular assessment. It not only helps teachers to evaluate students, but also helps students to evaluate themselves. The monitoring be done by the staff of the department based on participation of students in various teaching / learning activities using checklists. Model Checklists are given in this section. They may be copied and used. The number of activities attended and the topics prevented are to be recorded in log book. The log book should periodically be validated by the supervisors.

i) Acquisition of Knowledge

Journal Review Meeting (Journal Club): The trainees should make presentation from the allotted journals of selected article at least five times in a year. The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed during presentation. The assessment be made by faculty members and peers attending the meeting using Model Checklist 1 in Section IV.

Seminars: The seminars may be held at least twice a week in each postgraduate department. All candidates are expected to participate actively and enter relevant detail in the logbook. Each candidate shall make at least five seminars presentations in each year. The topics should be assigned to the student well in advance to facilitate in depth study. The ability to do literature search, in depth study, presentation skills and use of audio- visual aids are to be assessed using the Model Checklist 2, in Section IV.

Symposium: It is recommended to hold symposiums on topics covering multiple disciplines. **Clinico-Pathological Conferences (CPC):** The CPCs should be held once in a month involving the faculties in Oral Medicine and Radiology, Oral Pathology and concerned clinical departments. The PG student should be encouraged to present the clinical details, radiological, and histo-pathological interpretations, and participation in the discussion. All departments should attend CPCs.

Interdepartmental meetings: To bring in more integration among various specialities, interdepartmental meetings are recommended, chaired by the dean, with all heads of post graduate departments, at least once a month.

ii) Clinical skills

Day to Day work: Skills in outpatient and ward work should be assessed periodically, assessment lly. The

should include the candidate's sincerity and punctuality, analytical ability and communication skills (see Model Checklist 3, Section IV).

Clinical Meetings : Candidates should periodically present cases to his peers and faculty members. This should be assessed using a check list (see Model checklist 4, Section IV).

Clinical and Procedural skills : The candidate should be given graded responsibility to enable learning by apprenticeship. The performance is assessed by the guide by direct observation. Particulars are recorded by the student in the log book. (Table No.3, Section IV)

iii) Teaching skills: All the candidates shall be encouraged to take part in undergraduate teaching programs, either in the form of lectures or group discussions. This performance should be based on assessment by the faculty members of the department and from feedback from the undergraduate students (See Model checklist 5, Section IV)

iv) Periodic tests: The concerned departments may conduct three tests, two of them be annual tests, one at the end of first year and the other in the second year. The third test may be held three months before the final examination. The tests may include written papers, practicals / clinicals and viva voce.

vii) Work Diary / Log Book: Every candidate shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical or laboratory procedures, if any conducted by the candidate.

viii) Records: Records, log books and marks obtained in tests will be maintained by the Head of the Department and will be made available to the University or DCI.

Continuing dental education programmes: Each postgraduate department is recommended to organize these programs on regular basis involving other institutions. The trainees shall also be encouraged to attend such programs conducted elsewhere

Conferences / workshops / advance courses: The trainee shall be encouraged not only to attend conferences/workshops/advanced courses, but also to present at least 2 papers at state, national specialty meetings during their training period.

Dissertation: Every candidate shall prepare a dissertation based on the clinical or experimental work or any other study conducted by them under the supervision of the post graduate guide.

(See Model checklist 6 & 7, Section IV) Log book

The log book is a record of the important activities of the candidates during the training. Internal assessment should be based on the evaluation of the log book. Collectively, log books are a tool for the evaluation of the training programme of the institution by external agencies. The record includes academic activities as well as the presentations and projects carried out by the candidate.

Format for the log book for the different activities is given in Tables 1,2 and 3 of Section IV. Copies may be made and used by the institutions.

Procedure for defaulters: Every department should have a committee to review such situations. The defaulting candidate is counseled by the guide and head of the department. In extreme cases of default the departmental committee may recommend that defaulting candidate be withheld from appearing the examination, if she/he fails to fulfill the requirements in spite of being given adequate chances to set himself or herself right.

Section V

Ethics in Dentistry

Introduction: There is a definite shift now from the traditional patient and doctor relation w and delivery of dental care. With the advances in science and technology and the increa needs of the patient, theirs families and community, there is a concern for the health of community as a whole. There is a shift to greater accountability to the society. specialists like the other health professionals are confronted with many ethical problems is therefore absolutely necessary for each and every one in the health care delivery to prepare themselves to deal with these problems. To accomplish this and develop human values, it is desired that all the trainees undergo ethical sensitization by lectures or discussion on ethical issues, discussion of cases with an important ethical component.

Course Content:

Introduction to ethics -

- What is ethics?
- What are values and norms?
- How to form a value system in one's personal and professional life? Hippocratic oath.
- Declaration of Helsinki, WHO declaration of Geneva, International code of ethics,
- D.C.I. Code of ethics.

Ethics of the individual -

- The patient as a person.
- Right to be respected
- Truth and confidentiality
- Autonomy of decision
- Doctor Patient relationship

Professional Ethics-

- Code of conduct
- Contract and confidentiality
- Charging of fees, fee splitting
- Prescription of drugs
- Over-investigating the patient
- Malpractice and negligence

Research Ethics -

Animal and experimental research/humanness

Human experimentation

Human volunteer research-informed consent for trials

Drug trials

Ethical workshop of cases

Gathering all scientific factors

Gathering all value factors

Fortifying areas of value - conflict, setting of priorities

Working out criteria towards decisions

Recommended Reading:

1. Francis CM., Medical Ethics, 2nd Edn, 2004, Jaypee Brothers, New Delhi, Rs 150/.
2. Ethical Guidelines for Biomedical Research on Human Subjects, Indian Council of Medi, Research, New Delhi, 2000.

CHECKLISTS AND LOGBOOKS

CHECKLIST- 1

MODEL CHECK LIST FOR EVALUATION OF JOURNAL REVIEW PRESENTATIONS.

Name of the Trainee:

Date:

Name of the Faculty / Observer:

<u>Sl. No</u>	Items for observation during presentation	Poor 0	Below Average 1	Average 2	Good 3	Very Good 4
1.	<i>Article chosen was</i>					
2.	<i>Extent of understanding of scope & objectives of the paper by the candidate</i>					
3.	<i>Whether cross-references</i>					
	<i>have been consulted</i>					
4.	<i>Whether other relevant publications consulted</i>					
5.	<i>Ability to respond to questions on the paper/ subject</i>					
6.	<i>Audio - Visual aids used</i>					
7.	<i>Ability to discuss the paper</i>					
8.	<i>Clarity of presentation</i>					
9.	<i>Any other observation</i>					
	<i>Total Score</i>					

CHECKLIST- 2

MODEL CHECK LIST FOR EVALUATION OF SEMINAR PRESENTATIONS.

Name of the Trainee:

Date:

Name of the Faculty / Observer:

<u>Sl no</u>	Items for observation during presentation	Poor 0	Below Average 1	Average 2	Good 3	Very Good 4
1	Whether other relevant publications consulted					
2	Whether cross - references have been consulted					
3	Completeness of Preparation					
4	Clarity of Presentation					
5	Understanding of subject					
6	Ability to answer the questions					
7	Time scheduling					
8	Appropriate use of Audio -Visual aids					
9	Overall performance					
10	Any other observation					
	Total score					

Please use a separate sheet for each faculty member

CHECKLIST- 3

MODEL CHECK LIST FOR EVALUATION OF CLINICAL WORK IN OPD

Name of the Trainee:

Date:

Name of the Unit Head:

<u>Sl.</u> <u>No.</u>	Items for observation during presentation	<i>Poor</i> <i>0</i>	<i>Below</i> <i>Average 1</i>	<i>Average</i> <i>2</i>	<i>Good</i> <i>3</i>	<i>Very</i> <i>Good 4</i>
1.	<i>Regularity of attendance</i>					
2.	<i>Punctuality</i>					
3.	<i>Interaction with colleagues and supportive staff</i>					
4.	<i>Maintenance of case records</i>					
5.	<i>Presentation of cases</i>					
6.	<i>Investigations work -up</i>					
7.	<i>Chair - side manners</i>					
8.	<i>Rapport with patients</i>					
9.	<i>Overall quality of clinical work</i>					
	<i>Total score</i>					

Please use a separate sheet for each faculty member

CHECKLIST - 4
EVALUATION FORM FOR CLINICAL CASE PRESENTATION

Name of the Trainee:

Date:

Name of the faculty / Observer:

Sl.No	Items for observation during presentation	Poor 0	Below Average 1	Average 2	Good 3	Very Good 4
1.	Completeness of history					
2.	Whether all relevant points elicited					
3.	Clarity of presentation					
4.	Logical order					
5.	Mentioned all positive and negative					
6.	Accuracy of general physical examination					
7.	Investigations required					
	Complete list					
8.	Relevant order					
	Intepretation of Investigations					
	Ability to discuss differential diagnosis.					
9.	Ability to discuss diagnosis.					
10.	Others					
	Grand Total					

Please use a separate sheet for each faculty member

CHECKLIST-5

MODEL CHECK LIST FOR EVALUATION OF TEACHING SKILL

Name of the Trainee:

Date:

Name of the faculty Observer:

Sl. No.		Strong Point	Weak Point
1.	Communication of the purpose of the talk		
2.	Evokes audience interest in the subject		
3.	The introduction		
4.	The sequence of ideas		
5.	The use of practical examples and / or illustrations		
6.	Speaking style (enjoyable, monotonous, etc. Specify)		
7.	Attempts audience participation		
8.	Summary of the main points at the end		
9.	Ask questions		
10.	Answer questions asked by the audience		
11.	Rapport of speaker with his audience		
12.	Effectiveness of the talk		
13.	Uses AV aids appropriately		

Please use a separate sheet for each faculty member

CHECKLIST- 6
MODEL CHECKLIST FOR DISSERTATION PRESENTATION

Name of the Trainee:

Date:

Name of the faculty / Observer:

Sl.No.	Prints to be considered	Poor <i>0</i>	<i>Below</i> <i>Average 1</i>	<i>Average</i> <i>2</i>	<i>Good</i> <i>3</i>	<i>Very</i> <i>Good 4</i>
1.	<i>Interest show in selecting topic</i>					
2.	<i>Appropriate review</i>					
3.	<i>Discussion with guide and other faculty</i>					
4.	<i>Quality of protocol</i>					
5.	<i>Preparation of Proforma</i>					
	Total Score

SECTION VI

LIBRARY & EQUIPMENT REQUIREMENTS

1. Infrastructure & Functional Requirements:

1. **Space:** *In addition to the BDS functional programme the following physical facilities shall be made available to start postgraduate training programmes leading to MDS degree.*

a. *A separate clinical area for postgraduate students. Minimum Area-600 sq feet*

b. *A seminar room furnished with proper seating arrangement and audio-visual equipments - Minimum area -300 sq. ft.*

c. *A separate room for the use of postgraduate students - Minimum area -200 sq.ft.*

2. **Equipment:** *Each postgraduate department shall be provided with the required equipments as recommended by Dental Council of India.*

3. **Library:** *A departmental library shall be provided with copies of relevant books. In addition a central library should provide all the recent editions of books pertaining to the speciality and allied subjects as per the recommendations of Dental Council of India.*

All the journals of relevant specialty and allied subjects shall be made available..

2. Recommended Books And Journals

I. Prosthodontics

Implantology

	<i>Title</i>	<i>Author</i>
1.	Osseo integration in skeletal reconstruction and joint replacement	Branemark
2.	Advanced osseointegration surgery	Philip
3.	Surgical atlas of dental implant technique	Bubbush
4.	Contemporary implant dentistry	Carl Misch
5.	Dental implant are they for me?	Thomas d Taylor
6.	A color atlas of dental implant surgery	Block
7.	A color atlas of dental and maxillofacial implantology	John Hobkrick
8.	The Branemark novum protocol for same day	Branemark
9.	Osseo integration and esthetics	Branemark
10.	Color atlas of Branemark system of oral reconstruction	Richard A/ Rassmuser
11.	Color atlas of dental medicine (implantology)	Spekerman
12.	Osseo integration in craniofacial reconstruction	Branemark
13.	Endosteal implant	McKinney
14.	Implant Prosthodontics	M. Fagan

15.	Dental Implant	Wolfe
16.	Dental Implant: Implant support prosthesis	Vincente Jimenz
17.	Periodontal and Prosthodontic management of Advanced case.	Marvian
18.	Oral implantology: Basic ITV cylinder	Schroeder
19.	Dental Implant	McKiney
20.	Tissue Integrated prosthesis	Branemark/ Zarb/ Alberketson
21.	Dental implants (The art and science)	Charles Bubbush
22.	Implant and restorative dentistry Carl Misch /Klaus U. Benner	Gerald M. Scortecchi/
23.	Tissue integration in orthopedic and maxillofacial Reconstruction	William R. Laney
24.	Oral Implantology	Andre
25.	Implant therapy	Myron
26.	Guided bone regeneration: InImplant dentistry	Daniel Buser
27.	Laboratory techniques for Branemark system	Taylor & Bergman
28.	Implant Prosthodontics: Surgical and prosthetic techniques For dental implants	Fagan
29.	A color atlas of the Branemark system on oral reconstruction	George A. Zarb

11. Linch M.A. - ET'S Oral Medicine, Diagnosis and Treatment
12. Dayal P.K. - Text book of Oral Medicine

c) Forensic Odontology

1. Derek H.Clark - Practical Forensic Odontology - Wright
2. Cottone Standish - Outline of Forensic Dentistry

3. Whittaker - A colour atlas of Forensic Dentistry

JOURNALS:

The journals are best source of information for professionals to keep abreast with the recent developments and trends in their respective specialties. Considering the array of journals that are available today the council desires that the institutions provide as a minimum requirement the list of journals mentioned below:

Pertaining to Dental education and practice.

1. Journal of Indian Dental Association
2. British Dental Journal
3. Journal of American Dental Association
4. Journal of Dentistry
5. Dental Clinics of North America
6. Journal of Dental Education
7. Dental Abstracts
8. Journal of Dental Research
9. Dental Index
10. Quintessence International
11. International Dental Journal
12. Australian Dental Journal
13. Journal of dental materials
14. Journal of aesthetic dentistry
15. Journal of cleft palate

PROSTHODONTICS

1. international Journal Of Oral & Maxillofacial Implants
2. International Journal Of Prosthodontics
3. Journal Of Dental Materials
4. Journal Of Esthetic Dentistry
5. Journal Of Geriatric Dentistry
6. Journal Of Prosthetic Dentistry
7. Journal Of Prosthodontics
8. International Journal Of Oral & Maxillofacial Surgery
9. Journal Of Clinical Periodontology.
10. Journal Of Periodontology.
11. Dental Technician.
12. Journal Of Endodontics.
13. European Journal Of Prosthetics & Restorative Dentistry.
14. The Journal Of Adhesive Dentistry.
15. International Journal Of Endodontics.

16. Journal Of OraL & MaxillofaciaL Surgery

PERIODONTICS

1. Journal of periodontoLogy
2. Journal of clinicaL periodontoLogy
3. Journal of periodontal Research
4. International journal of periodontics
5. Journal of Indian Society of periodontics
6. Journal of oral and maxillofacial implants
7. Periodontology **2000**
8. Annals of periodontology

ORAL & MAXILLOFACIAL SURGERY

3. Journal of Oral Pathology / Medicine
4. Journal of Community Dentistry & Oral Epidemiology
5. Journal of Indian Academy of Oral Medicine and Radiology
6. Journal of Indian association of Oral Pathology

EQUIPMENT REQUIREMENTS-Speciality wise

All postgraduate departments in Dental Institutions should possess standard equipment preferably approved by competent agencies like Bureau of standards.

The equipment requirements given are for minimum of two admissions in all specialities except for Prosthodontics. The requirements for Prosthodontics is for minimum of three admissions. The requirements shall increase corresponding to the number of increase in admissions

Department: Prosthodontics for three admissions

NAME	SPECIFICATION	REQUIRED
Equipment for unit of 3 Admissions	-1-1-1 Professor- Reader- Lecturer With MDS qualification	
Programmable dental chairs And units	With shadowless lamp, spittoon 3-way syringe, instrument tray and suction Micromotor, airtor	9
Intra oral camera with computer provision		
Laser		
Articulators- semi adjustable	With face bow	9
T.M.J articulators	With face bow	2
Fully adjustable articulators	With pantograph	1
Airtor and airtor handpieces		9
Micromotor- Clinical		9
Ultrasonic scaler (poiz with Perio, Endo, implant attachments)		9
Light cure		3
Sterilization- hot air oven		3
Autoclave		3
Surveyor- micro		3
Refrigerator		1
X-ray viewer (Lobby)		9
Pneumatic crown remover	With varying intensity	3
Needle destroyer		3
Rubber dam kit and instruments		9

CLINICAL LAB PROSTHODONTICS

NAME	SPECIFICATION	REQUIRED
Plaster dispenser		3
Model trimmer with carborundum disc		2
Model trimmer with diamond disc		1
Model trimmer with double disc	1 carborundum and 1 diamond disc	1
Lathe for polishing		3
High speed lathe	With suction unit	2

Vibrator		3
Acryliser- small for 3 flasks		3
Dewaxing unit		1
Hydraulic press		2
Vacuum mixing machine	Timer and meter reading vacuum	2
Micromotor- laboratory		3 (clinical)+3 (lab)
Curing pressure pot		1
Pressure molding machine		1

CHROME COBALT LAB EQUIPMENT

NAME	SPECIFICATION	REQUIRED
Duplicating unit		1
Pindex system		2
Burnout furnace	Programmable	3
Welder		1
Sand blaster (micro and macro)		1 each
Electro polisher		1
Furnace main	Programmable	2
Casting machine- centrifugal with Accessories		1
Induction casting	Machine with vacuum pump, capable of casting nickel- chrome, chrome cobalt, precious metal	1
Titanium casting machine		1
Spot welder with soldering		1
Attachment of cable.		
Bunsen burner		3
Steam cleaner		1
Spindle grinder	50,000rpm with vacuum suction	1
Wax heater		3
Wax carver- electrical	Temperature control with different tips	3
Curing pressure pots		1
Pressure molding machines		1
Milling machine	With kits and surveyor	1
Stereo microphone		3
Magnifying working glass		3
Heavy duty lathe	With suction and various speeds	3
Laser welder		1
Titanium soldering and welding unit		1
Dry model trimmer		1
Die cutting machine		2
Ultrasonic cleaner		3
Composite curing unit		1
Composite pressure cutting unit		2
Galvanic coping unit		1
Soldering torch		2
Surveyor		3
Picking unit		2

CERAMIC LAB EQUIPMENTS

NAME	SPECIFICATION	REQUIRED
Ceramic furnace	Programmable	2
Ceramic kit (instruments)		9
Ceramic furnace- castable ceramic		1
Ceramic kit for castable ceramic		3

IMPLANT

NAME	SPECIFICATION	REQUIRED
Implant kit (for surgical fixtures, Sinus lift, zygomatic fixture- abutment- Entss and prosthetic supra structure)		2
Implant torque control- 2 each		(1 for prosthetics and 1 for surgical)
Physio dispenser		2
Surgical instruments		2 sets
Screw driver and other instruments		Required for different type of fixtures and abutments and prosthesis
Fixtures, prosthetic components and other laboratory material required for implant supported prosthesis		As per requirement of each post graduate student.
Unit mount light		1
Pneumatic/ electrical crown remover		2
Extra oral implant		As per clinical requirements
Needle destroyer		2
Ultrasonic cleaner		2 (1 big + 1 small)
Unit for micro surgery		1
Autoclave		2
Short cycle autoclave (Kavo)		1
Camera	Digital	1
Electrical dental chairs and units		2 (1 Surgical + 1 Prosthetic)
Educating models		3 sets

Department Periodontics

NAME	SPECIFICATION	QTY.
Dental Chairs and Units	Electrically operated with shadowless Lamp, spittoon, 3 way syringe, instrument tray and suction micromotor, ultrasonic scaler	6
Sterilization Instruments		
Kavo Klave		1
Auto Clave		1
Steel bin		4
Diagnostic instruments		
W.H.O Probe		1
Nabers Probe		1
Williams Probe		1
Newman's Probe		1 "
Gold Man Fox Probe		1
Marquis color coded Probe		1
Oral prophylaxis Instruments		
Supra gingival scalars	set	2
Sub gingival scalars	set	2
Surgical Instruments		
Routine Surgical Instrument kit	set	2
Surgery Trolleys		6
Electro surgery unit		1
Special surgical Instruments		
Kirkland's Knife	set	1
Bucks Knife	set	1
Orban Knife	set	1
Paquette Blade Handle		1

NAME	SPECIFICATION	QTY.
Pocket Marker	set	1

Mc calls universal curettes	set	1
Graceys curettes	set	1
Krane Kaplan	set	1
Cumine Scalar	set	1
Osseous Surgical Instruments		
Mallet		1
Oschenbain Chiel		1
Schluger Bone File		1
Bone file		1
Bone regenerative materials	Bone graft and GTR membranes Depending on need	
Microsurgical Instruments		
Micro Needle Holder I		1
Micro Scissors		1
Magnifying Glass		1
Miscellaneous Instruments 1		
Composite Gun		

Department: Oral & Maxillofacial Surgery

NAME	SPECIFICATION	QTY.
Dental Chairs and Units	Electrically operated with shadowless lamp, spittoon, 3 way syringe, instrument tray and high vacuum suction, micro motor / Air motor	6
Autoclave	Front loading	2
Fumigator		1
Oscillating saw	With all hand pieces	1

<i>Surgical instruments</i>		
a. General surgery kit including Tracheotomy kit		
b. Minor oral surgery kit		
c. Osteotomy kit		

d. Cleft surgery kit		
e. Bone grafting kit		
f. Emergency kit		
g. Trauma set including bone plating kit		
h. Implant logy kit		
Distraction osteogenesis kit (desirable		1
Operating microscope and Microsurgery		1
Dermatomes		1
Formalin chamber		1
Pulse oxymeter		
Ventilator		1
Major operation theatre with all facilities		1
Recovery & I.C.U. with all necessary Life support equipments		2 beds
Fibrooptic light		1
Inpatient beds		20

Department: Conservative Dentistry

NAME	SPECIFICATION	QTY.
Dental Chairs and Units	Electrically operated with shadowless lamp, spittoon, 3 way syringe, instrument tray and suction, micro motor / Air oter lightcure	6
ENDOSONIC HANDPIECES -Physiosaline equipments		2
Mechanized rotary instruments including hand pieces and hand instruments		3

NAME	SPECIFICATION	QTY.
Glass bead sterilizers		3
Autoclaves for bulk instrument sterilization Vacuum preferably		2
Autoclaves for hand piece sterilization		2

Apex locators		2
Equipments for injectable thermoplasticized gutta percha - 2 OBTURA II 2 Kits		2
MIDAJET pressurized local anaesthesia		2
Operating microscopes - CARL ZEISS	Desirable	1
Pickling kits		2
Surgical endo kits		2
Low speed high torque motors		2
ANTHOGYR Torque control hand pieces		2
Kavo torque control hand pieces		2
Hu Freidy set of hand instruments		2
Hu Freidy sterilizer trays		4
j Variable Intensity Polymerization equipments VLC units		2
Conventional VLC units		1
LCD projector with computer-basic system With printer and scanner		1
Over head projector		1
Slide projector		2
Clinical micro motors		2
High speed hand pieces		3
Composite kits with different shades And polishing kits		2
Ceramic finishing kits		
Amalgam finishing kits		2

Laboratory Equipment

NAME	SPECIFICATION	QTY.
Equipments for casting procedures		1

Equipments for ceramics including induction casting machines / burnout preheat furnaces / wax elimination furnaces		1
Lab micro motor / metal grinders / sand blasters / polishing lathers / duplicator equipment / vacuum investment equipments		1 Set

Department: Orthodontics

NAME	SPECIFICATION	QTY.
Dental Chairs and Unit	Electrically operated with shadowless lamp, spittoon, 3 way syringe, instrument tray and suction	6
Vacuum Moulding Unit		1
Hydrosolder'		1
Lab Micromotor		4
Spot Welders		4
Model Trimmer (Double Disc)		2
Light Curing unit		2
Polishing Lathers		2
Tracing Tables		3
Digital Camera		1
Computers with all accessories		1
Scanner with transparency adapter		1
X-ray Viewer		5
O.H.P.		1
Slide Projector (35 mm) / LCD Projector		1
Autoclave - microprocess based, Wet & Dry		1
High & Low Cycle		

NAME	SPECIFICATION	QTY.
Dry Heat Sterilizer		1

<i>Ultrasonic Scaler</i>		1
<i>Sets of Orthodontic Pliers</i>		3 Sets
<i>Orthodontic impression trays</i>		4 Sets
<i>Ultrasonic tray cleaner</i>		1
<i>Typodonts with full teeth set</i>		6
<i>Anatomical Articulator with face bow attachments</i>		1
Three Place Articulators		1
Hinge Articulators		5

Department: Oral Pathology

NAME	SPECIFICATION	QTY.
Essential Equipment		
Dental Chairs and Units	Electrically operated with shadowless Lamp, spittoon, 3 way syringe, instrument tray and suction	1
Adequate laboratory glassware's as required for processing of biopsy specimens & staining.		
Tissue capsules / Tissue embedding cassettes		
Paraffin wax bath (thermostatically controlled		
Leuchart pieces		
Block holders		
Semi automatic micro tome		1
Automatic Microtome knife Sharper		1
Tissue floatation water bath (thermostatically controlled		1
Slide warming table		1+1
Steel slide racks for staining		1+2
Diamond glass marker		2

NAME	SPECIFICATION	QTY.
-------------	----------------------	-------------

Research microscope with phase contrast, dark field, polarization, CCTV & photomicrography attachments		1
Binocular Compound Microscope		4
Electronic dispensing machine		1
Aluminum slide trays		4
Wooden / Plastic slide boxes		4
Wax block storing cabinet		1+2
Slide storing cabinet		1+2
Refrigerator		1
Micropipettes		

DESIRABLE EQUIPMENT

Cryostat		1
Fluorescent Microscope		-j
Computer with printer		1
Image analysis software		1
Automatic processing equipment		1
Hard tissue microtome		1
Stereo microscope		1
Tissue storing cabinet (Frozen state)		1
Microwave	;	1

Department: Community Dentistry.

NAME	SPECIFICATION	QTY.
Instruments in the department for comprehensive oral health care programme		
Dental chairs	Electrically operated with shadowless lamp, spittoon, 3 way syringe, Micro motor, Aerator, scalar, light cure unit instrument tray and suction	6
Extraction forceps		6 Sets

Name	Specification	QTY
Filling instruments		6 sets
Scaling instruments	Super gingival scaling	6sets
Prosthetic instruments		6 sets
Amalgamator		2
Pulp tester		2
Autoclave		2
Sterilizer		2
X-ray viewer		1
instrument cabinet		1
Overhead Project		1
Slide projector		2
LCD or DLP multimedia projector		1
Computer, printer and UPS instruments.		2

For peripheral Dental care or Field programme

Staff bus		1
Mobile dental clinic fitted with at least 2 dental chairs with complete dental unit Ultrasonic scalar, compressor		1
Generator		1
Public address system, audio -visual aids,		1
TV		1
VCR		1
Instrument cabinet, emergency medicine kits, BP Apparatus,		1
Portable oxygen cylinder portable chair		1

Department: Pedodontics and Preventive Dentistry

NAME	SPECIFICATION	QTY.
------	---------------	------

Dental Chairs and Units	With shadowless lamp, spittoon, 3 way syringe, instrument tray and suction, micro motor, airotor, lightcure	6
Pedo extraction forceps sets		4
Autoclave	Front loading	1
Intra Oral X-ray		1
Automatic developer		1
Pulp Tester		2
Apex Locator		1
Rubber Dam Kit		6
Glass bead sterilizer		3
Orthodontic Welder		1
Ultrasonic Scalars		2
Needle Destroyer		3
Ultrasonic Cleaner		2
X-ray Viewer		2
Amalgamator		2
Plaster Dispenser		2
Dental Lathe		1
Vibrator		1
Frassico Typodonts		6

Minor oral Surgery Instruments

Soldering Unit		1
Band benching peek pliers		2 sets
Countering pliers		2
Crown crimping pliers		2
Double beak pliers Anterior and Posterior on		2

NAME	SPECIFICATION	QTY.
------	---------------	------

Dental Chairs and Units	Electrically operated with shadowless lamp, spittoon, 3 way syringe, instrument tray and suction	6
Intra Oral Radiography Machine	55- 70 kVp with Digital Compatibility	1
Extra Oral Radiography machine	100 kVp	1
Panoramic Radiography (OPG) Machine with	Digital Compatibility	1
Intra -Oral Camera		1
Pulp Tester		2
Autoclave		2
Punch Biopsy tool		2
Biopsy Equipment		2
Surgical Trolley		2
Emergency Medicines kit		1
Extra Oral Cassettes with Intensifying Screens (Conventional & Rare Earth)		4
Lead Screens		2
Lead Aprons		2
Lead Gloves		2
Radiographic Filters (Conventional & Rare Earth)		1
Dark Room with safe light facility		1
Automatic Radiographic Film Processors		2
Radiographic Film storage Lead Containers		1
X- ray Viewer boxes		2
Lacrimal Probes		2sets
Sialography Cannula		2 sets
Computer with printer		1
Illuminated Mouth Mirror & Probe		2
