

## Certification course on Essential of Clinical Photography

A two day Value Added Certification Course on Essential of Clinical Photography was organized by Department of Orthodontics and Dentofacial Orthopedics in Subharti Dental College on 9-10th April 2019 in which more than 80 students, faculty participated. On First day, there were lectures on the mainstream photography, its basics which included detailed knowledge of what is camera, its components and how it should be actually used.

On Second day, the whole focus was on how the clinical photographs should be taken. It also included details on its procedure, its requirements and equipments that are used while taking photographs.

Following this, on the same day, a hands on workshop was conducted which gave all the participants a chance to use a camera personally and they also clicked various clinical photographs with the guidelines told to them in the lecture. After this, a question answer round was held which clarified all their doubts & myths about photography.

In the end, a small evaluation test was conducted which included multiple choice questions. All participants cleared the test with flying colors. This showed that each and everyone who attended the Course was well educated about clinical photography from basics to practical usage and thus made this Value Added Course not only very successful but also a big hit.
