

## TEACHER'S DAY CELEBRATIONS

2022

The Subharti Dental College hosted a number of events during Teacher's Week from September 5–12, 2022 in an effort to raise awareness of oral health among Meerut's school teachers and to recognize the prestigious profession of teaching.

A team of dentists from the renowned institution visited over 15 schools all over Meerut. More than 250 teachers received oral health lectures, which were followed by oral screening and preventive programmes, and received information on how to maintain dental hygiene in both adults and children.

For their efforts to take care and teaching students with special health care needs, teachers at special schools like Mansik Mandit Asharya grih aseh prahikshan kendra in Meerut received appreciation.

An inter-school quiz competition was also organized by Subharti Dental College in which teachers from various schools of Meerut were invited and presented with tokens of appreciation and awards for their exemplary services in the profession of teaching.
